The capital stock of the Producers Agency subscribed for in this district now reaches a fraction over \$93,000, of which amount Mr. Jas. S. McCray has \$75,000. The balance is probably divided among twenty different operators. At the meeting in Oil City, the Eleventh District was pledged to raise \$100,000. Now, we leave it to these producers in this district, of whom there are a large number, and who will derive equal benefits from the Agency, if it is justice for them to allow those twenty or twenty-five producers to shoulder the whole load. As the subscription books will positively be closed to-morrow, we hope these producers who have done nothing in the way of taking stock, will come out and show their hands between now and then. Do not let it be said that this district proved recreant in the good cause. Read the card of the Secretary and profit thereby.

OIL NEWS.—The Kepler & Worden well, on the Simms farm, Upper Bennehoff Run, is yielding 25 barrels per day. This well is one of the best in that vicinity.

A new well, located near the edge of this farm, will be completed this week. A good well is looked for.

Orr townsmen, Messrs. Moore, Bartlett, Hughes and Barker, recently completed a well on the Wm. Howe farm, same territory which at first was supposed to be a dry hole. Since then we learn it is making a fine show and will probably prove a good small well.

Messrs. Wood, Irwin and others, have a well nearly completed on the Pierce farm. A good oil strike is anticipated. The same parties also have two new rigs up on the same farm.

On the Curry farm, near the Octave Oil Company's territory, Mr. Edward Fox, of Titusville, has a new well nearly completed. A big well is anticipated.

The Iowa line barrens are using corn as fuel in their stoves successfully, and find it cheaper than wood.

The One Hundred Thousand and

Pledged by the Eleventh District is yet a few thousand short. Some twenty-five men (including two very manly boys) have subscribed \$93,000, are those all that are interested in this matter, or do the others expect to be carried up to Five Dollar Oil without helping to "kill the bears?" Would this be fair or honorable? No use to discuss the Agencies plan now, it is THE PLAN and the only one, and the record is being made up now, will you put your name upon the honorable side of the account by walking up to the committee and taking one or more shares of stock? That is the question and the time to answer it is limited to tomorrow evening when the books will be closed by the Producers Association District, and their report be made up to the mass meeting in Oil City Monday afternoon.

SECRETARY.

Dr. V. McAlpine, the well known Surgeon Dentist, has been absent in Michigan for some time past for the benefit of his health. His many friends will be pleased to learn he has fully recovered his health and will reopen his office at Rouseville, on Wednesday next.

ACCIDENTS.—Mr. Bennett, a resident of the Egbert farm, accidentally let a barrel of elder fall on his foot, mashing it badly, a few days since.

Hod. Root, also a resident of the Egbert farm, while engaged in moving an engine and boiler, one day this week, accidentally dropped a heavy sledge on his foot, crushing it so badly as to force him to adopt crutches as a walking device. He will be laid up for several days.

Yesterday in the United States District Court, David Torrens & Co., of New York, filed a petition against Albert Soebem, of Pithole, Venango county, asking that said respondent who is indebted to petitioners in the sum of \$1,000, be adjudicated a bankrupt. The usual order was made.—[Pittsburgh Mail.

There was a crowded house in attendance at the entertainment given by the Eric and Brennan Comedy Company, at the Opera House, last night. The programme is spoken very highly of by those present. Not having been present we cannot say as to the merits of the company.

The company give their last entertainment tonight, and all who delight in viewing the picturesque scenery of the land of Erin, and listening to the quaint sayings of its people, will be sure to attend.

The Forest Republican perpetrates the following fearful "Joax":

The pile dam, which was in process of construction, at Forge Island, in Tionesta creek was somewhat demoralized by being run into by a heavy raft during the late flood. It was a new dam previously, but now it looks dam-aged.

Few persons are aware how immense the lumber trade of the United States really is, and how rapidly increasing. Not only is this the case in the Atlantic States and in the North, but even on the Pacific coast the demand, both for home consumption and for export, is very great. From Puget Sound alone the shipments of fir were, in the year 1869, nearly 137,000,000 feet, and this will be 238,000,000. The timber goes almost over the world.

An ingenious improvement in the construction of cotton gins consists in the application of an air exhaust, which facilitates the feeding of the cotton to the rollers, and an air draught for removing the cotton from the rollers, which it does most effectively thus dispensing with the use of brushes or other devices for that purpose.

The steamers for the Florida coast and the West Indies are beginning to go out well filled with those of our people whose health cannot buffet with the rigor of our northern winter, and who annually find refuge in the softer climate and more congenial skies of the tropical verge. Cuba, also, is threatened with an inundation of American tourists.

Denmark has been indulging in an exhibition and has met with considerable success.—Norwegian and Swedish are well represented. The largest proportional number of awards were carried off by Swedes.

