THE DAILY EVENING BULLETIN; PHYLADELPHIA, FRIDAY, MAY 4, 1866.

American Medical Association-Interest-ing Discussion on the Cholera Question. BALTIMORE, May 3.—The American Medical Association had an interesting session

to-day. Dr. Marsden, of Canada, addressed the Convention on the subject of the cholera. He said, my experience is coeval with its arrival in this country. I witnessed the first case on American shores. Much harm has been done in arriving at the truth of its progress, through the public press, by the dissemination of false statements on

every occasion. It was introduced from abroad, and was traceable in the backward path to the old world. The first case in Quebec was on board of a vessel just arrived from Liverboard of a vessel just arrived from Liver-pool, where the disease was raging. The aggravation of the disease in Canada was, in many cases, due to the practice of hold-ing wakes over the bodies of such as had died with cholera. Cholera was introduced into Canada by the closing of the quaran-tine. The seed of the disease is produced in for is one door is one for its adin India. But one door is open for its admission into Canada.

A commission appointed to investigate the subject in Canada decided that in cer-tain towns in Canada all the first cases of cholera were traceable to passengers from infected vessels. They traced these passen-gers to numerous districts, hundreds of miles apart. Such houses only were at-tacked as they had frequented and where

tacked as they had frequented and where they had opened their baggage. The radius of the disease is very small in certain isolated cases. In the very midst of the attacked region a school of young ladies entirely escaped. The disease is en-tirely controllable and infinitely less fatal and terrible than the typhus fever. I have bad the cholera several times, and would makes have it as many times more than the had the cholera several times, and would rather have it as many times more than the typhus fover once. If the disease were epidemic we could not control it. The disease is in the secretions. It is infectious, and especially through clothing used by those who have died of cholera. The clothing ought to be destroyed in such cases.

in such cases. Dr. Marsden distributed to the Association copies of the printed plan of quarantine for cholera. My plan consists of one single landing place. The establishment is di-wided into three sections; the cholera, pri-The cholera diarrhœa matures in about

three days. These sections are adapted to the particular stages of the disease. By this plan the disease cannot be disseminated this plan the disease cannot be disseminated by infectiou. Four days in the primary, with two in the final, is sufficient. Persons who have had the cholera are less liable to take it again. No communication is per-mitted personally between any of the departments and the outside world.

Dr. Lee moved that the thanks of the As-mociation be tendered to Dr. Marsden, for his interesting and practical address, and the request of the body that he furnish it,

the request of the body that he furnish it, with a digest of his communication. Dr. Bond amended, that those papers ac-companying the lecture be commended to the city authorities, and the authorities hav-ing such matters in charge throughout the **country** for their action.

Dr. Jewell thought the matter should be further investigated, and moved its reference to the Section on Hygiene, which was to meet this afternoon. The special business of the day was sus-

pended to allow the Committee on Nominations to report. The Committee reported the following

nominations:

mominations: President-H. F. Asken, Delaware. Vice Presidents-W. K. Bowling, Ten-nessee: J. C. Hughes, Iowa; H. J. Bow-ditch, Massachusetts; Thos. C. Brinsmode, N. Y. Permanent Secretary-Wm. B. Atkin-

son, Pa. Treasurer-Caspar Wistar, of Pennsyl-

vania. Assistant Secretary--W. W. Dawson, of Cincinnati. The place recommended for the next an-nual meeting of the Convention is Cincin-

ferent portions of the city. The first case was at Richmond; the second at Eighth and Spring Garden streets, and the third in Moyamensing. These were all in the cen-tre of the city, except at Richmond, and remote from the Delaware.

In 1832 the first case was on the Schuyl-kill, on a canal boat that came down from the upland country. There had been no foreign arrivals in Philadelphia. It came from a poisoned streambers In 1840 roc from a poisoned atmosphere. In 1849 no files were living. In Wheeling the birds died. The doctrine of contagion is dan-gerous, and will deprive the sick of assist-ance. Small-pox does spread, and if we had not vaccination it would spread more than it does

than it does. Contagion and infection are distinct. Contagion is the principle communicating the disease from one person to another. It is not so with cholera. There were no cases of contagion in 1832 or 1849. No vessels arrived with the cholera on board; they may have arrived after the disease ap-

I am sorry the resolution was introduced. Next year we will be better able to test the value of Dr. Marsden's information. The poison of cholera will increase rapidly by contact with filth. It is only by purification of the city that cholera can be pre-

vented. vented. Dr. Lee followed with some brief remarks sustaining the views of Dr. Marsden. The cholera is contagious under certain circum-stances. Certain neighborhoods of a very filthy character were not attacked until emigrants came there. The Committee of the Whole then rose

and the Association adjourned withcut further action. The members of the Convention are being entertained to-night with a grand banquet,

given by the city.

