To LIVE LONG, GRT KNIGHTED.—Here is a bit from an English paper: "With the aid of Debre's Peasage and Barona's we have arrived at some interesting facts. It is known that the general average of human life in the British Islands is about 35 years. It is, therefore, worthy of note, what effect good living and other causes have on the average of life. In 1835-6 there died fourteen peers, whose united ages amounted to 931 years, or an average of a little over 66 years each, the youngest being 52. But, most remarkable of all, there died 8 knights, whose ages amounted to the total of 2,714 years, or the remarkable average of 73 each. The oldest (Sir F. W. Aston) was 91 years of age, and the youngest (Sir R. M. Bromley), 62. All who value long life had better be knighted at once. It seems as if knighthood were the elixir of life."

A PHILOSOPHER'S CROTCHER.—At a late meeting of the Royal Society of Edinburgh, Professor Plazzi Smyth gave an account of his recent measurements of the great pyramid, and his deductions therefrom. He ascertained that standards of capacity of weight were observed, he was led to look, in the grand gallery, for the measurement of time. It is known that the height of the gallery with that of the passages approaching it, he found that the height of the latter was about one-seventh that of the former. The distance between the Queen's Chamber, which had been such a puzzle to the learned, that he found the most conclusive evidence in support of his theory, and that the pyramid sided, and not only so, but one of the sides was pushed outwards about twenty-five inches, as if to indicate that while six were ordinary days, the seventh was more noble and glorious!

AN IMPORTANT MUSEUM FOUNDED.—By the liberality of a gentleman engaged in one of the learned professions in London, a museum has been founded in Salisbury, Wiltshire, which bids fair to become one of the most important of its kind in England. It is known as the Blackmore Museum of Geology, and is chiefly illustrative of ethnology. The Drift of Salisbury has furnished a large and important series of stone implements. The valuable collection of Dr. E. H. Davis, of New College, Oxford, has been purchased—a large portion of which was obtained by Dr. Davis and Mr. Squier from the Ohio Mounds, and to a description of which the volume of the publications of the Smithsonian Institution, Washington, United States, is devoted. The stone series from France, Denmark, Switzerland and other localities, will be extensive.

PERILS BY THE WAY.—A writer in the London Reader says that in that city the population is indefinitely augmented by hourly arrivals from all parts of the world. The metropolis is clasped, intersected, and undermined by railroads. Broad streets are building for the reception of the swarming hordes of the cities of the East. A portion of his bed for the construction of new highway, and gigantic hotels, springing up in all quarters, are unable to supply accommodations for the increasing number of visitors; and the crush and crowding is daily becoming more perilous to human life. Last year one hundred and forty persons were killed on the streets.

THE BRITISH ROYAL ACADEMY.—It is announced that although the Royal Academy in England has resolved to enlarge the associate class indefinitely beyond the present limits, and to receive as members of the class persons who are not of the same rank as those of the interior body; it is only to inaugurate the same or nearly the same, average merit as those who are to enjoy the title; the honor is not so lowered that it will be little credit to receive it, and a disgrace to be without it.

VOLCANIC ISLANDS.—An essay on the new volcanic island in the Grecian Archipelago is given in a French scientific journal, from which it appears that the group of islands of which this one has been subject to earthquakes and volcanic eruptions since the beginning of the Christian era. The latest serious eruption took place about one hundred and fifty-five years ago, and did considerable damage. The present one was predicted three years ago by Von Buch and other geologists.

"LITTLE GO"—The result of the recent "Little-go" at Cambridge was that out of about three hundred and fifty men, one hundred and sixty were either "scatched" or "plucked." This proportion, says the Pall Mall Gazette, is enormous when one considers that in the two triposes were approved for the mathematical, and only about five for the classical. The Greek Testament appears to have been a fruitful source of error.

TWO ABUSED PERSONS.—A recent duel in Presburg has created a great sensation. Prince Lechnowsky and his friends have risen from a table when Count Nemes seats himself; the latter felt as a personal insult, challenged the prince, and the latter took place with pistols at twenty paces. The count received his adversary's bullet in the stomach, and the ball traversed the front, wounding the lungs. Only a few hopes are entertained of the count's life.

