Business Notices.

WRITE WRIGHT RIGHT. In writing wright we often write It right and yet are wrong, For neither write nor right is right, Nor doth to rite belong. A dyer dyes awhile, then dies;

To dye he's always trying: Until upon his dying b Intil upon his dying bed, He thinks no more of dyeing— But tells the people, one and all, To buy their clothes at Tower Hall.

GENTS', YOUTHS' AND BOYS' CLOTHING. TOWER HALL, No. 518 Market Street, BENNETT & CO. Prices greatly reduced to suit the times.

Goods sold at lower prices than for severa DESERVING OF CONFIDENCE.—There is no arti cle which so richly deserves the entire confidence of the community as "Brown's Bronchial Troches." The Troches have received flattering commendations from the most celebrated Clergymen, Lawyers, and Public Speakers who speak from personal experience, Thos suffering from Asthmatic and Bronchial Disease Coughs and Colds, should try the Troches,

STEINWAY & SONS'
PIANOS
PIANOS
PIANOS
PIANOS
THE Trace acknowledged the best instruction. The following letter from the great Artist and Composer, Alex, Dreyschock (Planist of the Emperor of Russia), speaks for itself:

letter Homistof the Emperor of Russia), speaks schock (Pianist of the Emperor of Russia), speaks for itself:

"St. Petersburg, Sept. 29, 1855.—Messrs. Steinway & Sons. I cannot refrain from expressing to you my undisguised admiration of your, in every respect, matchless grand Pianos (which I used at my last concert in Brunswick), and desire nothing in the world so much as to be able to perform upon one of those masterpieces here. Send me, therefore, care of Johann David Hoerle & Co., in St. Petersburg, one of your Concert Grand Pianos, of course at the moderate artist's price, and mform me, without delay, in which manner I can best remit the purchase money to you. Respectfully yours,

ALEXANDER DREYSCHOOK."

Under European news, from the New York Weckly Review, we read: "H. VON BULOW (the greatest performer now living), gave a series of concerts in Berlin (Prussia), and played on a Steinway Piano, one of the most magnificent instruments ever heard in Germany."

Germany."
From Miss FANNY REED, in Boston, we learn from Miss FANNY REED, in Boston, we learn that FRANZ LISZT (the king of pianists), frequently accompanied her on a Steinway Prano in Rome (Ltaly), accompanied her on a Steinway Prano in Rome (Ltaly), and was in ecstasies about its superiority over all and was in ecstasies about its superiority over all others.

ALFRED JAELL, G. SATTEB, and others use them also whenever they can be procured.

The demand for these Planos, so popular here has increased so much in Europe that Steinway & Sons are not able to supply one half of the home demand.

In Philadelphia for sale only, at del5

EVENING BULLETIN. SATURDAY, JANUARY 20, 1866. FREEDMEN'S LABOR.

Wherever the Freedmen of the South have been allowed a fairchance to make a living they have prospered and contributed towards the general prosperity. great progress and improvement in every respect. The State was never advancing as rapidly in wealth and population as it is now after twelve months of practical and universal freedom. The Freedmen have conducted themselves well. The Missouri Democrat says:-"we have not heard a single complaint of the negroes in this State, from any quarter, since they were set free. They have proved to be industrious, economical and well behaved citizens, and are rapidly acquiring property and educa-

tion." General Pillow and others, who have given a fair trial of free negro labor on their plantations, find it already more profitable than slave labor was. Even in Virginia, we have the testimony of Richmond papers that the Freedmen, when treated fairly and paid fair wages, work well and give satisfaction to their employers. One farmer in Henrico

county writes:
"I find no difficulty in employing first-class farm hands, at wages varying from fifteen to twenty dollars per month and board, they to pay a proportionate rate for the time they lose, and to be responsible for the proper care of stock, implements, etc. At these rates I find labor much cheaper At these rates I and labor much cheaper than when I owned slaves, and am quite convinced that my neighbors will soon make a similar discovery, if they have not already done so. Our trouble now is, to learn the management of free labor—to employ it when necessary, and to dispense with it when not needed."

A farmer of Halifax county, Va. who pays his hands \$15 a month, says "they perform their work with marked industry and regularity. The Freedmen are learning that they must labor to live, and I have discovered that they suit me better than whites, having given them both a fair trial." Another in Bedford county bears similar testimony, and doubtless thousands could be found who would make similar reports. These successful results of experiments in free negro labor at the South, so soon after emancipation and the end of the war, give assurance that before another year a system of free labor will be in operation throughout the South which will prove far more profitable than slave labor ever was. If the whites treat the blacks decently and pay them fair wages, they will prove much better servants than they ever were as slaves.

