Another Valuable Invention. CATES' BACK-SUCTION PREVENTOR FOR OIL WELLS, patented August 15, 1871, which entirely prevents the ingress of air in oil wells, while the tubing is being drawn.

The BACK-SUCTION PREVENTOR is attached to the stuffing box and works in such a way that it completely shuts up the space between the stuffing box and tubing so effectually that not a particle of air can get through at any time while the tubing is being drawn and replaced.

Messrs. Andrews & Co.—Having tested the utility of CATES' BACK-SUCTION PREVENTOR, we consider them one of the most useful inventions ever made for oil wells, and we think we are capable of judging of them, having three on our wells.
