CITY COUNCILS.

The regular meeting was held yesterday SELECT BRANCH.

A communication was received from the City Solicitor calling attention to the judgment obtained by the State against the city on the sum of \$439,228 84. Mr. King presented a resolution to give notices to property owners in Columbia

avenue, between Germantown avenue and Sixth street, that said streets will not be needed for public use. Agreed to.

The resolution from Common Council re-

lative to the cutting of ice in the Schuylkill The annual report of the City Controller s presented. An abstract was published

in the BULLETIN of yesterday. The resolution from Common Council providing for the leasing of the Refreshment Saloon at Fairmeunt Park was called up. Mr. Gray asked that, as the Commissioner

of City Property, who was now out of the city, might have suggestions to offer, the bill might be postponed for one week.

Mr. King opposed this, as the Commis-

sioner of City Property was a servant of Councils, and they not servants of his. After a long debate, the subject was referred to the Committee on City Property. A resolution to appoint a committee of five members from each Chamber, to examine into the management of affairs by the heads of departments, and to report what action may be necessary for their more economical management, was called up and debated at

length. It passed by a vote of 18 to 11.

Mr. Bumm read in place an ordinance to prevent the accumulation of ice on the foot-

It provides that where there are gutters over the footway of a street in which there is a sewer, it shall be the duty of the Depart ment of Surveys to give notice, from time to time, to the owners of the premises to connect with said sewer by underground drainage, and in case of non-compliance with said notice for the space of thirty days after the service thereof, there shall be incurred a penalty of thirty dollars for each

Referred to the Committee on Surveys. Adjourned. COMMON BRANCH. Mr. Strickland Kneass, City Surveyor, submitted a report of the expenditures of

the department for 1865. Referred to Finance Committee. Mr. Griffith presented a petition, signed by Messrs. Merrick & Sons, asking for an alarm fire box in their premises, the cost alarm fire box in their premises, of which will be paid by the firm. Referred to Committee on Fire and Trust.

The same gentleman presented a report of the receipts and expenditures of the Wills' Hospital Trust for the year 1865, Referred to same committee.

Mr. Hetzel offered an ordinance making

an appropriation to the Board of School Control to pay bills for 1865. Referred. Mr. Martin offered a resolution that Select and Common Council meet on Thursday next to elect three directors of the Philadelphia and Erie Railroad and two directors of the North Pennsylvania Railroad. Agreed to.

Mr. Stokley called up the ordinance to reorganize the Department of Street cleaning, which, on motion, was postponed for the

Mr. Billington presented an ordinance establishing the Department of Highways, Bridges, Sewers and Cleansing of the City. The ordinance was offered as a substitute for the street cleaning bill. He moved its reference to a special committee of five from each Chamber. Agreed to.
Mr. Marcer called up the bill to reorganize

the Street Cleaning Department, and asked its reference to the special committee of five from each Chamber. Agreed to.

The ordinance making an appropriation of \$37,204 50 to the clerks of Councils, for the expenses of the year 1866, was taken up. After a debate, the following items in the appropriation were reduced:
Item 1. For printing journals and other

documents, \$15,000. Reduced to \$12,000.

Item 2. For binding journals and other documents, \$3,830. Reduced to \$3,230.

The following amendment, offered by Mr. Griffith, was agreed to: That the Clerks shall advertise in two newspapers of the city for proposals, and the bids shall be opened in the presence of the Committee on Printing and Supplies, and the contract shall be given to the lowest bidder. The bill then

passed.
Mr. Marcer called up the ordinance making an appropriation to the Inspectors of the County Prison, to defray the expenses of the year 1866. The bill passed, with sundry amendments.

The bill making an appropriation of \$54,-400 to the Board of Health, was passed. Mr. Marcer presented a supplementary ordinance, providing that the salaries fixed for the clerks and messengers of Councils

by an ordinance approved January 26, 1864, be construed to be in full compensation for all services rendered to Councils, or any committee thereof. P. sed. The ordinance making an appropriation

of \$349.375 to defray the expenses of the department for supplying the city with water The Committee on Trust and Fire reported

a resolution suspending the Fairmount and Good Will Steam Fire Companies, for one month, for riotous conduct, passed.

Mr. Evans presented an ordinance giving to the Chief Engineer of the Fire Department the power to suspend any fire company for destroying the fire plugs in the city, and for proceeding to a fire with their steamer at greater speed than the Chief Engineer a greater speed than the Adjourned. Severe Fight at Richmond, Kentucky.