THE SUICIDE OF PAREJA." The report is fully confirmed that the Spanish Admiral who opened the war upon Chile has committed suicide. The Cronica, the Spanish organ of New York, says that he resolved upon it after the surprise and capture of the Covadonga. On the evening of the 29th of November, he retired to his cabin, and soon afterwards a report of a pistol was heard. The cabin was immediately opened, and he was found dead, from a wound through the right temple. On the table was a paper, on which he had experience in teaching the table was a paper, on which he had experience in teaching the table was a paper, on which he had experience are understood to the table was a paper. written, "Let my body be thrown out of

the Chilean waters, and let all conduct themselves with honor." The evening before Admiral Persis had received from before, Admiral Parejahad received from the government of Madrid instructions the tenor of which isuuknown. It is to be presumed, says the Cronica, that "placed between two duties, in consequence of the affair of the Covadonga, he chose that of a great sacrifice, and comsummated it with the firmness of a true Spanish general."

THE REAL ESTATE TAX, A bill has been introduced into the State Senate, by Mr. Connell, to repeal all acts authorizing the levy of a tax on real estate for State purposes. The condition of the finances of the Commonwealth is so prosperous and the revenue from other sources is so large that this tax can be safely dispensed with. The State Treasurer, in his last report, showed that this could be done, and that yet there could be a steady reduction of the State debt. We presume the subject will receive the early consideration of the Legislature, and although the tax is not a heavy one, when distributed among such a vast population, yet any abatement of State taxes would be grateful in these times when national and local taxes are so heavy.

The Magazines. We have received from T. B. Peterson & Brothers, the February number of Harper's Magazine. The opening paper gives a very interesting account of Blackwell's Island Lunatic Asylum, with a number of good illustrations. Mr. Lossing continues an excellent account of "Charles Ellet and his. Navat Steam Rams," which is also illustrated. There are several shorter articles with illustrations, including a curious one on "Diamonds and Other Gems," and one on "The Red Jacket Medal." The story of "Armadale" is continued, and that called "An International Affair" is concluded. There are several skater tales and sketches which are interesting. The poetry of the number is of a fair average quality. The editorial departments are filled with the nanal excellence.

Mr. T. B. Pugh sends us the February number of Our Young Folks, published by Ticknor & Fields. It contains an admirable collection of original stories and other articles for young readers, all well illustrated. The puzzle and rebus department, called "Round the Evening Lamp," is particularly entertaining this month.

London Society is an English monthly magazine, the January number of which has been sent to us by Mr. Kromer. The contents are of a light, agreeable character, and there are a number of illustrations.

To Gas Consumers.—We are pleased to announce to the public that the new gas regulator invented by the Engineer of our City Gas Works, Dr. C. M. Cresson, has been placed in the hands of our celebrated scale manufacturers, Messrs. Fairbanks & Ewing, and that they are now prepared to fill orders for any size required. This regulator is rendered superior to every other form by the use of a peculiar valve and gas In Missouri where instant emancipation | holder, avoiding the use of mercury, which was ordained by the Legislature on the is so deleterious in its effects upon the human 11th of January, 1865, there has been system, and also flexible diaphragms, which are liable to leakage.

In October last a trial was made by the Franklin Institute, and the result showed that with the regulator there was a uniform saving of 40 per cent. from that of the street pressure, and also that with the regulator no change was made in the light, although the pressure was increased from one inch to

Messrs. Fairbanks & Ewing have the test apparatus, which was exhibited at the Franklin Institute, set up in their warehouse, 715 Chestnut street, where we would advise all interested in the saving of gas, to call and examine.

THE PENNSYLVANIA COMPANY FOR IN-SURANCE ON LIVES.—In another column will be found the statement of the financial condition of the oldest insurance company in this State, the "Pennsylvania Company for Insurance on Lives and Granting Annuities." The statement is an exceedingly favorable one in all respects, as will be seen by a glance at the advertisement.

Valuable Real Estate and Stocks. Messrs. Thomas & Sons sale on Thesday next will include several valuable stores on Marker street, large lots and a number of dwellings. Also, Stocks and Loans.

The pamphlet catalogue contains a list of a large enough of valuable teal Estate to be said on the said. and Loans.

