Our numbers are rapidly dimi-nishing, and the time is not distant, when this Association, around which cluster so many pleasant recollections, will be among the things that were—at least so far as rehowever, that their sons will fill the ranks, and preserve it in existence for many years to come.' New Jersey Matters.

AUXILIARIES TO PHILADELPHIA COM-MERCE.—The Jersey side of the river, within a few years, affords to the commerce of Philadelphia many facilities of great importance. The process of tilling up the low grounds bordering on the river, and of extending the wharves to the proper line, by which long and safe docks are made, and presents a safe harbor for ships, steamers, and other vessels compelled to harbor in Philadelphia. Quite a fleet of steamboats are often wintered in Camden, for the reason that the cost of wharfage is merely a nomi-nal sum. From the cove below the large iron foundry and ship-yard at Kaighn's Point, up to Cooper street, the water on the eastern side of the river is sufficiently deep to accommodate the largest craft; and we have often wondered why the Monitors were ordered to League Island, when they could have been moored with equal safety almost opposite the Navy Yard, and where they would be under the daily observation of the officers of that station. They could be more closely watched, and be better protected every way, than at League Island. This fact is taken advantage of by the New York *Times*, which has reflected upon the capa-city of Philadelphia as a commercial port, because it alleges she had not room to har-bor the monitors. In the vicinity of Kaighn's "Eagle of Ft. Wayne." "Lebanon Choice." Point, above, below, and in front of the Navy Yard, there is about 24 feet depth of water at low water mark. Aside from this the eastern channel is seldom used; and when such conveniences are disregarded, we are not surprised at the efforts of New York journals to disparage our neighboring city. There is also, at that point a natural eddy, created by the bend of the river, which keeps that part of it clear of floating ice, except in the most severe weather. This is apparent from the fact that when the North Camden boats, ponderous as they are, have been rendered useless by the ice, the smaller boats of the Kaighn's Point Ferry make their regular trips to South street; and now that Mr. Griffith has placed a su-perior character of boats at that ferry, in-terruptions are unknown.

THE RIVER .--- The severe cold which has prevailed for a day or two has so obstructed the Delaware with ice that it was with con siderable difficulty the ferry boats could make their regular trips. It is thought that if the cold remains as intense for a few days as it is to day, the river will be sufficiently frozen over to admit safe passage across on the ice. The thermometer in Camden this morning stood eight degrees below zero.

DONATION PARTY.—An evening or two since the congregation and friends of the Rev. Mr. Carman, at Smithville, pleasingly surprised that gentleman, by paying him a donation visit and leaving him the sum of \$182.

AGRICULTURAL.—The Agricultural So-clety of Atlantic county is in a flourishing condition. At a recent meeting held in Egg Harbor City, it was resolved to select speakers for a course of lectures.

THE COURTS .- The Courts of Camden county commence their January term to-morrow; and will, most likely, continue for two or three weeks.

enable them to touch it. That they may obtain this permission is most earnestly to be wished. The encroachment on the Park is not worth mentioning; for from Grosvenor gate the lane is already so wide that putting back the park railings sometwenty-five feel would give the whole road a width of seventy feet from Piccadilly to the Marble arch.
