ON BOARD COSMONGLITAN, L'OBPITAL SHIP, IN TRANSIT. BROM JACKSONVILLE, FLA., TO HILFON HEAN, S. U., Feb. 22, 1864.—On Thursday, Feb. 18, Gen. Seymonr and his staff left Jacksonville, and reached Baldwin, 22 miles distant the same evening. Here he had established an important depoi of supplies for the army he was leading into the field. At this points the two railroads of Florida cross each other. Cars had been placed on the track; and a locometive was in a forward state of reconstruction for service on the road from Jacksonville. "Large amounts of food. ordnance and clothing had been hanled up to Baldwin by horse-power. Here, too, the thrice-blessed San-iary Commission had a size of comforts and necessaries for wounded men. It was a place of no natural strength. Important only as the junc-tion of the railroads, it had been seized and rudely fortified. Slight chevaux de frize of fir-branches had been made, and r. few block houses and ride-pits were hastily prepared.
From Baidwin, on the morning of the 19th Feb. ; the General and his staff moved forward to Barber's Station, 12 miles forther, near the rail-road. Here were encamped the brigad- com-manded by Colonels Barton, Hawley and Mont-somery. In the immediate neighborhood also, were the 40th Massachusetis Mounted Infantry, Col. Henry; the Independent Battalion of Massa-chusetts Cavality, under Major Stavens, and the artillery, consisting of Captain Hamilton's, USP, Langdon's and Captain Elder's Batteries, as well as a section of the 3d Rhode Island Artillery. THE ALABAMA. BOMBAY, Jan. 29, per Bremen.—The pirate steamer Alabama is off the west coast of India. She has burned the ship Emma of New York. [This is probably the ship Emma Jane, which was reported at Bombay, Dec. 26th.]

BOSTON, Feb. 1.-The following is an extract from a letter written by an American shipmaster, dated Singapore, Jan. 3: The Alabama came here last week, coaled and steamed into Malacca Straits. I think she will go round Sumatra into Sunda Straits, again up the China Sea and over to the California coast. She has 111 men on board, but all are discontented. There were many deserters here, notwithstanding the watch of the officers with loaded reolvers.

There are about six Southern men on board and the carpenter is a Massachusetts man. She has completely stopped American commerce in the East. Our vessels are lying up in all the ports. Some are being sold at moderate prices. The ship destroyed may be the Esmeralda,

The position chosen by the rebels for our troops to occupy, and, which, they did occupy during the temporary exigencies of the occasion, was be-tween two swamps: that one in our front pre-vanted a charge upon the rebels' front—that one behind was to impede our retreat. The railroad ccuid culy be reached by going up to the waist in water or by an immense detour. To fall away from the railroad was to cat ourselves offfrom our reserves; which were coming up on the left of the track, and to endanger the safety of our train, which, alico, was near the reserve. Nothing, could have been better planned or more civilly acquiesced in than was thus whole scene. Gen. Seymour accepted the issue just at it stood, pushed his guns into position upon low ground about So yards from the nearest rebel battery; and esw his gunners and their horses shot down with un-matched equanimity. Dissatisfaction and want of confidence had been created in the regiment by cepriving it of the "Spencer Repeating Rife." and the issue, instead, of the Springfield muskets, in bad condition; some lacking locks, others rusted, or wanting screws, proper springs, or otherwise useless. Unable to protect themselves with these curious weapons, ene wing of the regi-ment gave way, and could not be rallied. The other wing, which had retained the "Spencer" brm, remained antil they had expended their ammonition, and their officers could supply no more. Then they withdraw to the rar, and the Sth (colored) U. S. V., commanded by Colonel Fribley, was pushed forward to staad the brunt of the enemy's fire. In twenty minutes 350 men, including the Colonel (killed), were stricken down by the storm of bul-lets. They were withdrawn, and the left did not again offer any vigorous resistance to the enamy. Meanwhile, on the right and centre, persistent efforts were made to crush in our lines. The enemy's sharpshooters on the opposite side of the railroad, in the tree tops of the ong grass, poured in buildts upon the bieding fugitives; and succeeded in making it necessary to remove the wounded eight miles away to Snderson. The centre stood firmly until desired to fall back in order to give the batteries a better and more ele-vated position. Captain Hamilton, with Battery M, 3d U. S. Artillery, lost two Parrott guns by the death of his men and horses, after fighting con-tinuously for an hour and a halt. Captain Lang-den; of the 1st U. S. Artillery, lost three brass Napoleon guns in the same way. First Lieutenant E. Eddy, of the 3d U. S. Artillery, received a wound in his leg, and First Lieutenant T. McGrue, of Battery M, let U. S. Despersie assaults on the Union right failed to drive in the b ave 115th New York, holding the extremity of the line. Colonel S. Sammis was wounded in the foot, Major Walrath's shoulder-strap was cut away by a bullet. As an instance of what the 115th endured, Company F may be cited. Out of fifty-nine men brought into the fight, three were killed and twenty-nike wounded. But the details of the slaughter must be looked for among the lists hereafter to be torwarded. Only fragmentary reports are now accessible. On board this ship are 346 brave fellows wounded. About 560 others are left at Jackson ville in the care of the medical staff. Henry Ward Beecher, delivered in that noble building, was attended by an andi-ence at once large and intelligent. Every availa-ble seat appeared occupied, and hundreds patiently stod in the atsless of the parquet circle, listening with a silence that showed the intense interest and attention of the audience, broken only by the hearly rounds of applause with which his more Jointed remarks were received. The subject of his discourse was "America's Message to Great Bri-tain." We have previously published in the BULLETIN Mr. Becher's stirring remarks on this subject. The lecture of his tevening was in a strain somewhat similar to that already laid before our readers. We need only add that the discourse of last evening was one of the most thrilling ever de-livered by Mr. Beecher, and that it is calculated io do great good, particularly in Europe, at this crist.
