There has been lately in several papers appeals in tehalf of a plan for establishing in Philadelphia a Home for Soldiers' children. who are left in circumstances of want by the death or prolonged absence of their fathers. Undoubtedly the project will meet with the favor which it deserves, and which any plan receives, having for its object help or comfort to the brave soldiers of our army. There certainly should be no difficulty in providing for the children of the men who have left their families and firesides that we may be protected in the peaceful enjoyment of our own comfortable homes. But the object of this article is to draw attention to the fact that there is a ready in this city an institution which partly provides for one class of soldiers' children. It is not limited to them, but includes them among others. The Industrial Home for Girls is the one to which reference is made. Already it has from time to time afforded protection to several daughters of soldiers, and about twelve more could now be at once received. The institution has existed a little over six years, and has in that time acquired experience and maturity of organization, giving it an advantage over one newly established. It is not an asylum in the usual acceptation of the word, but is intended to be truly a home for any girls between the ages of twelve and eighteen, who need care, protection, and friends. These wants the managers try to supply to every girl who comes to them. About 175 girls have been sheltered by this Home for a longer or shorter time since it was opened. They are placed in families, as soon as they are fitted to go out, and great care is taken in selecting these homes for them. Nor does the watchful interest of the managers cease when the girls have left the institution, but it follows them as far as possible into their after life. And they would fain hope that in the blessed world above there may be those who will bless God that they ever entered the doors of this Home.

Without wishing, then, to interfere at all with the proposed provision for soldiers' children, we desire to say that the Industrial Home for Girls will receive a limited number of daughters of soldiers within the ages above specified, will clothe them, teach them, and care for them. They will do this, with an earnest and loyal endeavor, even by this humble means, to aid in bearing their beloved country through the storms and dangers with which she now contends.

This Home is situated at the southwest corner of Broad street and Columbia avenue, and is easily reached by the Thirteenth and Fifteenth street cars. Its board of trustees and managers comprises names well-known in this community, and in themselves sufficient security for the faithful discharge of the trust committed to them.

HOW WOMEN CAN HELP THE COUNTRY. To the Editor of the Evening Bulletin :-The loyal papers of this city have wisely suggested that one of the most practical and efficient modes of assisting the cause of our country at this juncture is to diminish, as far as possible, the importation of articles of luxury, especially of dress, which is draining the

country of its gold, so sorely needed at home. In this good work, the women of our land have their share of a duty to perform, by disusing with, as far as practicable, the use of all such articles, during the continuance of the war.

In yielding up their dear ones to the hardships and perils of the camp and battle field; in their devotion of time and labor to the sick and wounded soldiers, and their families; and in the many ways that our women have shown a readiness to contribute their share of the common sacrifice to our country's good, they have proved their patriotism and true loyalty; and only need the suggestion of a practical mode by which a systematic and earnest effort may be made towards a reformation

in the present extravagance in dress. Now is the time for the first step in this great work, when so many ladies of the first social position in our city will be on duty at the "Great Central Fair," where the least conspicuous dress will be in the hest taste public an occasion; therefore, would suggest, that a simple dress of American lawn, chintz, or any other fabric of domestic manufacture, would be the most patriotic pussuitable uniform for such an occasion and, with a little display of taste, may be made as becoming as more expensive materials. If the Chairman of each committee of ladies would take the vote of their number on this question there would, doubtless, be very many who would willingly make this slight sacrifice of mere taste, in consideration of the immense advantage to our country that would result from this first step, if followed up by a public meeting of ladies favorable to the measure (perhaps at "The Union League House if the gentlemen of that patriotic association would loan it for the purpose), or, by a printed form of agreement or pledge to carry out this idea, as far as practicable, during the continuance of the war, to be circulated, signed, and returned to a Central Committee; and if generally adopted by this class, it would soon be followed by the masses, the result of which would be of incalculable benefit to our country, and enable the ladies of Philadelphia to set an example to their fellow-countrywomen worthy of imitation. Our grandmothers adopted this patriotic plan, with good results to our country, and surely, the women of this generation are not less will ing to serve their country, in this the greatest trial to which it has been subjected.

