**Another Valuable Inven-
 tion.**
GATE'S BACK SUCTION PREVENTOR FOR
OIL WELLS, patented August 13, 1871, which en-
 tirely prevents the ingress of air in oil wells, while
 the tubing is being drawn. It is a well known fact
 to oil operators, that upon wells where Gas Pumps
 are used it is necessary to preserve as nearly a per-
 fect vacuum as possible, and that no air should be
 let into the well, at any time, when it can possibly
 be avoided; consequently, whenever the tubing is
 drawn from a well it is the cause of great injury to
 it, as the stuffing box, being then necessarily open-
 ed, the air immediately rushes back between the
 tubing and casing, into the well going into the oil
 rock and gas veins, and consequently causes the
 oil and gas to rush back to a great distance. So
 much so, that it almost always takes several days
 after pumping is resumed for a well to be brought
 back to its former condition, and sometimes it takes
 several weeks; and quite frequently wells have been
 almost completely ruined by the air being thus let
 in while drawing tubing.
 The BACK-SUCTION PREVENTOR is attached to
 the stuffing box and works in such a way that it
 completely shuts up the space between the stuffing
 box and tubing so effectively that not a particle of
 air can get through at any time while the tubing is
 being drawn and replaced. It supplies a want long
 felt, and is, without question, one of the most val-
 uable inventions of the day, to those engaged in the
 oil business. No well should be without it, as it
 often times saves ten times its cost by once using
 it. It is manufactured at the FOUNDRY AND
 MACHINE SHOP OF ANDREWS & CO., TIDI-
 OUTE, PA., and for sale by Hardware Dealers.
 Tidoute, Pa., March 23, 1872—law 3m.

**GATE'S BACK SUCTION PRE-
 VENTOR.**
 Tidoute, Pa., Feb. 2, 1872.
 Messrs. Andrews & Co.—GENTS:—Having
 used one of GATE'S BACK SUCTION PREVEN-
 TORS, I can confidently recommend the same to all
 who have occasion to use the same, as the best Pre-
 ventor of Back Suction in Oil Wells. Our well was
 so small that it hardly paid to run it. After pur-
 chasing one of GATE'S BACK SUCTION PRE-
 VENTORS in production was increased to a good
 paying well. Before we put the Back Suction Pre-
 ventor on the well, we invariably had to pump the
 well two weeks before we could resume it to its nor-
 mal production after drawing tubing. This is en-
 tirely obviated by the use of the Preventor.
 HARR, PARSONS & Co.
 Yours respectfully,
 BACON & HIGNEY.

THURSDAY, Jan 2, 1872.
 Messrs. Andrews & Co.—GENTS:—Having thor-
 oughly tested the utility of GATE'S BACK SUCTION
 PREVENTOR, we consider them one of the most
 useful inventions ever made for oil wells, and we
 think we are capable of judging of them, having
 three on our wells. We can now draw 1 King, and
 when they are replaced the wells produce the same
 as before drawing, thus showing that the Preventor
 effectually prevents all ingress of air.
 Yours, &c.,
 JOHN MYERS.