From Fortress Monroe-The Absconding Steamer. FORTRESS MONROE, May 2.—It is now stated positively in Norfolk that Deputy United States Marshal Barry and a guard United States Marshal Barry and a guard of six soldiers were on board the steamer Washington Irving when she so suddenly absconded from that city, several days since. The Marshal and his guard, who were landed at Fort Norfolk by the captain of the steamer, has made a statement, according to the Norfolk papers, that having received the amount of the United States claim from her owners, he felt no interest in the collection of those due the city, and consequently made no effort to detain the boat. boat

mh15-2m3

It was ascertained yesterday afternoon, by

a steamer sent out by Major General Miles, that the fugitive steamer had disappeared and proceeded to New York. A public meeting of the friends of the Bible cause was held in the Camberland Street M. E. Church of Norfolk on the even-ing of April 30th for the nurnose of organing of April 30th, for the purpose of organ-izing a Bible Society in that city as an auxiliary to the Virginia Bible Society. Measures were adopted by the meeting by which the Bible cause would be brought before the congregation of each church in the city for the purpose of obtaining contribu-tions for the furtherance of the object of the

society. The steamer Chartes Houghton, lately running on a route between Norfolk, this place and Hampton, finding the same not of a paying nature, after a two months' trial,

a paying nature, after a two months trial, sailed for Boston a few days ago. The steamer Chickamauga, formerly known as the blockade-runner Edith, and sunk by the Confederate forces, near Indian Wells, on the Cape Fear River, during the attack on Fort Fisher, has been raised by the firm of Messrs. Brown, Maltby & Co., of Norfolk, Va., and has arrived at that city. The Chickamauga is a twin-screw iron pro-peller, with double chimneys. A twelve-pounder parrott gun is the only remaining one of her former armament now on board. Her speed from Wilmington to Norfolk

averaged 7 knots, and she had only one of Window and Picture Glass her two engines in use. The schooner Palestine has arrived at Norfolk with a cargo of machinery for the erection of a large steam saw-mill on the line of the Seaboard and Roanoke Railroad, about twelve miles from Portsmouth, Va. The enterprise is being undertaken by a joint stock company of Northern capitalists, and is known as the Thomaston Lumber Company. They have purchased a large tract of timbered land convenient to the fe28-8m railroad, and are now building a branch road to connect with it. The mill shortly goes into operation. goes into operation. A grand ball was given last evening on the U. S. gunboat Connemaugh, lying in Hampton Roads. The Connemaugh has been ordered to a Southern station, and the event was intended to reciprocate kindnesses extended to her officers during their sojourn at this place. The large sale of quartermasters' property, under the direction of Colonel A. P. Blunt, Assistant Quartermaster, commenced here to-day, and will be continued until all the articles offered are disposed of. A heavy thunder storm, accompanied by a fierce gale of wind and hail, prevailed here for about two hours last night. To-day it cleared off. The United States gunboat Ascutney.Capt.

nati, on the first Tuesday in May, 1867. A delegate moved the appointment of Dr. Warren in the place of one of the appoint-ments, saying that befound no one formerly attached to the Confederate army appointed upon any Committee, or in any position of responsibility.

EVENING SESSION.

The Association reassembled at 5 o'clock in the afternoon, and resolved itself into a Committee of the Whole, Dr. Davis, in the chair, for the discussion of the subject of cholera.

Dr. Sayres (N. Y.) considered that the diease could not reach here unless it was brought here. It cannot be generated here. It multiplies its ravages when filth and un-cleanliness abound. It is generated in a sandy level country, beneath a tempera-ture of 128°. Then the decomposing animal and vegetable substances originate this peculiar power. It goes with the individnal, and not by atmospheric power. We must not confound ordinary diseases

of the bowels and Asiatic cholera. We are responsible for permitting it to get in the land. A rigid, proper quarantine, univer-sally adopted by the General Government, in combination with the British provinces, would prevent its admission to our Conti-nent. We have no quarantine rightly considered

The disease in 1849 did not originate in Baxter street, New York, but followed from the escape of an infected person from quarantine. The cabin passengers escaped because the disease had not traveled two hundred feet nor ten feet from the steerage to the cabin. I do not believe in mysteries, but facts. I

see and understand in my way. 'If the val-nable information that I have obtained from br. Marsden were put into practical opera-tion by the General Government, millions of money and millions of lives would be saved.