The United States Christian Commission has seized the present golden opportunity of rest for the Army to extend its work for the good of the Soldiers Soldiers
STATIONS have been multiplied, each with its chapel and store tents, free writing tables, and clothing, comforts and reading matter for gra-

clothing, comforts and reading matter for gratuitous distribution.
VOLUNTARY DELEGATES, in numbers greater than ever before, have been sent to preach the Gospel at the stations and in regiments, batteries and camps without Chaplains, distribute reading matter and stores, and labor for the good teries and camps without Chaplains, distribute rending matter and stores, and labor for the good of the Soldiers.

A PERMANENT FIELD AGENCY has been sufficiently extended to establish stations and superintend the work.

THE BLESSING OF GOD rests signally on all parts of the work. Many thousands have been cheered, benefited and saved. Still a large part of the Army remains unreached, and double the number, both of stations and dolegates, are needed to meet the urgent demand tor them.

The Christian Commission offers to the people a perfectly reliable and wonderfully economical channel to reach the entire army in all its various fields. The money given goes in full measure, in benefits for body and soul, directly to the Soldiers; and stores also, immediately from the hands of delegates from home, who add words and deeds of kir dness to the gifts when bestowed.

Let the people give the Money and Stores, and the work will be done.

The large corps of Delegates now in the field will serve as a grand corps of relief when the armies shall move and battles be fought, and the greater their number the more prompt and effective will be the relief they shall render.

Let not the present work languish. Watt not for the cry of the wounded and dying before providing relief.

Send now and send abundantly both money and stores, and the soldiers' blessing shall be upon you.

ELECTRICITY

LOOK AND LIVE! A WORD TO THE WISE IS SUFFICIENT!

All diseased conditions, both acute and chronic, where there is virality enough left to react, are permanently oured, by warrantee, at 1220 Walnut street, Philadelphia, and in case of a fullure inmost obstinate maladies, no charge is made. Electrical Institution, established about five years ago by Professor Boiles. Read the following:

A class of maladies prevails to a fearful extent in communities, dooming 100,000 youths, of both sexes, annually to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are nervous debility, relivation, and great exhaustion, marasmus, or wasting and consumption of the tissues of the whole body, shortness of breathing, or too hurried breathing on ascending a hill or flight of stairs, pulpitation of the heart, asthma, bronchitis, and a day, sore throat, trembling and shaking of the arms and lower limbs, aversion to society, business, and to study: sometimes dimness of the eyesight, loss of memory, dizziness of a dry, sore throat, trembling and shaking of the arms and lower limbs, aversion to society, business, and to study: sometimes dimness of the eyesight, loss of memory, dizziness of the head, neuralgia, pain in various parts of the body, pains in the back and lower limbs, lumbago, dyspepsia, !constipation of the bowels, deranged secretions of the kidneys, and many other glands of the body, producing virulent diseases in both males and females, likewise epilepsy, hysteria, and different forms of nervous spasms. Now, then, nimety-nine cases out of every hundred of all the above named diseases, and a host of others not named, as consumption of the lungs or of the spinal nerves, have their origin in the peivic viscera, hence the want of success by any of the old medical systems of practice.

All the above named maladies are treated and cured by Professor Bolles, at 1220 Walnut street.

DISEASES OF FEMALES.

Prolapsus Uterl, Leticorrhea, Amenorrhea, Dysmenorrhea. All the above diseases and other Uterine complaints have their origin in a loss of the vital power of the body, brought on by injuries, excesses, sedentary habits, personal abuses, abortions, and the use of powerful medicines. Some of the peculiar symptoms are dragging pains through the hips and back, weakness of the limbs, and extreme languor and debility throughout the entire system. The effects produced from these troublesome maladies are almost multitudinous. Consumption, Dyspepsia, Neuralgia, Paralysis, Deafness, Blindness, Fits, Insanity and even Idound for these alarming complaints till our late

Idiocy are not uncommon.

No effectual or reliable remedy has ever been found for these alarming complaints till our late discovery in the use of Electricity in strict accordance with the positive and negative polar action of the Uterine Organs. We never failed in curing all of the above diseases, except in case of organic darangements, or severe injuries of the parts.
