GATES' BACK-SUCTION PREVENTOR FOR  
OIL WELLS, patent of August 15, 1871, which en-  
tirely prevents the ingress of air in oil wells, while  
the tubing is being drawn. It is a well known fact  
to all operators, that upon wells where Gas Traps  
are used it is necessary to pressure as nearly a per-  
fect vacuum as possible, and that no air should be  
let into the well, at any time, when it can possibly  
be avoided; consequently, whenever the tubing is  
drawn for in a well it is the cause of great injury to  
it, as the stuffing box, being then necessarily opened,  
the air immediately rushes back between the  
tubing and casing, into the well going into the oil  
rock and gas veins, and consequently causing the  
oil and gas to rush back to a great distance. So  
much so, that it almost always takes several days  
after pumping is resumed for a well to be brought  
back to its former condition, and oftentimes it takes  
several weeks; and quite frequently wells have been  
almost completely ruined by the air being thus let  
in while drawing tubing.

The BACK-SUCTION PREVENTOR is attached to  
the stuffing box and works in such a way that it  
completely shuts up the space between the stuffing  
box and tubing so effectively that not a particle of  
air can get through at any time while the tubing is  
being drawn and released. It supplies a want long  
felt, and is, without question, one of the most val-  
uable inventions of the day, to those engaged in the  
oil business. No well should be without it, as it of-  
ten saves ten times its cost by once using.

It is manufactured at the FOUNDRY AND  
MACHINE SHOP OF ANDREWS & CO., TIDI-  
OUTE, PA., and for sale by Hardware Dealers.  
Tidoute, Pa., March 25, 1872—law 3m.

GATES' BACK SUCTION PRE-  
VENTOR.

THURSDAY, Feb 3, 1872.  
Messrs. Andrews & Co.—GENTLEMEN—Having  
used one of GATES' BACK SUCTION PREVEN-  
TORS, I can confidently recommend the same to all  
who have occasion to use the same as the best Pre-  
ventor of Back Suction on Oil Wells. Our well was  
so small that it hardly paid to run it. After put-  
ting on one of GATES' BACK SUCTION PRE-  
VENTORS the production was increased to a good  
paying well. Before we put the Back Suction Pre-  
ventor on the well, we frequently had to pump the  
well two weeks before we could restore it to its for-  
mer production after drawing tubing. This is en-  
tirely obviated by the use of the Preventor.  
HAFT, PRINTERS & Co.

THURSDAY, Jan 31, 1872.  
Messrs. Andrews & Co.—GENTLEMEN—This is to  
certify that I have used one of GATES' BACK SUCTION  
PREVENTORS, on the Lee & Hill Island  
Lease, Economic Hill, and would not do without  
it at any price, as it will do all and more than it is  
recommended to do, and I can cheerfully recom-  
mend it to all Oil Operators who have any Back suc-  
tion Wells.  
Yours, &c.,
