**Another Valuable Inven-  
tion.**

**CATE'S BACK-SUCTION PREVENTOR FOR  
OIL WELLS,** patented August 15, 1871, which en-  
tirely prevents the ingress of air in oil wells, while  
the tubing is being drawn. It is a well known fact  
to all operators, that upon wells where Gas Pumps  
are used it is necessary to procure as nearly a per-  
fect vacuum as possible, and that no air should be  
let into the well, at any time, when it can possibly  
be avoided; consequently, whenever the tubing is  
drawn for a well it is the cause of great injury to  
it, as the stuffing box, being then necessarily open-  
ed, the air immediately rushes back between the  
tubing and casing, into the well going into the oil  
rock and gas veins, and consequently causing the  
oil and gas to rush back to a great distance. So  
much so, that it almost always takes several days  
a few pumping is required for a well to be brought  
back to its former condition, and oftentimes it takes  
several weeks; and quite frequently wells have been  
almost completely ruined by the air being thus let  
in while drawing tubing.  
The BACK-SUCTION PREVENTOR is attached to  
the stuffing box and works in such a way that it  
completely shuts up the space between the stuffing  
box and tubing so effectually that not a particle of  
air can get through at any time while the tubing is  
being drawn and replaced. It supplies a want long  
felt, and is, without question, one of the most val-  
uable inventions of the day, to those engaged in the  
oil business. No well should be without it, as it of-  
ten times saves ten times its cost by ones using.  
It is manufactured at the FOUNDRY AND  
MACHINE SHOP OF ANDREWS & CO., TIDI-  
CROU, PA., and for sale by Hardware Dealers.  
Tidicrou, Pa., March 28, 1872—Law 5m.

**CATE'S BACK SUCTION PRE-  
VENTOR.**  
Tidicrou, Feb. 3, 1872.  
Messrs. Andrews & Co.—Gentlemen:—Having  
used one of CATE'S BACK SUCTION PRE-  
VENTORS, I can confidently recommend the same to all  
who have occasion to use the same, as the best Pre-  
ventor of Back suction on Oil Wells. Our well was  
so small that it barely paid to run it. After put-  
ting on one of CATE'S BACK SUCTION PRE-  
VENTORS the production was increased to a good  
paying well. Before we put the Back suction Pre-  
ventor on the well, we had to pump the  
well two weeks before we could restore it to its for-  
mer production after drawing tubing. This is en-  
tirely obviated by the use of the Preventor.  
HART, PATENTERS & Co.

**Messrs. Andrews & Co.—Gentlemen:**—Having  
thoroughly tested the utility of CATE'S BACK SUCTION  
PREVENTOR, we consider them one of the most  
useful inventions ever made for oil wells, and we  
think you are capable of judging of them, having  
three on our wells. We can now draw a line, and  
when they are replaced the wells produce the same  
as before drawing, thus showing that the Preventor  
effectually prevents all ingress of air.  
Yours respectfully,  
BACON & BROWN.

**Messrs. Andrews & Co.—Gentlemen:**—This is to  
certify that I have used one of CATE'S BACK SUCTION  
PREVENTORS, on the Lee & Hill Road  
Lease, Economy Hill, and would not do without  
it at any price, as it will do all and more than it is  
recommended to do. I can cheerfully recom-  
mend it to all Oil Operators who have any Back Sug-  
tion Wells.  
Yours, &c.,