NEW ZEALAND UNPLEASANT.—An old English soldier, who was in the 42d Regiment during the Crimean war, has sent the following brief despatch to his former lieutenant and master: "Auckland, New Zealand, 4th February, 1866. Seaforth, Honored Sir: Since the departure of Gen. Sir D. A. Cameron from this colony, it is almost a miracle to the very verge of hell itself. Excesses have, ever your honor's obedient servant."

RECLAMATION OF FALLEN WOMEN.—The persons engaged in the reclamation of fallen women, who were as the "Midnight Meeting Movement" held their annual meeting last in London. Twenty-six meetings have taken place in various parts of the metropolis, and three hundred women have been induced to abandon their immoral course of life. It was believed that a thousand have been reclaimed.

ROMAN REMAINS IN PARIS.—In digging the foundation of the new Hotel Dieu in Paris, a Roman wall has been discovered, made of cut stones, measuring from one meter to one meter five centimes in size. Several columns have also been discovered, one of which is surmounted by a capital of the Ionic order. The wall is supposed to be of the Roman temple discovered beneath the crypt of Notre Dame.

FIFTH AVENUE, NEW YORK, does not appear to suffer from any serious influences. Receptions and parties are as numerous as ever, and the increased demand for that class for Mr. Speer's Samberg port wine. Twenty-one million bottles of the analysis of its properties was first published by James R. Chilton & Co., those who could afford it immediately adopted its use in preference to foreign wines. Prof. Chilton uses it in his own family, and has written to the public a card recommending it.—New York Times.

SALT IN LOUISIANA.—On Petite Anse Island, in the southern part of Louisiana, there is a bed of rock salt covering over 100 acres, which, during the late war, supplied nearly the whole of the trans-Mississippi district. Twenty-one million pounds were taken from it in three months. It is reported that but a very small portion of the deposit has been cut away. Immediate steps are now taking to develop the mine.

SPECIAL NOTICES

NOTICE.—A Meeting of the stockholders of the PHILADELPHIA MINING COMPANY OF COAL, will be held at their office, 407 Chestnut street, on THURSDAY, the 14th inst, at 10 o'clock M. E. R. DWIGHT, Secretary.

GROCERIES

LOVE IN A COTTAGE. They may talk of love in a cottage, And bowers of trellised vine, And Nature bewitchingly simple, And milkmaids milking divine. They may talk of pleasures of sleeping, In the shade of a spreading tree, But what I prize most for my supper Is a good cup of Young Hovson Tea.

The Tea should be good however, Such for instance as that you get of WEST & BROWN, No. 509 Chestnut Street. These gentlemen possess facilities enjoyed by few of their coopeers in the trade. Hence their ability to supply their patrons with a first class article at a moderate price. Our advice to all in quest of delicious Tea is, GO TO WEST & BROWN.

WEST & BROWN, 509 Chestnut St. GREEN PEAS, Green Corn, Fresh Peaches, Fresh Tomatoes, Plums, &c.

MEDICAL

BENEDICTINE MONKS OF THE ABBEY OF FEBCAMPE. This Cordial, which dates as far back as 1100, is an anti-apopleptic tonic, digestive, and of an exultate taste. The salutary plants which compose it, gathered on the slopes of the hills of Normandy, saturated with the vivifying emanations of a Northern sea, makes it one of the best cordials and one of the most efficient preventives against epidemic affections.

Of late, the French medical corps has been almost unanimous in prescribing its use to the sick who, by their imperfect gastric disposition, were more liable to the attacks of fevers and cholera.

A. LEGRAND, Sen., Febcamp. Also, RUE VIVIERNE, No. 19, Paris.

This Medicine is found at the Wine and Spirit Stores, Apothecaries, Confectioners, and Groceries, &c., all over the World.

VOX POPULI. WRIGHT'S TAR SYRUP. PRINCIPAL DEPOT, 78 SOUTH THIRD ST. PRICE, 50 CENTS PER BOTTLE.

The undersigned citizens take pleasure in cheerfully recommending this medicine to the public, for coughs, colds, consumption, whooping cough, spotted fever, influenza, diphtheria, in the throat, bronchitis, inflammation, and constriction of all vessels in the throat, &c. It is a most valuable remedy, and is sold by J. F. DUNTON, 151 South Front Street, Philadelphia.