THE BAILEY WASHING AND WRINGING MAICHINE will probably be found the most desirable
for use by hotels. laundries, boarding schools, manu
facturers, dyers, large families, dc. The large diameter
of its rollers and its spring centre—to both of which it
retains an exclusive right—makes it turn easier and
adjust itself to thick articles of clothing, or bunches
more readily than any other, while the use of cogwheels diminishes the strain—upon the lower roll to
one-half, thus giving it ereater durability. For sale to
the trade at factory rates, or at retail by the agents,

922 Chestnut Street.

ja20tf 4př Below Tenth street. Gold and Silver Spectacles, Gold Bye Glasses, Microscopes, Magic Lanterns,

Stereoscopes,
Stereoscopic Views,
Mathematical Instruments, Opera Glasses, &c., &c., &c.

WM. Y. McALLISTER. No. 728 Chestnut St.

NOW IN PRESS: A. BIRGFELD'S NEW GALOP

LA COTERIE CARNIVAL. The Most Dashing Galop Written This

FOR SALE AND PUBLISHED BY C. W. A. TRUMPLER. AND

RISLEY'S jai9-6tl CONTINENTAL NEWS EXCHANGE. FINE OPERA GLASSES

A VERY LARGE VARIETY

JAMES W. QUEEN & CO.,

924 CHESTNUT STREET. J. L. CAPEN. PHRENOLOGIST.

Successor to Fowler, Wells & Co., gives written and verbal descriptions of character with Charts, daily, at de23-8,tu;th-12trp? No. 25 S. TENTH Street

715 Chestnut Street.

GAS CONSUMERS.

We would call your attention to a

NEW GAS REGULATOR.

INVENTED BY

Dr. Chas. M. Cresson,

(Late Maraging Engineer of the Philadelphia Gas-Works,) possessing GREAT DELICACY of adjustment, by the use of a peculiar form of valve and gas holder, governing accurately a single light, with a capacity to pass gas enough for the full number of lights and the shility within the instrument itself, to increase the pressure, when the greater quantity of gas is re quired.

Among the peculiar advantages of this Regulator. that make it preferable to instruments of more contracted size, which require the use of MRRCURY or FLEXIBLE DIAPHRAGMS, the following deserve especial notice :

FIRST-The free motion of the Regulating Valve through considerable space, gives it greater delicacy of adjustment, and a wider range of consumption in a single instrument, than is possible with other forms.

SECOND-The fluid seal of GLYCERINE used in ed throughout the rooms in which it is burned, subjecting the occupants TO ALL THE DELETERIOUS EFFECTS OF MERCURY upon the human system and especially upon the LUNGS and SKIN, when it is thus diffused as vapor. The accidental overflow of Mercury from these mercurial Seals, has often injured valuable Gas Meters, the cost of which has necessarily been charged to the consumer.

Where the use of MERCURY in regulators, is avoided by the substitution of a FLEXIBLE DIAPHRAGM the resulting difficulties are also numerous; one is the liability to LEAKAGE and EXPLOSION OF GAS; another, the loss of Flexibility and consequent inefficlency by age and exposure to cold, and thirdly, the inrange of action

To remedy these faults, the "CRESSON REGULA". TOR" was invented, and wherever introduced it has given the greatest satisfaction, always producing a steady light, and regular consumption, with a saving of from TWENTY to THIRTY Per Cent. in amount

LETTERS PATENT have been granted for this Regulator, both in the UNITED STATES and in ENGLAND. It is manufactured by the

"AMERICAN METER COMPANY,"

of NEW YORK, PHILADELPHIA and BOSTON, for us alone, and for sale. Wholesale and Retail, at our warehouse in this city, where all orders and letters should be addressed,

The following is an extract from the Journal of FRANKLIN INSTITUTE, dated October 18, 1865; regulation to their maximum economy, and also the amount consumed by the same burners when sub jected to the ordinary variations of street pressure."

"The result showed that with the Regulator, there was uniformly 78 cubic feet of gas per honr, consumed being an average of 37-10 cubic feet per burner. Whilst without the Regulator the same burners consumed from 106 to 140 cubic feet per hour, the average being 126 cubic feet, or 6 feet per hour to each

The test apparatus which was set up in the FRANK-LIN INSTITUTE can be seen at our

ECALE WAREHOUSE

in this city, where the publicare invited to call and examine for themselves, the amount of saving effected: by the use of the

CRESSON REGULATOR.
