LATER AND IMPORTANT EUROPEAN NEWS. NEW YORK, Dec. 27.—The steamship City of Washington, from Liverpool on the 13th inst., via Queenstown on the 14th, arrived at this port this afternoon.

The steamers Moravian and City of London arrived out on the 12th. It is rumored that the Governor of Richmond, Bridewell, has absconded.

It is reported that France has given England six months' notice to terminate the extradition treaty, because of the strict for-mality required before the French offenders

are given up.

The Emperor of Austria arrived at Pesth, Hungary, on the 12th, and was received with much ceremony and enthusiasm. In response to a speech of the Burgomaster, he said he visited them full of confidence, and expected full confidence in return.

At the sitting of the Court for the trial of the Fenians, on the 12th, the entire day was occupied by O'Donovan, in his address to the jury, in his own defence. He commenced at the opening of the Court, and did not desist until about six o'clock in the expansion. evening. There was nothing remarkable in his address, a large portion of it being the reading of editorial articles from the Irish People newspaper. He insisted that he had done nothing criminal, asserted that his case had outraged all law, and gave it as his opinion that Ireland would never be free without fighting. His bearing was insolent, and when he remarked upon the Court his language was offensive and saucy.

The draft commission for the appointment of Sir Henry Storks, to Jamaica, is published in the London Gazette. It recites that great disaffection is alleged to have prevailed in Jamaica, that grievous disturbances had broken out, and that excessive and unlawful severity had been used in their suppression, and whereas it being urgent that full and impartial inquiry should be made into the origin, nature, and circumstances of the said disturbances; and the measures adopted for their suppression, the powers now vested in Governor Eyre are revoked on the ground that it may be advisable that he should be present during the inquiry, but for the sufficiency of the said inquiry, the powers of Governor should be vested in some other person, and Sir H. Storks is accordingly temporarily appointed Governor of Jamaica.

The Times says: "Sir H. Storks, who sails for Jamaica on Monday next, will immediately upon his arrival assume the whole Government of Jamaica, and Mr. Eyre will be in the position of a Governor on leave. He will be superseded, but not displaced by Sir H. Storks, who, in fact, does not cease to be Governor of Malta, and whose administration of Jamaica will be essentially provisional. Again, and again, Sir H. Storks has been called on to solve some difficulty which was not of his own creation. A great part of his life has been spent in special ser To Governor Eyre, himself, such an appointment is the least unfair or humiliating that could have been made, while it ought to be satisfastory even to his ac-

The Morning Post thinks Eyre's suspension may have a bad effect on the negroes.

Public meetings continued to be held in various places upon the Jamaica question, but the action of the Government rendered them of little importance.

SPAIN AND PORTUGAL

The Iberian Progressista party having made preparations for a great demonstration in favor of the King and Queen of Portugal, upon the occasion of their Ma-jesties projected visit to Madrid, the Spanish Government communicated the fact to the Portuguese Minister in Madrid, who immediately left for Paris to inform his Sovereign at it is probable that their Majes-

PROSPECTUS OF THE

CARSON GOLD MINING COMPANY

NORTH CAROLINA.

The Land of this Company consists of 120 ACRES in Mecklenberg county, North Carolina 3: miles from the town of Charlotte, on a branch of Sugar Creek hich stream furnishes gook water power for grinding the ores. This Mine was first opened in 1838 by a man named Carson, who worked it successfully for a num-ber of years. He died in the town of Charlotte, in 1846, worth over half a million dollars. Two shafts have been sunk on this property, one of them 80 feet, the other 60 feet, on different velns averaging from two to three feet in thickness, which

veins still continue on down increasing in width and richness. These shafts are in good order, and ore can epreadily takenout at any time. Other veins havebeen discovered on this property, and tested and proved to be very rich in gold. The ores of this mine are known as the brown ore, and very rich, yielding readily \$10 per bushel. This is believed to be one of the best and nost certain mines in the State, on account of the abundance and quality of the ore, and ease in which it is obtained and reduced. This property has been worked by Major Z. A. Grier from 1840 to the breaking out of the war. This Company have purchased this property, and intend to erectmachinery and put the mines in immediate operation. The many advantages of this mine over the mines of Colorado and Neva can hardly be estimated. It is more readily reached, and has abundance of fuel, with cheap labor. It can be worked all the year, and not, as in the case of Colrado and Nevada, be compelled to lie idle for three or four months in consequence of the severity of the

This mine having been worked for a long time, have to incur the risk there is in an undeveloped pro perty, but can count on large and immediate return on the investments. Having an ore that readily yields 10 per bushel, some estimate can be made of the value of this property. With the present imperfe system of mining in this locality, and absence of proper machinery, ten tons of this ore can be taken ou daily from every shaft opened. Estimating, say bushels to the ton, the daily yield will be \$1,500 from one shaft, allowing \$300 per day for expenses. The net product will be \$1,200 per day; counting 800 working days to the year, the yearly proceeds will be \$380,000, which yield can be largely increased by extending the works. This is considered a very low estimate of the capacity of this mine by experienced miners of that locality. The Assayer of the United States Mint at Charlotte, in speaking of this property, says it has few equals in productiveness in that country, and with proper management and machinery the above product can be doubled.
