## XXXIXTH CONGRESS-FIRST SESSION.

### LOSE OF TESTERDAY'S PROCHEDINGS

SENATE. - The question being on the adoption of Mr. Cowan's amendment, to restrict the operations of the Bureau to the States lately in rebellion. Mr. Hendricks demanded the yeas and nays, which were taken, as

YEAS-Messrs. Buckalew, Cowan, Davis YEAS-Messrs. Buckalew, Cowan, Davis. Guthrie, Hendricks, Johnson, McDougall, Nesmith, Riddle, Saulsbury, Stockton-11. NAYS-Messrs. Anthony, Brown, Chan-dler, Clark, Conness, Cragin, Cresswell, Fessenden, Foot, Foster, Grimes, Hender-son, Howard, Howe, Lane (Ind.), Lane (Kansas), Snyder, Morrill, Nye, Pöland, Pomeroy, Ramsey, Sherman, Sprague, Stewart, Sumner, Trumbull, Van Winkle, Wade, Willey, Williams, Wilson and Yates-33. Yates-33.

So the amendment was not adopted. Mr. Davis moved to strike out the pro vision extending military jurisdiction and protection to the agents and employes of the Bureau. The amendment was disagreed Yeas 8, nays 31. An amendment was adopted restricting

the military jurisdiction to the exercise of officers pertaining to the Bureau. Mr. Saulsbury moved to amend by strik-ing out the second section, which authori-

zes the President to divide each distric into sub districts, and appoint an agent for each. This amendment was disagreed to.

Mr. Davis offered an amendment authorizing an appeal from the decision of any assistant commissioner, or commissioners of judgment, to a Circuit Court of the United States, and that no agent, commissioner, nor assistant commissioner shall exercise any judicial power whatever-which was disagreed to.

Pending the consideration of the bill, the Senate went into Executive session, and soon after adjourned.

House.-On motion of Mr. Myers (Pa.) the Committee of Ways and Means was in structed to inquire into the expediency of so amending the internal revenue laws as to levy a tax on tobacco in the leaf.

Mr. Ashley (Ohio) introduced an amend-Constitution of the ment to the States, providing that in the event of the death or disability of both the President and Vice President of the United States, the Chief Justice or oldest Associate Justice shall act as President until there shall b a new election; and, also, that when there shall be no election by the people, the choic shall be made in Congress by the Senator and Representatives. Referred to the Com-mittee on the Judiciary. Mr. Stevens offered the following, which

was adopted. Whereas, several high officers have com

municated the fact that they have appointed to office and allowed to act, several rebels who could not and did not take the oath as

required by law, therefore, Resolved, That the Committee on the Ju diciary he instructed to inquire whether any legislative measure is necessary to en force obedience to the law by all men, with out regard to rank or color. On motion of Mr. Walker, it was resolved

that the Committee on Military Affairs be instructed to inquire into the expediency of providing by law for the payment of offi-cers and privates of the Union army during the late rebellion, of monthly pay from the date of their discharge, until notice was given of the acceptance of their resignation,

or until relieved from duty. On motion of Mr. Clarke (Ohio), it was resolved that the Committee of Ways and Means be instructed to inquire into the expediency of reducing the tax on common clgars and manufactured common tobacco. Mr. Niblack (Ind.) offered a resolution de

claring that the conduct of his Excellency Andrew Johnson, President of the Unite States, in declining to accept a carriage and horses since his accession to office, presented by some of his friends in the city of New York, was, under the circumstances, abun dantly prudent, commendable and patriotic

solution before now, and to press it through	MINING COMPANIES.
the House to day would certainly be pre- cipitate action. After an address from Mr. Rogers against	PROSPECTUS
the amendment, and one from Mr. Roscoe Conklin in favor of it, it was ordered to be	of the
printed, and, on motion of Mr. Stevens, was made the special order for Tuesday. Adjourned.	CARSON GOLD MINING COMPA
The Chicago Lake Tannel—The Artesian Wells, &c.	<b>OB</b>
A letter from Chieggo dated last	and the second

## from Unleago, Thursday, says: The Great Lake Tunnel (our tunnel)

exhibits a favorable state of progression It has now reached a distance of 4,850 feet from the shore end, and is advancing at the rate of about twelve feet per day on the outer or lake end. The great crib is securely anchored, and three of the six ironed cylinders have been successfully sunk. It will not be many days before the necessary depth is reached, when workmen will commence excavating toward the shore. We shall probably have a friendly meeting under

water of the two ends some time during the course of the next year. While admitting the greatness of the design and the courage necessary to undertake the

execution of so stupendous a project it is yet quite questionable whether it will ever accomplish the desired object, viz: A supply of pure wholesome water. Water is now obtained very near the shore, but when the tunnel is completed the inlet will b two miles distant; the complaint now is that the impure waters of the Chicago River-at best a common sewer, and the receptacle of all the filth from the dis tilleries, factories and packing houses-