Dr. Linton protested against the doctrines advanced this morning and evening. We have medical journals through which we nave mencial journals through which we can discuss this subject a long time before the cholera will get here, and a long time before the quarantine could prevent its get-ting here. Who can believe that the cholera could have been prevented from coming here in 1849. I do not believe that it is any more

Dr. Bell said the facts presented by Dr. Marsden are inconsistent with my own facts and the results of my own observation. He traced it first from a brig in Liverpoo

He did not say the cholera existed in Liverpool at the time. I believe the cholera can be traced to various places other than Asia. If cholera is contagious it takes va-rious roundabout ways of making short journeys. It took an exceedingly rounda-bout way to the principal cities in Eu-

rope. Dr. Sayres said the quarantine law of New York, as now enforced, is a disgrace to civ-ilization. Dr. Kerrigan and myself and others saw the cases on Ward's Island, and we came to the conclusion that they were

We came to the conclusion that they were not cholera. We saw the dying and the dead, and came to the conclusion that if the whole hrstory of the cases on Ward's Island was known, they would be found not to be the

cholera. Dr. King presented a series of resolutions indorsing the quarantine plan of Dr. Marsden, and recommending its adoption by the General Government. Dr. Jewell said, I have been charged

Dr. Jewell said, 1 have been charged with disseminating a cholera excitement. I have done all I could to prevent its en-trance to Philadelphia. Cleanliness and wentilation will do much more to that end

The United States gunboat Ascutney, Capt. Nathaniel Morgan, arrived here this after-noon from Richmond, Va., with Assistant Secretary of the Navy G. B. Fox, Captain Wise, of the Ordnance Department at Washington, D. C., and several other per-sons of note. The steamer Colonel Rucker, serviced here to day from Wushington D. C.

arrived here to-day from Washington, D.C., with a cargo of fifty tons of old musket barat the destruction of an arsenal in that city. colonel Baylor, chief ordnance officer here,

designs enlarging his workshops for the purpose of executing the needed repairs to them. Five hundred tons of the same material, it is understood, are on the way to the arsenal here for the same purpose.

Excitement at Memphis. MEMPHIS, May 3.—About unrty honses, occupied by negroes, and all their school houses in South Memphis, were pulled down or burned last night. Ten of them were killed during the day. This morning it was hoped order would be restored. The it was hoped order would be restored. The negroes mostly fled to the woods, but are

negroes mostly hed to the woous, but are returning to-day. MEMPHIS, May 3.—The city remains quiet up to nine o'clock this evening. The negro soldiers recently mustered out were paid off in Fort Pickering to-day. They threaten to burn the city to-night. Great uneasiness is felt. They are kept in the fort by a votion of the lift Bacgulars

by a portion of the 16th Regulars. General Stoneman, this afternoon, served a notice upon the mayor, council and county officers, forbidding the assembling of any bodies of armed men, black or white, except the police, so far as they are to be relied upon to preserve the peice. A large number of negroes were arrested to-day and found heavily armed.

JOHN BROWN'S soul has gone to editing newspapers. The following public journals are edited by colored men: The Colored Ten-nesseean, Nashville; the Communicator, Balnesseean, Nashville; the Communicator, Bal-timore, Maryland; Christian Recorder, Phil-adelphia; Anglo-African, New York; Pacific Appeal, San Francisco, California; Elevator, San Francisco, California; Colored Citizen, Cincinnati; New Orleans Tribune, National-ist, Mobile, Alabama; Loyal Georgian, Au-gusta, Georgia, Five of these, it will be no-ticed, are published south of Mason and

Dixon's line.

THE Oxford Undergraduates' Journalan-nounces that Professor Jowett's new edition of Plato will be divided into three parts, of which the first will contain fragments of the writings of Greek philosophers up to the time of Plato; the second, Plato's "Repub-We had the epidemic in the summer of some of Professor Joyett's friends.
