

tucky; in 1786. The first patent for a print-ing-press was taken out in 1796 by Dr. Apollos Kinsley, of Connecticut, which was and amounting in the aggregate to about 40,000 feet improvement on a press invented by one an improvement on a press invented by one Nicholson, and the number of printing-press manufactories now in the Union is fourteen, mostly located in the three leading Atlantic cities.—N. Y. Nation.

together with the

THERE IS MUCH excitement in Western Ohio in regard to a new railroad that it is proposed to construct from Newark through proposed to construct from Newark through Granville, and perhaps Delaware, direct to Marysville. From there it is proposed to run on the Delaware and Bellefontaine Railroad to Zanesville and Bellefontaine. The grading, it is said, is principally done on this new route from Bellefontaine west to the performance to the period. to Lafayette or Logansport, Indiana. This road will connect at Newark with the Central Onio and with the Steubenville and Pittsburgh Railroad. Its Western connec-tions will be excellent, and it is claimed that it will be at least forty miles shorter than any other route between the East and West. A meeting was held at Bellefontaine on the sth inst., to consider the question of the new road. It was well attended by persons representing the different cities along the route, and committees were appointed to confer with other railroad companies in regard to the enterprise. It is proposed to make the Bellefontaine and Delaware Railroad a part of the new one, and, as the President of the Company favors the project, i is expected that the stockholders of the old road will donate or relinquish their stock on condition that the new road will be completed. A committee was appointed to ob-tain the release of the stock, and the meeting adjourned to meet at the call of the Presi-

DEATH FROM COLD.—The news is begin-ning to reach St. Paul, Minnesota, of nu-merous deaths occasioned by the recent snow storms and cold weather. Four men were frozen to death in Freeborn county on the 19th inst. one a Mr. James Wood, of Rice Lake township. A lady living near Blue Earth City, in Faribault county, on the same day, got out of wood, and, placing her children in bed, started for her father's house, about half a mile distant across the nouse, about har a mile distant across the prairie. The next morning she was found dead within ten rods of the house. A Mr. Thompson, of Blue Earth City, was in the same storm, and has not since been heard same storm, and has not since been heard from. He is supposed to have been buried in the snow. The destruction of stock was very great. One man in Freeborn county had one hundred and forty sheep buried in the snow, nearly all of which perished. Numerous cattle have perished in different parts of the State.

INTERESTING DISCOVERY. — A. German professor has discovered the means, by the aid of chemistry, of recognizing the presence of cotton in linen fabrics. He takes a piece perty, but can count on large and immediate redurns on the investments. Having an ore that readily yields \$10 per bushel, some estimate can be made of the value of this property. With the present imperfect system of mining in this locality, and absence of pro-per machinery, ten tons of this ore can be taken out daily from every shaft opened. Estimating, say 15 berefold to the four the daily viold will be it is of from of suspected cloth, about two inches by three-fourths of an inch, and after having unraveled both weft and warp, plunges it into an alcoholic solution of aniline and into an alcoholic solution of annue and fuchine. The superfluous coloring matter is removed by washing the cloth thus dyed several times in water. If, while it is still wet, it be placed in a saucer containing ammonia, the cotton fibres will immedi-ately become discolored, while those of the lines will encourse a fine ad color dany from every analt opened. Estimating, say in bushels to the ton, the daily yield will be \$1,500 from one shaft, allowing \$300 per day; counting 300 working days to the year, the yearly proceeds will be \$360,000, which yield can be largely increased by extending the works. This is considered a very low estimate of the "Chapting of the works." Capacity of this mine by experienced miners of that locality. The Assayer of the United States Mint at linen will preserve a fine red color.

Corron.—It is asserted by the English journals, that the prospect of a great cotton crop for the next year, in Egypt and India, are more flattering than ever, before. Ex-tensive improvements have been introduced in the raising of the staple, and the means of transporting it from those countries have been largely increased and perfected. This will prove not year welcome intelligence to will prove not very welcome intelligence to our Southern planters. The only practica-ble way to affect the India-Egypt, trade is for the South to bend its energies to the cultivation of the article at once.

THOMPSON'S LONDON EUROPEAN RANGE, for public institutions, in TWP public institutions, Hopkins Tunnel. Which is already opened about 200 feet. Work upon this Tunnel is now being prosecuted with the utmost vigor, and will CUT IN ITS COURSE ALL THE ABOVE NAMED LEDGES, and also the Bevenue, Providentia, Savage, Morgan and Muncy, Hooker, North Ftar, and, in fact, all Ledges situated upon Lan-der Hill. These properties have been secured from the original locators, which only could be done by giving them a large interest in the Company. Uniting these properties with the Revenue Extension without in-creasing the Capital Stock, or the price per share Annufacturers of LOW-DOW1 PARLOR CHAMBER, OFFICE, And other GRA' For Anthracite, Bituminous stamps this as one of the best enterprises ever offered to the public. Samples of the Ore and Mars of the Property, and for further particulars, apply at the office, de30-64 No. 55 S. THIRD Street. ALSO, WARM-AIR FUE For Warming Public and P REGISTERS, VENT de30-6tg PROSPECTUS /AND CHIMNEY-C. OOOKING-RANGES, BAT 0021 WHOLESALE BDd OF THE S 1 CARSON GOLD MINING COMPANY. TI OF NORTH CAROLINA. For Bucky other seive. The Land of this Company consists of 120 ACRES in Mecklenberg county, North Carolina 3½ miles from the town of Charlotte, on a branch of Sugar Creek, 8ta which stream furnishes gook water power for grinding the ores. This Mine was first opened in 1838 by a man named Carson, who worked it successfully for a num-ber of years. He died in the town of Charlotte, in 1846, worth over half a million dollars. Two shafts have been sunk on this property, one of them so feat the other 56 feet, on different years. RIG It is one of the most useful invo use ever offered to the public. To one-quarter the time (and much other process) by putting the flow Sifter, then, by turning the crai-through the sleve with great ra-fine and light. This Sifter has rollers to grind up the dirt. such a &c., but sifts all articles and leave in the sleve; the Sifter is made of that gives SATISFACTION. Ever ed. Be sure and ask for Spencer Samples sent to any address on r Factory, 346 North SECOND St Bell-Same them 80 feet, the other 60 feet, on different veins' averaging from two to three feet in thickness, which veins still continue on down increasing in width and richness. These shafts are in good order, and ore can be readily taken out at any time. Other veins have been discovered on this property, and tested and proved to be very rich in gold. The ores of this mine are known as the brown ore, and very rich, yielding readily \$10 per bushel. This is believed to be one of the best and most certain mines in the State, on account of the abundance and quality of the ore, and ease in which worked by Major Z. A. Grier from 1840 to the breaking out of the war. This Company have purchased this property, and intend to erect machinery and put the mines in immediate operation. The many advantages of this mine over the mines of Colorado and Nevada E.S. EAI can hardly be estimated. It is more readily reached, and has abundance of fuel, with cheap labor. It can be worked all the year, and not, as in the case of Colo rado and Nevada, be compelled to lie idle for three or four months in consequence of the severity of the **!** winter. This mine having been worked for a long time proved to be a rich paying one. We do not, therefore have to incur the risk there is in an undeveloped 'pro-perty, but can count on large and immediate returns on the investments. Washington the investment was UNDERT
