THE LOAN AND TAX BILLS.

Presidential Rumor.

EXPLOSION AT THE ARSENAL.

Fatal Accident at Cincinnati.

From Washington.
[Special Despatch to the Bulletin.] The loan bill was again under considera-

tion to-day by the Senate Finance Committee. It will be ready to report on Monday. Mr. Wells, special tax commissioner, is in conference with the Ways and Means Committee on the Tax Bill. They are trying to mature a bill which will meet the views of Congress. The question of changing the Income tax meets with considerable opposition.

A gentleman high in authority asserts that, if Hawley carries Connecticut, the President will recede from his opposition to Congress.

The Committee who are engaged in maturing the bill equalizing bounties, have adopted Mr. Julian's proposition, and will probably report in a few days.

Explosion at the Washington Arsenal. Washington, March 30 h .- Yesterday afternoon there was another explosion at the Washington arsenal. A shell burst while two men were unloading it. One of them may lose several of his fingers by amputation.

The other workman sustained only a slight wound in the head.

Since the explosion at the Arsenal, several months since, by which ten persons were killed, this work has been carried on in sheds, widely separated, so that an explosion in one, cannot communicate to the others on the grounds. A great deal of this kind of war material has recently been brought to the arsenal.

Saw Mill Explosion. CINCINNATI, March 30.—The boiler of Davie's steam saw mill, near Mitchell, Indiana, exploded yesterday, killing two men and severely scalding two others.

From Fortress Menroe. FORTRESS MONROE, March 30.-The steamer Eutaw, from Mobile for New York, with cotton, has put in here short of coal. She reports heavy weather. A fleet of merchantmen, which sailed hence on the 28th, remains hove-to outside the Capes, under reefed sails.

Arrival of the Helvetia. NEW YORK, March 30.—The Helvetia arrived this morning from Liverpool. Her advices are anticipated.

Arrival of a Steamer. New York, March 30.—The steamship Vashington has arrived from Havre. Her advices are anticipated.

A NEW Horse-Shoe. - A Paris blacksmith has invented a new system of shoeing horses. Instead of the shoe being placed on the hoof and burning its own resting place, the outside of the hoof is cut away around the foot to the depth of half an inch; this leaves a ledge, into which the shoe fits, and is then flush with the frog, which just is then flush with the frog, which just touches the ground, instead of being raised, as of old, by the shoe. The advantages of this are that the foot is little pared, and that instead of a heavy shoe the animal is shod in what are little more than racing plates, The advantages claimed by the inventor are, that the horse never slips, that the shoe allows the foot to expand naturally, and that it lasts as long and is as cheap as the

A THIEF'S LETTER.—A thief was recently tried in London, upon whose person was found the following letter:
"Dear Old Pal—I write these few lines

"Dear Old Pal—I write these few lines hoping they will find you in prosperity, as it leaves me very seedy indeed. There is nothing doing this weather, for it is so cold that all the gents button up their coats so close that there is no getting attheir pockets; and as to the ladies, though they never carry much money, there's no getting at their pockets any how. I amgoing to have a smash at some jeweler's window, and if I am lucky it will be all right, if not, it will be all wrong. There's one thing I forgot; I be all wrong. There's one thing I forgot; I sacked a goodish many fowls and a goose or two at Christmas. So no more at present from your old pal. JOSHUA WHITE."

THE first number of the Chinese newspaper published in London by Professor Summers, under the title of the Flying Dragon, contains some general remarks upon the advantages to be derived from newspapers, a summary of European news including Lord Palmerston's death, the loss of the London, the death of King Leopold and the close of the civil war in America and the close of the civil war in America; next a dissertation upon railways, their usefulness, economy, and other advantages; and lastly, some information which it must have puzzled the worthy professor to put into Chinese, viz., advertisements of English products and businesses, patent cartridges, steam ploughs, matches, Colt's revolvers, etc. The second number contains a map of Europe. a map of Europe.

WHOLESALE SLAUGHTER.—At a recent bunt in the north of England, 4,511 phea-sants and 5,000 hares and rabbits were slaughtered. It is estimated that the num-ber killed were about one-third the number reared, so that in the preserve there must have been 14,000 pheasants and 15,000 hares and rabbits. To grow grain for the support of the birds would require the cultivation of 246 acres, and for the hares and rabbits,

COST OF THE MEXICAN EXPEDITION.-French official return shows that the Mexican expedition has cost France, up to the 31st of December, 1865, no less a sum that £27,000,000 sterling. The losses in the French forces, land and sea, have been 11,414 men, namely: Killed, 3,319; died from wounds or effects of climate, etc., 4,928; disabled for life, 3,167; grand total, 11,414.

Doctor J. A. Reed, of Baltimore, denies the whole theory of trichina. He says: "I boldly assert that the trichina never did and never will destroy human life; that they have in all probability existed in the human flesh always, certainly for the last half century; and I think it a fair deduction, taking it, for the sake of argument. as granted. it, for the sake of argument, as granted, that we may receive them through the instrumentality of the hog, that they are not more dangerous to life on that account."

No Light.—The London papers com-plain that there is not a properly lighted

GRAMMAR SCHOOL COMMENCEMENT. The first public commencement of the Southwestern Grammar School, Seventh section, was held in the church, Twefth and Lombard streets, on Thursday evening. It was an occasion of marked interest to all concerned. A. M. Walkinshaw, Esq., President of the Board of Directors, presided. The directors and the principal teachers of the section were present.

the section were present.

The exercises were opened with prayer by the pastor, the Rev. Mr. Rice, followed by a recitation in concert of the Twenty-third Psalm by the pupils, which was exceedingly well done. An able introductory address by Mr. Lewis Elkin, Controller, was well received. The other exercises consisted of singing, recitations, dialogues and the reading of original essays by the pupils, all of which showed a gratifying standard of

ability.

The closing address was delivered by George Inman Riche, Esq., a former Director, and was a very happy effort. He spoke in high terms of the present state of the school of the section, and hopefully as to future advancement. His remarks were received with much applause.

Diplomas were presented to nineteen boys and three girls, who graduated into the High School at the last examination.

Mr. Rainier, Principal of the boys' and Miss' Fales of the girls' school received well deserved praise for the high standard their schools have attained. Master James ability.

CITY TEMPERANCE SOCIETY.-A conference was held yesterday afternoon at the rooms of the Young Men's Christian Association, which was very largely attended by a number of the leading clergymen and laymen of the city. The meeting was addressed by the Rev. T. L. Cuyler, of Brooklyn, and others. The subject matter discussed was temperance, and it was at once arranged to organize a City Temperance Society. A committee of seven was appointed, consisting of the Rev. Messrs. Newton, Cleaveland, Tallmadge, Brooks, Col. Louis Wagner, Dr. S. W. Butler, and a Mr. Garrigues, whose first name we failed to obtain. The new society is intended to act in harmony with other existing organizations. The committee appointed to recommend the new organization are to report at an adjourned meeting, to be held at the same place, on Thursday, April 5th, at 4 o'clock P.