We have been shown a letter from a gen-tlemen in Richmond, Kentucky, who furnishes some details of a serious affray, occurring in that place on Friday last. The parties participating had assembled at a contested election, and soon got into a contest of the most serious character. The quarrel, we understand was of a political character, in which two parties in the main, the Parishes and Kavanaghs, were the principal participants. During the melee not less than sixty shots were fired—some of them with disastrous effect. Among the casualties we are furnished with the following: Henry Kavanagh, in the head, mortally; Ed. Kavanagh, wounded in three places; son of Col. Doty, since died; Arch. Kavanagh, supposed mortally; H. Kava-nagh, w unded in two places; R. W. Manpin, severely; R. Conelson, Amos Worlds, Frank Todd, Nic. Terrell. Some of the latter are but slightly injured. The affray, however, seems to have been a most sa guinary affair, and caused great excitement at the time.—Cin. Times.

Those Camels.
[From the New Orleans Picayune.]
Those camels which the United States Government imported from their oriental home some years ago, sent to Texas; and used for army transportation purposes, are to be sold at auction. These camels have made one trip to San Diego and back, via. Arizons; they served in the Confederate Quartermaster Department during the war, and, we expect, were the only property of that department not stolen in the general grab-game so freely indulged in report has grab-game so freely indulged in, report has it, in Texas, when the war ended, again reverted to Uncle Sam, and now he is going to knock them down to the highest bidder. They have had an easy life out in North-west Texas; fully proven their usefulness and value as beasts of burden; and it seems rather hard to turn them adrift. However, "sich is life." There is no army retreat for broken-down, or aged, or invalid animals, as there is for soldiers in that plight; and Messrs. Camels will have to go it on their own responsibility. Doubtless some big army contractor or freight agent will buy them, in order to carry heavy loads over the wide plains of Western Texas, for which they are well adapted.

COOL WALK BY A SONAMBULIST. The Leeds (English) Mercury, of the 27th ult. says: About two o'clock on Tuesday morn ing, as a young man was going home past the new Congregational Church, Pudsey, he was startled by the appearance of a ghostly figure in white, as if it had come out of the adjoining graveyard. Whether it was a "creation of the heat-oppressed brain" (as he was just coming from a public house), or a veritable reality, he could not tell. However, he mustered courage to approach the dreadful object, which he discovered to be a young woman fast asleep. She had on only a night dress, and, on being awoke, screamed on finding herself in the street. She was taken to a house near and supplied with clothing, and then accom-panied home. She had walked more than half a mile in her sleep, had got out of bed in a dream, unlocked the door, and started upon her nocturnal journey without having

listurbed any of the family. A SALARY CASE .- The case of Richard Escott against John J. Crane and Cecilia Burton, the executor and executrix of Win. Burton, the actor, deceased, was argued on appeal before the general term of the Su preme Court yesterday. This action was brought in 1863 by Escott, as the agent of an English opera troupe, with whom, it is alleged, Burton contracted to perform at a salary of seven hundred dollars per week and half the proceeds when the receipts nightly were over seven hundred dollars. After weeks performance, which proved entirely unremunerative, Burton closed the theatre and discharged the company. An action was then brought to recover the amount said to be due on the unexpired term of the contract, when the jury gave a verdict for plaintiff for four thousand three hundred and twenty-two dollars and eighty-eight cents. The decision was reserved.—N. Y. Herald.

THE PUBLIC PRINTING .- It appears from the report of the Superintendent of Public Printing that the net cost of the public printing and binding for the year ending the 30th of September last was \$1,731,565. The close of the rebellion has caused a considerable decrease in the requisitions of the Executive Department for printing, but with the large amount of deferred printing for Congress, and that which will be ordered at the present session, there will doubtless be enough to work the whole establishment up to its full capacity for the next two The report shows a large saving in print-ing and binding over the contract system

which existed previous to the establishment of the Government Printing Bureau. RAILROAD ENTERPRISE .-- Among the railroad enterprises of the Southern States, no one is more important than the Savannah. Griffin and North Alabama road.com oleting a direct line between Savannah and Memphis. The grading is almost finished between the former place and the Chattahoochee river. The track lies through the coal fields, and copper mines of North Ala bama, which, when developed by this con venient mode of transportation, will furnish inexhaustible sources of treight that an find an outlet in no other direction. The Savannah Republican savs it is bound to be, from its position and th

THE RECIPROCITY TREATY .- The delegation from the North American British Pro rinces who are at Washington, for the purpose of securing, if possible, an extension of the Reciprocity Treaty, accompanied by Secretary McCulloch, called on the President, yesterday, and paid their respects. They propose in a day or two making a trip to Richmond, and upon their return wil have an interview with the Secretary of the Treasury and Committee of Ways and Means with regard to the object of their mission.

cumstances the road of roads in the South.

SUICIDE.-David L. Cogswell, of Henniker, N.H., committed suicide, Friday afternoon, by hanging himself in a cider mill bel-nging to his brother, in whose family he had been residing for a few weeks past He was sixty-eight years of age, and at times has suffered much from depression of

A NATIVE East India physician has re cently described a new drug, which promises to be of some value in the treatment of bronchial affections. The plant from which it is obtained is called by the Hindoos "bakus," and is a common hedge shrub in Bengal and the upper provinces.

