OFFICERS:

President. COL. WM. B. THOMAS.

Sec. and Treas. pro. Tem., J. HOPKINS TARR.

> Solicitor, WM. L. HIRST, Esq.

DIRECTORS; COL. WM. B. THOMAS, CHAS. S. OGDEN, EDWIN MIDDLETON, ALEXANDER J. HARPER, WILLIAM BERGER.

The land of this Company consists of about 120 acre in Mecklenburg county, North Carolina, about 3: miles from the town of Charlotte. On this property 15 shafts or pits have been opened and sunk to various depths from 10 to 85 feet, demon strating the existence of three parallel veins of ore o

about 2 feet in width and about 15 feet apart; converging to a common centre at the depth of about 150 feet, for ming one immense mass or vein of ore extending is length through the property more than half a mile. There are also on this property other veins of ore un xplored. All these ores are known as the brown ores nd are very rich, yielding an average of about \$200 per ton in gold. The above results having been demonstrated by the rude working of the mines for several years past, the risk of investment is unde, veloped property is not incurred, and by the application of modern mining and reducing machinery the Company antici; ate an immediate and large return for their

Having an ore that readily yields \$200 per ton, some estimate can be made of the value of this property, with the present imperfect system of mining. Ten tons of this ore can be taken out und reduced daily he per ton leaving a net daily profit of \$1,780 for each shaft worked by the Company.

The large working capital reserved will enable the Company at once to procure and erect the best modern machinery for manipulating the ores, by means e which the yield will be largely increased.

These mines, whilst they produce ores richer than those of Colorado or Nevada, have many advantages over them, particularly in an abundance of feel and cheap labor, and the facility with which shey can be worked during the entire year, whilst those of Colo rado and Nevada can only be worked during the warm weather. A test assay of an average specimen of the ore from

the Carson Mines was made as late as the 27th o January, of the present year, as will appear from th following certificate of Professors Booth and Garrett the Assayers of the Philadelphia Mint: PHILADELPHIA, January 27, 1866.

Dear Sir:

We have carefully assayed the sample of ore from

Carson Mine, North Carolina, and find it to vield ten ounces nine penny weights of pure Gold to the ton o ore. The coin value is therefore \$216 02 per ton of ore Yours respectfully, BOOTH & GARRETT. DR. M. B. TAYLOR,

404 Walnut street. Philadelphia.
Subscriptions to the Capital Stock will be received a the office of the COMPANY, No. 407 Walnut street where samples of the ore may be seen and full infor
