The Hindoos are said to have no word for a "friend." The Hallans have no equivaent for our "humagity." The Russian dier tionary gives a word, the deficition of which is "not to have enough buttons on your footman's waistcoat;" a second means "to kill over again;" a third, "to earn by dancing;" while the word "knout," which we have all learned to consider as of excluproves upon investigation to be their word "haut," and to mean only a "whip of any kind." The Germans call a thimble a "finger bat," (which it certainly is, 7 and a balf an bour. and the little woman made no grasshopper a "bay horse." A glove with them is a "hand shoe," showing evidently that they wore shoes before gloves. Poultry is feather cattle, whilet the names for the well known substances, oxygen and hydrogen are, in their language sour stuff and water stuff. The French, strange to esy, have no verb to stand, nor can a Frenchman speak of kicking any one. The nearest approach he, in his politeness, makes to it is, to threaten to give a blow with his foot; the same thing probably to the recipient, in either case, but it seems to want the directness, the energy of our kick. Neither has he any word for baby, nor home, nor comfort. The terms up stairs and down stairs are also unknown in French. In English we cure meat and cure sick people, and we like our girls to be quick, but never wish to see them fast.

The Odd Fellows pic nic, at Oli Creek Lake, on Tuesday next, promises to be a very pleasant affair. The ground chosen is very picturesque and located on the most pleasant spot that could be found. Row bouts can be had by those who take please ure in sailing on the lake. Fishing tackle can also be procured. The Columbia Cornet Band will be in attendance, and in fact the committee have spared no pains to make this the pleasantest affair of the sea/ son. The committee Jesire us to state that all intend participating in the p'c nic are requested to procure tickets before tomorrow evening, in order that the committee may know how many cars to engage. Tick/

ets can be procured by applying to any of the members. The storm yesterday afternoon created considerable havoc among the oil well derr ricks in this vicinity. On the Columbia

farm eighteen were blown down. The derrick on isase No. 6. Daizell farm. was blown down. An old laudmark, the derrick on lease 9.

Central Petroleum farm, which bad withstood the winds and storms of ten years nearly, finally succumbed and went down before yesterday's gale.

Several other derricks were blown down on different farms in the vicinity, and the damage is quite heavy.

NEW WELL -- Phillips Bros., of this place struck a new well on the James Rooker tarm, Pithole, on Tuesday last, which is yielding a good 35 barrels daily. The new well is 920 feet deep, and had 20 feet of excellent sand rock. Our townsmen, Messre. Forrest and Hardman, each own an eighth in this well. We are pleased to

learn af the'r good luck. The Phillips Bros. are about to put a new weil down on the McCalmont farm, adjoin/ ing the Rooker farm, and already have the material od the ground for a new rig. Pit/ bole is not dead yet.

The Memphis Avalanche remarks on the "Betsey" imbroglio: "It is enought for us to know that 'Betsey and I Are Out,' and so far as these columns are concerned, we propose that they shall stay out."

The Rhode Island strikes cost the strikers \$150,000, besides a good deal of anxiety.

THE WATERS CONCERTO PARLOR OR-GAN .--- We are glad to tebropicle any new thing, or any improvement upon an old one, that tends to popularize music by readering its study either easier or more atipactive. Lately our attention has been called to a new patented stop added to the Waters reed organ, called the concerto stop. It is volced as to have a tone like a full, rich alto voice; it is especially buman in its tone. It is powerful as well as sweet; and when we beard it we were in doubt whether we liked it best in solo or with full organ. We segard this as a valuable addition to the reed organ, and advise those intending to purchase such an instrument to examine the concerto. Warerooms, 481 Brosdway. [Rural New Yorker.

cottage in Pittsfield, Mass., where he lound bright lool ing little woman sewing by the window. So he began to-descant voinbiy on the merits of the book which he be had for sale. This be kept up for a answer, he concluded that he had found a customer. He bauded her the pen which he had ready for her to make her subscription; whereupon, instead of putting her autograph on the list, she wrote upon a scrap of paper from her work-box. "Ime defe and dum." It was too much for the disappointed man, and he evacuated the cottage without saying another word.

In Dodge City, on the Atchison and Santa Fe Railroad, musbroom Western town, where law is but slightly observed, an interminable talker was "yarning" in a saloon to a number of the rough idlers of the place, strangers to bim. The more logus. cious the fellow became, the more weary his listeners. Finally, not desirous evidently of meeting the end of the man who was talk ed to death, the listeners filled the wide open pockets of the stranger's sack cost with powder, which, at a propitious moment, they touched off, at the some instant (discharged a couple of revolvers around his head .---The stranger took the hint at once, stopped talking, and placed distance between himself and Dodge City immediately.

Canada has enjoyed the sensation of first class whirlwind. It occurred in Lanark county,on Friday last, and swept from one side of the country to the other, partially returning in the form of a sircle. From about an eighth to a quarter of a mile wide its course was marked by destroyed bouses and fences, and over-turned tress. The debris was scattered north and south. A pitch black cloud gyrated in the centre of the track and heavy rain followed. Fortunately no lives were lost.

An intelligent borse stopped suddenly in the road in New Paliz. a frw nights ago, while being driven rapidly, and his driver found, upon investigation, a young girl only fourteen years of age was lying across the road, in tropt of the borse, in a state of entirely beipless intoxication.

The Intest libel suit is that of Gen. Daniel Pratt, "the great American traveler and students' perpetual candidate for the United States, "against the Rev. Henry Ward Beecher, for publishing in the Christian Union an article from the Yale Courant, which was itself a partial forgery, accompanied by comments "abusively styling Mr

Pratt the rival of George Francis Train."-The damages are set at \$100,000, though it is intimated that one nights use of Plym. u h Church for the delivery of a lecture, with a dollar admission fee, may be accepted as a compromise.

THE POTATO BUG .- This pest of the potato crop has arrived in Petroleum Centre, and is making and havoc among the putato vinces and other vegetables. The bug is not in the least partial, and would as soon take a good meal off from a bead of cabbage or a tomato as a potato. These bugs are known in the books as the Colorado beetles. Their ravages have hitberto been confined to the Western States. The prac. tice there, to get rid of them is to scrape them into a vessel containing bot water or into an empty vessel and then burn them. Care should be taken to prevent inhaling the fumes of the burning bugs, and it is saler to keep the hands clear from them.-These bugs are about the size of a grain of corn, and are ornamented on the back with yellow stripes.

A telegraph dispatch from Pittsburgh an/ nounced some days since that the secret for manufacture of Russia sheet iron has been discovered.

That secret was discovered some time riuce. It was put in practice in this city. Not much iron was made; just enough to show it could be done, and then the enter/ prise was abandoned. It was rather an expensive experiment to certain Cleveland mon, but we suppose the experience gained was ample remuneration. At all events experience was all the dividends the stockholders in the patent experienced, and we presume ?tbe "secret" can be purchased for a mail sum of money .- [Cleveland Herald

A Newspaper letter from the Isles of Shouls, speaks of the island called Appledore as once known as Hog Island; the name being changed, when it came to be a summer report, in order to svoid the porcine suggestions of the name, and because it was supposed the breezes of the sea across Hog laland would not be sweet, while the name was neither romantic nor suggestive of luxury or comfort. In sight of Appledore-tate Hog- island are the great Boar's Head and the little Boar's Head on the main shore, two as beautiful spots as the Atlantic coast can boast. And we do not knew that the name detracts from either --In truth boar's bead was the dish of honor at the ancient feast, therefore it is appetizing, and if any animal is the perfect illner tration of self-satisfaction the well condi-tioned bog is that animal.