finds its way to the pumps, and from thence to the reservoirs. The tunnel, it is said, will obviate this difficulty, but I think only in a limited degree, for this filthy water will be carried even to the tunnel inlet with every breeze of wind

from the west, southwest and south. The opening of the Illineis and Michi-gan Canal—the work on which is to be commenced this winter, the canal to be cut down to the level of Lake Michigan -will turn the waters of the Chicago River the other way, and with the cur-rent discharge the filth through the canal into the Illinois River. This work will more effectually purify the lake water than all the tunnels which can be built; and this object once accomplished

an inlet to the city water works would be just as good a half mile out in the lake at one two miles distant.

The Artesian wells, now discharging one and a quarter millions of gallons per day of the purest water ever seen on the face of the globe, continue to excite a deal of wonder and curiosity. These wells are located near the city limitsabout three miles from the City Hallare seven hundred feet deep, and discharge an immense volume of clear, water. In several respects these cold wells are anomalies; first; that the water

which rises to the surface stands at 57 degrees Fahrenheit, which is below the mean temperature of the locality, while in all other deep wells the temperature increases in proportion to the descent; so hat no water is found at a greater depth

at much less than 75 degrees, and in the great wells at Charleston, and in the basin at Paris, the range is up to 85 and 90 degrees, and then this water is free from the unpleasant and disagreeable

mineral taints so common to Artesian wells. It is certified, under chemical analysis, to be the best article of drinking water in the world, and from the force and power with which it comes the surface-it has a head of one hundred and twenty-five feet above the level of Lake Michigan-there seems to be no doubt but that by an enlargement of one of the wells to the diameter of twenty inches, a sufficient supply—estima-ted at seventeen millions of gallons per day-could be obtained to meet the de mands of the city for years to come, and this would flow into the reservoirs, without the aid of expensive engines, steam pumps and fuel. Another curious feature in regard to

# COMPANY.

## NORTH CAROLINA.

All the South

The Land of this Company consists of 120 ACRES in Mecklenberg county, North Carolina, 8½ miles from the town of Charlotte, on a branch of Sugar Creek, which atr n furnishes gook water power for grinding the ores. This Miae was first opened in 1833 by a man named Carson, who worked it successfully for a num-ber of years. He died in the town of Charlotte, in

1846, worth over half a million dollars. Two shafts have been sunk on this property, one o them 80 feet, the other 60 feet, on different veins averaging from two to three feet in thickness, which veins still continue on down increasing in width and richness. These shafts are in good order, and of e can he readily taken out at any time. Other veins have been discovered on this property, and tested and proved to be very rich in gold. The ores of this mine are known as the brown ore, and very rich, yielding readily \$10 per bushel. This is believed to be one of the best and most certain mines in the State, on account of the abundance and quality of the ore, and ease in which it is obtained and reduced. This property has been worked by Major Z. A. Grier from 1840 to the breaking out of the war. This Company have purcha property, and intend to erect machinery and put the mines in immediate operation. The many advantages of this mine over the mines of Colorado and Nevada can hardly be estimated. It is more readily reached and has abundance of fuel, with cheap labor. It can be worked all the year, and not as in the case of Colo rado and Nevada, be compelled to lie idle for three or four months in consequence of the severity of the

This mine having been worked for a long time proved to be a rich paying one. We do not, therefore have to incur the risk there is in an undeveloped pro-perty, but can count ou large and immediate returns on the investments. Having an ore that readily yields \$10 per bushel, some estimate can be made of the value of this property. With the present imperfect system of mining in this locality, and absence of proer machinery, ten tons of this ore can be taken out daily from every shaft opened. Estimating, say 15 bushels to the ton, the daily yield will be \$1,500 from one shaft, allowing \$300 per day for expenses. The net product will be \$1,200 per day; counting 30 working drys to the year, the yearly proceeds will be \$560,000 which yield can be largely increased by extending the works. This is considered a very low estimate of the capacity of this mine by experienced miners of that locality. The Assayer of the United States Mini at Charlotte, in speaking of this property, says it has few equals in productiveness in that country, and with proper management and machinery the above proluct can be doubled.

WEBB, Pro Prothonotary

IN OBEDIENCE to a rule of the District Court of the City and County of Philadelphia, the sheriff of said City publishes the following write of Alicas Summons Covenant:

HENRY C. HOWELL, Sheriff.

and affords a valuable example to others similarly situated, and meets the unqualified approbation of this House; and resolved, that the practice so common in persons holding official positions under the Government, accepting presents, given more or less for appointments or promotions, are of a demoralizing tendency, and ought to be prohibited.

