## Final Report of the Germantown Freedmen's Aid Association.

Six months ago this Association had no existence. Many friends of the freedmen had been quietly but actively engaged in aiding the cause, either by individual effort or through other organizations.

But the loud cry for help from the South; the fact that the colored people in the South were dying by thousands for want of food, clothing, medical aid, etc.; that in fact many thousands stood in want of everything needful to life in this world, caused them to feel that more earnest efforts must be made, and that it was of the highest importance that an Association should be formed in Germantown, in which all who are interested in the cause might take part, and by their combined strength and zeal be enabled to do much good.

Accordingly, on the 23rd day of October, 1865, shortly after the formation of "The Women's Central Bazaar" in Philadelphia, a number of ladies met, with Dr. Rhoads, at the house of Mrs. S. D. Wharton, to confer upon the subject, and appointed a committee of twelve ladies, representing natives from most of the religious societies of Germantown, who were invited to a second meeting, to be held at the same place, October 28th.

At this second meeting Dr. Rhoads presided. A constitution was adopted; officers and a board of managers elected, and the Association regularly organized. After this the meeting adjourned, to hold the first meeting for business at the Dispensary Rooms, Nov. 2d.

At this meeting the Board of Managers was enlarged and committees formed. November 8th a general meeting was held at Langstroth's Hall, to which all were invited who were interested in the cause of the freedmen. At this meeting Dr. Rhoads and Dr. Paul spoke most impressively concerning the suffering in the South—relating incidents in their own experience, and reading letters from those who were working at different stations. They also told what had been done, and what was still being done in the formation of Associations in different States in the Union; and gave information concerning the organization which had just been formed in our midst.

So that many names were added to the list of membership.

The number of members is at present nearly 100.

The officers are a President, sixteen Vice Presidents, a Secretary and a Treasurer. The Managers number seventeen, and these are divided into Committees for purchasing goods, cutting out work, giving out and receiving work, valuing goods, packing, etc.

Since the Society was formed regular meetings for business have been held by the Board of Managers. For the first three months they were held weekly, and since then once in two weeks, at which the average attendance has been thirteen.

Every day, except Sunday, and a day or two during the Christmas holidays, the rooms have been open, and committees have been present, to cut out work, also, to receive donations, to give out work to those who were willing to do it, and to receive work that had been finished.

Much of the sewing has been done by those who work for a living, and who were paid their labor either by the Employer, or by the Society, or by members of the Association. And in this way the Society has been the means of helping the poor at home, as well as those in the South.

Three hundred and twelve garments were cut out by the Friends' Association in Philadelphia, and over seventeen hundred have been sent out by the committee of this Association. Most of these have been made and sent to the Women's Central Branch in Philadelphia, to be forwarded by them to the South.

There has been much new clothing, much second-hand clothing, and a large quantity of books and papers contributed, so that, during the five months the Association has been able to send away two thousand three hundred and fifty-seven new garments, valued at three thousand three hundred and twenty-eight dollars (\$3,328); second-hand clothing valued at more than six hundred dollars (\$600); shoes, one hundred and seven dollars (\$107); books and papers, about ten dollars (\$10); toys, three dollars (\$3); thread and needles, one dollar (\$1); besides, thirteen pairs of blankets and a comfortable, the value of which was not estimated. Making a total of not less than \$4,000.

For the use of room in which to work, and hold meetings for consultation, etc., the Association is indebted to the Board of Managers of the Germantown Dispensary, who have kindly granted the use of their room, free of rent.

A few of those who belonged to the Board of Managers at the commencement, have fallen away from the ranks, and the vacancies called upon to resign the position, but the vacancies have generally been filled, so that the number remains almost unaltered.

There are in the Board representatives of many different religious views; many, who were, until this Society was formed, strangers to each other, and who have since have worked together harmoniously, and pleasantly, showing a liberality of feeling, and a Christian charity, which is very gratifying. And, as the term for which the Association was organized, has expired, most of the members are unwilling to give up the work which has thus far been carried out so successfully, and it has been proposed that to-day the Society shall be re-organized; principally for educational purposes.

We all know that for many, many years, the education of the black man in the South has not only been neglected, but even forbidden; and he has been allowed to live—or rather forced to live, in a state of so much ignorance and vice, that many were almost tempted to think him incapable of anything good or noble; but proofs to the contrary have within a short time past been so numerous and satisfactory, that all are now convinced that all that he requires is the opportunity, and he will eagerly embrace it. And being thus convinced, it becomes our duty to weave no stone unturned which will aid in placing him in such a position as his Maker designed him to fill.