DRESS MAKING.

For Sifting Flour, Meal Buckwheat, Sauce and al other articles requiring a

State and County

RIGHTS FOR SALE. It is one of the most useful inventions for demestic use ever offered to the public. The flour is sifted in one-quarter the time (and much better than by any other process) by putting the flour in the top of the sifter, then, by turning the crank, the filour passes through the sleve with great rapidity. Clean, very time and light. This Sifter has no India rubber rollers to grind up the dirk, such as bugs, worms, files, &c., but sits all articles and leaves the dirt remaining in the sieve; the Sifter is made of tin, is very neat and easy to keep clean. It is the only Sifter now in use that gives SATISFACTION. Every Sifter is warranted. Be sure and ask for Spencer's Patent Tin Sifter.

MINING COMPANIES.

PROSPECTUS

OF THE CARSON GOLD MINING COMPANY,

NORTH CAROLINA. '

The Land of this Company consists of 129 ACRES in Mecklenberg county, North Carolina 31/2 miles from the town of Charlotte, on a branch of Sugar Creek. which stream furnishes gook water power for grinding the ores This Mine was first opened in 1838 by a man named Carson, who, worke's it successfully for a num-ber of years. He died in the town of Charlotte, in 1846, worth over half a million dollars. Two shafts have been sunk on this property, one of

averaging from two to three feet in thickness, which

them 80 feet, the other 60 feet, on differen

veins still continue on down increasing in width and richness. These shafts are in good order, and) fe can be readily taken out at any time. Other veins have been discovered on this property, and tested and proved to be very rich in gold. The ores of this mine are known as the brown ore, and very rich, yielding readily \$10 per bushed. This is believed to be one of the best and most ce mines in the State, on account of the abundance and quality of the ore, and ease in which it is obtained and reduced. This property has been worked by Major Z. A. Grier from 1840 to the breaking out of the war. This Company have purchased this property, and intend to erect machinery and put the mines in immediate operation. The many advantages of this mine over the mines of Colorado and Nevada

can hardly be estimated. It is more readily reached and has abundance of fuel, with cheap labor. It can

he worked all the year, and not, as in the case of Colo

rado and Nevada, be compelled to lie idle for three or four months in consequence of the severity of the This mine having been worked for a long time proved to be a rich paying one. We do not, therefore have to incur the risk there is in an undeveloped pro nerty, but can count on large and immediate return on the investments. Having an ore that readily yields \$10 per bushel, some estimate can be made of the value of this property. With the present imperfect system of mining in this locality, and absence of pro-per machinery, ten tons of this ore can be taken out daily from every shaft opened. Estimating, say 15 pushels to the ton, the daily yield will be \$1,500 from one shaft, allowing \$300 perday for expenses. The ne product will be \$1,200 per day; counting 300 working days to the year, the yearly proceeds will be \$360,000 which yield can be largely increased by extending the works. This is considered a very low estimate of the capacity of this mine by experienced miners of that

locality. The Assayer of the United States Mint at Charlotte, in speaking of this property, says it has few equals in productiveness in that country, and with proper management and machinery the above pro

AN IMPROVED SCHOOL GEOGRAPHY. JUST PUBLISHED BY

SOWER, BARNES & POTTS,

37 North THIRD street, Philadelphia, PHYSICAL AND LOCAL GEOGRAPHY, in one took, for INTERMEDIATE CLASSES, by James Monteith, author of the Natural Geographical Series, and a teacher of large experience.
This important study is here presented

AS A SCIENCE. end is made clear, attractive and interesting.

By avoiding detail and technical terms, and by employing FAMILIAR LANGUAGE and IMPRESIVE ILLUSTRATIONS, the author presents FACTS, PRINCIPLES and INFERENCES in such a clear and visid manner that what has been berefolder det ob-SIVE ILLUSTRATIONS, the author presents FACIS, PRINCIPLES and INFERENCES in such a clear and vivid manner that what has been heretofore dry obscure and perplexing to pupils, is now made simple and instructive, even to the youngest.

The science of Geography properly embraces an investigation into the laws which control the condition, changes and phenomena in nature as affecting the life and conditions of mankind.

When considering the position and height of a mountain range, the course of the winds or of an ocean current, the pupil is here taught to observe the influences exerted by each upon climate, vegetation and the pursuits of man in different regions. He learns, for example, that the Gulf Stream not only has a northeasterly direction, but also that the warmth of its waters tempers the climate of Western and Southern Europe, and sheds a genial influence upon the atmosphere, productions and inhabitants of that Division.

The plan of thus REFERKING EFFECTS TO THEIR CAUSES and of considering THEIR USES TO MAN, leads youthful minds to habits of observation and reasoning and directs their thoughts to the wisdom, power and goodness of the Creator. In that part which treats of Local Geography, the MAP's and MaP EXERCISES possess several valuable peculiarities which will be apparent to all practical reachers.