The horse disease, thanks to the ingenuity of journalists, already has some high sounding names, as follows: Epizootic, Hippomalaria, Epiphippic, Hippozymosis, Febrequobronchialis, Hoppogrip, Epizooty, Hippizooty, and Hippaic.

The Fairview Reporter is the name of a new paper published at Fairview, Butler county, by Young & Oriswell. The Reporter is a live sheet judging from the one or two copies we have received. We wish the proprietors good luck in their enterprise.

The following oil news we take from the Petersburg Progress;

The Cramer well, D. Shoup farm, is doing 75 barrels.

The Broad top well on Turkey run, has been in embryo for six months and it appears possible that it may continue.

The Smith well on Little Turkey struck a vein at a depth of—feet. It is clear and beautiful and fully equal to the Franklin oil. It is but a short distance above the brimstone well, and is probably on the same belt as the amber oil well of Lithgow & Dougherty, on the opposite side of the hill on Big Turkey.

The Chantant & Graff well, nearly opposite the Progress office, is down. She is—feet deep, and promises to be a paying well, probably twenty barrels.

The Spencer well on Turkey run, is down about 500 feet. It is on the Weller farm.

The Faith well, on Turkey run, is doing fully 40 barrels. Allen, Hartley & Co.

The Loane and Harms well, on the D. Shoup, Sr., farm, it is claimed is doing 50 barrels.

The Race well, Race Brothers owners, on the E. Klitz, Sr., farm, is doing 20 barrels.

The engine house at the Chambers well No. 1, on the Ashbaugh farm, was destroyed by fire the Sabbath evening. It appears that while the pumper was attending to something about the engine, he accidentally overturned a derrick lamp, the contents of which spread over the floor, and despite his desperate efforts set fire to the centre structure, which in a short time was burned to the ground. Happily the derrick remains unharmed, but the engine and boiler will prove an almost total loss.

A well was struck on the Matthew Banks farm, last Saturday afternoon, that in all probabilities may prove the largest in the oil regions. It is located about one mile from Fairview, and a half mile from Karns City. When the sand was struck, at 1550 feet a heavy volume of oil came pouring forth and continued to flow until the earth was completely covered for several rods around. Holes were dug and trenches out to save all the oil possible, but a large quantity ran to waste. The tools are still in the well and the drilling will be continued until through the sand. Our reporter was on the ground Tuesday morning. Connections were made to the tanks and about 400 barrels of oil had been saved. The well is owned by Matthew Banks and Robert Galey.—[Fairview Reporter.

One of our earliest reading lessons commenced by saying, "The horse is a noble animal and very useful to man." If there were any doubts about the facts thus asserted, they have now been entirely dispelled. The sudden withdrawal of the "noble animal" from the streets has given unpleasantly convincing proof of its usefulness to man.

The territorial limits of the horse disease are steadily extending. The disease has reached South Carolina in its southward march, is in Maine on its way eastward, and Chicago revels in it, claiming, of course, to have it worse than any other place. It is reported abating in New York city and some other eastern points. There is danger that the great inconvenience and actual distress resulting from the absence of horses will cause owners to bring out the animals before fully recovered, with the danger of a relapse and serious consequences.

Several weeks ago Stephen Stockley ran a race at the Driving Park at Parker's Landing, displaying great powers of endurance, but on Saturday last he performed the feat of running six miles in forty-two minutes, and all for \$50.

The Green well, on Sage Run, near Oil City, was torpedoes Wednesday evening, and the production from the start has been fully two hundred barrels per day. Leases are being rapidly taken up thereabouts.

A boiler explosion occurred on the Rial farm, Bully Hill, a day or two since at one of the wells owned by Prentice, Crawford & Co. Outside of demolishing the engine house and derrick, no damage was done. Low water is said to have been the cause.

Two of the Titusville banks have subscribed \$45,000 to the stock of the Producers Agency. Good for them.

WHAT NEXT.—The November number of this brilliant little juvenile Magazine is crowded with a choice variety that will delight and benefit the boys and girls. The publisher now gives a beautiful \$1.00 Prang Chromo to each subscriber at 30 a year, and the remainder of this year free to subscribers for 1873. If you would like a specimen copy send a 3 cent stamp to John B. Alden, Publisher, Chicago, Ill.

We would call attention to the advertisement of "Wanted," in another column.—Agents are wanted to sell a popular book known as the "Great Industries of the United States." Address J. B. Burr & Hyde, Publishers, Hartford, Conn.

We copy the following items from the Venango Spectator.

