AWRENCE'S METALLIC BROWN PAINT

-88 PER CENT METALLIC BASE.

The Metallic base of this Paint is composed of the Protoxide and Peroxide of Iron. Its properties are such as to give it superiority over all others in the market for the purpose for which it is recommended. commended. It has been proved by thorough exposure, and by comparison with other paints, to be the only re-liable Paint to resist the action of salt water and salt atmosphere.

It is therefore especially recommended for ship bottoms, hulls, decks, boiler fronts, smoke stacks and steam pipes. For iron railings, fences, cars, railroad and other bridges, it is not excelled.

railroad and other bridges, it is not excelled.

It is especially adapted for METAL ROOFS.

It is not affected by acids or gases, and is a perfect protector against rust on metals, and from dampness on brick walls.

It mixes and blends readily with other paints, and by comparison to the amount of surface a given weight will cover, costs about one-half as much as other Metallic Paints.

Wherever this Paint has been used, it has given ENTIER SATISFACTION, which is, we believe, more than can be said of any other paint in the market.