MARY Y. BROWN, President.  
SUSAN D. LEXERAN, Secretary.  
Germantown, April 6, 1866.  
N. B.—Since writing the above the Association has been re-organized; and the managers will be glad to help from those who are willing to aid in the work.

S. D. L.  
TREASURER'S REPORT.  
Received during the five months  
in donations, - - - \$1,419 70  
Monthly subscriptions, - - - 1,538 39  
Initiation fees, - - - 45 06  
Total, - - - \$3,003 14  
Expended for Mdse, &c., - - - \$2,593 74  
Balance in hand April 1st, - - - \$410 60  
EUGENIE DORSEY, Treasurer.

## FENIANISM ABROAD.

### MOVEMENTS OF HEAD CENTRE STEPHENS.

#### The Fenian Armament in Dublin, &c.

The following is the intelligence received from the agent of the L. R. B., who arrived at New York in the steamship Atlantic; STEAMSHIP ATLANTIC, DEPARTURE, APRIL 1, 1866.—Stephens all right—landed safe in Paris. But at the time of his departure from Ireland Mrs. Stephens arrived at Cork, on her way to America, and brought before the magistrate, was speedily made aware that arrangements had been made to deliver him from the grips of the Saxon, and no difficulty was experienced in effecting his release. That the Irish police have ever been on the point of seizing him Mr. Stephens denies, and until he considered it necessary in the interests of the cause he advocates to leave Ireland, in order to cross the Atlantic and have a friendly chat with his American colleagues, Mahony, he remained unmolested in Dublin. He never even resorted to any disguise.

New York Rumors about Stephens. The Union Square headquarters presented yesterday, a scene of unusual activity. Inside the Fenian dignitaries were busily engaged in hurrying forward preparations to meet Head Centre Stephens, who was expected to arrive on the Havre steamship due at this port to-morrow; and the ball of activity was kept in motion by the spies from Mr. Archibald's headquarters at the Union Square. The following facts were made known to our reporter, on his visit to headquarters last night.

James Stephens, on his arrival to-morrow, is not expected to accept, much less to court a public ovation. His visit to this city will be of the very shortest duration, and he will depart for his home on a predetermined arrangement. The real cause of his visit will be withheld till the day of his departure, when it shall then be made known to the public.

His chief attendant and companion in his flight from Ireland, arrived in this city on yesterday morning, by the steamship Atlantic, from the four corners of the earth. He is a man of high standing in the Fenian ranks, and is believed to be the highest degree with the instructions conveyed, and are as busy as possible arranging preliminaries to meet the exact views of the Fenian leaders.

### THE FENIAN ARMAMENT—A RESUME FROM DUBLIN (March 27) Correspondence of London Times.)

The Fenian armories, there is reason to believe, have not all been discovered, and must have been in work for a considerable time, and of the immense quantities of weapons they must have turned out, only a small portion has been discovered by the police. Rifles and revolvers, too, must have been purchased to a large extent, while the number of fire-arms surrendered in obedience to a day of truce, has been very small. There is ground, therefore, for apprehending that if the government had not frustrated the designs of the conspirators, there would have been a serious outbreak had occurred. Stephens could have mustered a formidable number of well-armed men. The discovery made yesterday of the Fenian armories, and the fact that the Fenian armories, there is reason to believe, have not all been discovered, and must have been in work for a considerable time, and of the immense quantities of weapons they must have turned out, only a small portion has been discovered by the police. Rifles and revolvers, too, must have been purchased to a large extent, while the number of fire-arms surrendered in obedience to a day of truce, has been very small. There is ground, therefore, for apprehending that if the government had not frustrated the designs of the conspirators, there would have been a serious outbreak had occurred. Stephens could have mustered a formidable number of well-armed men. The discovery made yesterday of the Fenian armories, and the fact that the Fenian armories, there is reason to believe, have not all been discovered, and must have been in work for a considerable time, and of the immense quantities of weapons they must have turned out, only a small portion has been discovered by the police. Rifles and revolvers, too, must have been purchased to a large extent, while the number of fire-arms surrendered in obedience to a day of truce, has been very small. There is ground, therefore, for apprehending that if the government had not frustrated the designs of the conspirators, there would have been a serious outbreak had occurred. Stephens could have mustered a formidable number of well-armed men.