There is no end to the enterprise of Chicago. There is no known limit to the things that are possible with its tradesmen. For instance, West Virginia oil of 28 degrees gravity is quoted by producers at thirty-seven cents at Petroleum Station in West Virginia, and yet we have before us a handsomely printed circular, from an oil house in Chicago, offering this very oil in that city at thirty-five cents per gallon.—To buy oil in West Virginia at thirty-five cents, transport it hundreds of miles, bundle it from depot to warehouse, pay for insurance, leakage, and all the et ceteras of business expense, and then sell at the same price, requires a business shrewdness which the merchants of few cities can boast.

The legislature of Pennsylvania passed an act last winter prescribing that once every three years the citizens of the various counties of the state should vote upon the question of license or no license. If upon counting the votes the majority of them in any county should be in favor of no license, then it shall not be lawful for the court of said county to grant any license for the sale of any spirituous and intoxicating liquor during those three years. The first vote upon the question is to be taken at the spring election, the third Friday of March, 1873.

Gen. H. S. Huidekoper, commanding the Twentieth Division, has ordered a general Court Martial to meet at Meadville on the 15th of November. The detail for the Court is: Captains D. W. C. James, C. W. Lytle, J. E. Rupert and W. C. Howe, and Lieutenants R. B. McKee, R. E. Van Natta and H. C. Clark. Judge Advocate, Capt. Geo. R. Snowden.

The County Commissioners have appointed O. E. David, late of the Crawford County Poor House, Superintendent of the Poor House and farm of this County, at a salary of \$1200 yearly. In a few weeks the Poor House will be ready for use.

The arrival of the Oil City pipe line is looked for with considerable interest as the position taken by the Mutual has created a demand for other means of transporting oil to the railroads. The Cleveland and Franklin pipes are being awaited with some anxiety also, more especially by those interested in the Antwerp and Mutual. The fact that there will soon be five lines instead of two, must of necessity have a tendency to affect the business of all, and the competition thus induced will, we hope, effect a decided improvement in the running of oil from the wells, which at times are compelled to shut down, simply because the pipe companies could not, or would not, run their oil.

All this annoyance appears to be drawing to a close, since it is natural to suppose that the greater the competition the less difficult will it be to move the very heavy production of this district. This we hope will have the effect of compelling the different lines to look well to their interests, though we have no idea that the pioneers of the district, the Antwerp and Mutual will be superseded, on the contrary, if they stand by the producers they will be patronized if not, not. Let them both commence anew, and work upon the other side of the question next time, for the producers have shown themselves to be a power in the land.—[St Petersburg Progress.

DRY HOLE ON THE McClymonds FARM.—The Lincoln well, on the McClymonds farm was finished Saturday afternoon, and proved a dry hole. This well is located only a few rods from the Cooper Bros. well, which is pumping 100 barrels a day, and everyone was expecting something handsome from it. But the last center bit ran through the sand and brought no oil, to the disappointment and amazement of more than the owners.—This unexpected result has had the effect of checking operations upon the run, one well having already stopped at 500 feet. The rig will be removed to another locality.—Another well, finished still further up the stream, is pumping but two barrels, which demonstrates pretty clearly that the 100 barrel well is on one edge of the belt, and that it continues toward Karns City. The owners of drilling wells in that direction are in good spirits over their prospects.—[Fairview Reporter.

On Thursday last a little girl of Thomas Rosler, of Meadville, aged about three years, fell into a tub of hot water which her mother was using for washing purposes, and was so fearfully scalded that it died in a few days.

The spread of small-pox through Kentucky during the last two weeks is alarming. The local papers of nearly every town in the central part of the State give lists of new cases.

Dr. Thayer had a benefit at the Parker's Landing Opera House last Saturday night. One of the attractions of the occasion was the "Shoo-fly dance" by Dr. Thayer and W. Kip.

Local Notices.

GIRL WANTED

At the Petroleum Exchange Hotel to do dining room work. Also a good cook wanted. Study employment furnished and highest wages paid.

For Sale
15,000 to 20,000 feet of SECOND-HAND TUBING, at from 25 to 35 cts. per foot. The Tubing is in first class order and all ready fitted.

Want to Sell a Piece of Furniture,
Want to Buy a Second-hand Carriage,
Want to Sell Tubing, Casing, Gas Pipe,
Want to Find an owner for anything Found, advertise in the Record, as no less than ten thousand people read it weekly.

Butter and cheese are almost indispensable articles of food. Properly used, they are nutritious and healthy; but an inordinate use of either causes indigestion and dyspepsia. Owen Gaffney's Sunday Comfort, judiciously used will remove both of these troubles.

ARRIVAL AND DEPARTURE OF TRAINS ON O. C. & A. R. R.

On and after Sunday, Nov. 24, 1873, trains will run as follows:

NORTH		NO. 5.		NO. 3.		NO. 1.	
Leave Irvine.		11.58 A. M.	5.30 P. M.				
Leave Oil City	6.00 A. M.	3.30 P. M.	7.50 P. M.