Mr. Kasson hoped the gentleman would not press the resolution to a vote. Mr. Farnsworth moved to lay the resolu-

tion upon the table, but the question was decided in the negative, by 19 against 126. The morning hour having here expired, no further action was taken on the resolu-

tions. Mr. Stevens (Pa.), from the Committee on Reconstruction, offered the constitutional amendment proposed by Mr. Fessenden in the Senate.

Mr. Stevens supposed that the members had been considering this question for six weeks. There were only twenty-two States whose Legislatures were in session, some of which would adjourn in two or three weeks; it was therefore very desirable, if the proposed amendment was passed at all, it should be passed at once, so as to be acted should be passed at once, so as to be acted upon by the Legislatures before their ad-journment. It is proposed that if any class of persons were excluded, the States to that extent were not to be entitled to representation in Congress. It did not deny to States the right to regulate the elective franchise, but it did say, if you cut out naturalized persons or native born in any State in the Union from voting, that class of persons cannot form a part of the basis of representation. Mr. Chanler asked whether the gentle-

man intended to pass the resolution now. or to move to postpone its consideration now, or some future day. Mr. Stevens replied that he intended, if

the House was ready, to pass it before sun-down. He was willing that two of the members of the committee, one on each side, should express their views on the subiect now. Mr. Randall (Pa.) inquired whether the

whole policy of the Government was thus to the changed in the twinkling of an eye. Mr. Stevens said he did not yield to dis

cassion. Mr. Randall remarked he was against the resolution; and as a representative from Pennsylvania he did not know how it af-Pennsylvania he did not know how it at-fected other States—he appealed to his col-league not to press a vote, but to let it lie over and have it printed, in order that its full scope may be understood. Mr. Wilson (Iowa) said the same subject had been referred to the Committee on the Judiciary. If he had caught the words of the resolution correctly, the resolution was the same identically as was agreed upon by

the same identically as was agreed upon by the Committee. Mr. Grider (Ky.) asked that the resolution

be printed, and its discussion postponed to some day this week. Mr. Rodgers (N. J.) remarked that he had made a minority report, and that he

was now ready to express his views on the

subject. Mr. Schenck (Ohio) said that time ought to be afforded, in order that members may see the resolution in print, and weigh every word. They should not pass upon a measure of this importance, when, as the gentleman from Iowa said, they could only catch the words. He wanted something equivalent to be passed, but at the same time he wished a day stated as early as tomorrow, when discussion could be com-menced as a special order, and contanued until the subject is disposed of. Mr. Randall (Pa.) fully understood the

power his colleagues (Mr. Stevens) had to drive the measure through by a majority of the House. He had a word only to say. We simply desire to have time to look into Thursday, and make a special order from day to day. He had never heard of the re-

those wells-and one which geologists have not yet explained—is found in the fact that they are located in no great

valley or depression, like the basins of Paris and London, but are out on the evel prairie, surrounded for hundreds of miles by country of a like character. This fact, taken in connection with the low temperature of the water and the great head of the fountains, seem to indicate that it has a source far in the north or northwest, beyond Lak Superior, and beyond the Mississippi

perhaps away off in the Rocky Moun-tains, who knows? It is whispered here that the existence of this water is a revelation of the mysterious spirits, and that the wells were located by clairvoyant powers-the design being, among other things, to supply Chicago with an unlimited amount

of pure, clear, cold water for-ever; and in view of the fact that we are now suffering from the fish nuisance. we send up an earnest prayer that it may be true. Your readers may not know what the fish nuisance is. I will enlighten them. Regularly, at about this season of the year, small fish, thou-sands of bushels, gather in the lake

about the water inlet, and so clog up the screens that it becomes impossible to pump any water without raising the latter, when in they pour by millions, some dead and some living, and find their way into every pipe and out of every faucet. You cannot draw a pitcher of water without taking with it from five to fifty of these miniature whales, and the dead fish so impregnate the water that it is unbearable and undrinkable. So we pray for the pure waters from the Artesian wells.

## The Japanese Embassy in Europe.

[From the London Times Jan. 4.] Yesterday afternoon his Excellency Shibate Hiongano Cami and suite paid complimentary visit to the Earl of Clarendon, with whom they had an interview at half-past two o'clock, at the Foreign Office. After calling upon the Earl of Clarendon the party paid their respects to Mr. E. Hammond, Under Secretary of State for Foreign Affairs. The Commissioner and suite leave the Langham Hotel at an early hour this morning, and escorted by Major Brine, R. E., will proceed to the Victoria sta tion, Pimlico, whence they will travel by the London, Chatham and Dover Railway to Dover, which will be reached

shortly after nine o'clock. On the 19th the whole party will embark at Marseilles for Japan, whither they will take back a very extensive collection of works of art, jewelry, specimens of various kinds of English manufactures, books, &c. It is understood that his Excellency is greatly pleased with the facility afforded by the Earl of Clarendon for the
