Maryland-Gov. Swann's Reconstruction Plan.

BALTIMORE, May 12.—The following important letter from Governor Swann appears in to-day's American, which has thrown a bombshell into the Union party of Mary-

To the Editor of the Baltimore American Sig:—In the Hagerstown Herald and Torch, of the 9th inst., noticed in the American of this morning, I find my name announced as one of those expected to be present with Hon. J. A. J. Cresswell, Hon. Frencis Thomas, Hon. J. L. Thomas, General Garfield, Hon. Archibald Stirling, Hon. Henry Stockbridge and William Daniel, Esq., at a mass meeting to elect ten delegates for each district, to meet in county convention, on Tuesday, May 29, for the purpose of choosing six delegates to represent Washington county in the Union State Convention, called to assemble in Balti-more, on Wednesday, the 6th of June, in the call for that meeting, signed by E. Mobley, President. It is with extreme regret that I witness some of the most useful and reliable Union men of Baltimore, belonging to the State Baltimore, belonging to the State Central Committee, characterized as disunionists. It may be proper for me to say that I recognize the unconditional Union State Central Committee as the only authorized to call a convention of the Union party of this State, and I am not aware by vhat authority, under former party usage this call of a convention is appointed to take

The recognized chairman of the uncondi-tional Union State Central Committee, with utive Committee of that body, having called a general meeting of the committee to take place on the 20th of May, which will result place on the 20th of May, which will result in a call for a similar convention of the people, we have the Union party of the State of Maryland thus hopelessly divided. What are we to gain by this? I deem it due to myself to say that I shall advise my friends to adhere to the regular organization of the Union party, and shall await the action of the recognized State Central Committee under the call now pending, and the Convention of the people which should come together under that call. I gave no authority for the use of my name at Hagerstown meeting, and am sorry to say that I differ very widely from many of the distinguished gentlemen announced to speak on that occasion. As I am daily placed in a false position in the meetings which are being held in this State, and appealed to in many quarters by persons desirous of knowing my present political status, I will avail myself of this occasion to say that the opinions expressed by me in my annual message to the Legislature, in January last, and which received the indorsement the popular branch of that body have under

gone no change.

It may be proper, however, that I should be a little more explicit. I am for keeping the control of the Government in the hands of loyal men exclusively, now and at all times. I am for the reconstruction of the Union by admitting the revolted States to representation in Congress, provided they elect men of undoubted loyalty, prepared to take the oath required by that body. The masses of the Southern people I am pre-pared to trust, because I believe they have en deceived by ambitious and designing leaders. With Congress will rest the power to protect itself and the country against dis-loyal candidates seeking admission into our National councils. I am for maintaining the integrity of the unconditional Union party, which sustained the Government in its efforts to put down this rebellion, and

am for adjusting our domestic differences within our ewn lines.

I am utterly opposed to universal negro suffrage and the extreme radicalism of certain men in Congress and in our own State negro suffrage. I look upon negro suffrage and the recognition of the power in Congress to control suffrage within the States, as the virtual subordination of the white and in view of the action of certain extreme men in Congress for three months past upon the bill to introduce universal negro suffrage into the District of Columbia, against the unanimous voice of the people, the enlarged Freedmen's Bureau bill, the Civil Rights bill, and, finally, the reconstruction scheme of the Committee of Fifteen, I consider the issue upon this subject of negro suffrage well made, in the fall elections, and it will be the most important question that has ever been brought to the attention of the people of the State of Maryland.

Ideny that the admission of the revolted States by loyal representatives subjects the reconstruction plan of the President to the charge that no guarantees have been secured for the future. The States asking admission have, by a constitutional amendment, granted universal freedom to the ne-gro, and they have further guaranteed in another form, a repudiation of the debts in-curred by them in the rebellion. These guarantees I deem as securing for the presthese views I believ I am sustained by the almost united voice of Provident Cabinet, composing many prominent Republicans who have been the friends of both Presidents Lincoln and Johnson.

I look upon the war now being waged upon President Johnson as ungenerous, unwise and uncalled for, and I believe that its longer continuance will greatly embarrass the National prosperity, by keeping alive a state of uncertainty and distrust in the public mind both North and South; certain to eventuate in financial trouble, affecting the tide of immigration now flowing in upon us; the domestic commerce between the States, and exercising a most destructive and paralyzing influence generally upon all the great interests of the country.

I am, gentlemen, with great respect, your obedient servant,

THOMAS SWANN.

obedient servant, THOMAS SWANN.
Annapolis, May 10, 1866.
The American has, with the leading Union papers of the State, strongly approved the conditional Union movement, at the head of which are Congressman John L. Thomas Senator Creswell, any many others. whilst Swann goes against them. The American's editorial take issue with Swann, and persists in the unconditional men car rying out their programme.

Aiding the Work of Reconstruction.

The following letter, written to the Secretary of the American Union Convention of Pennsylvania and New Jersey, by one of the ladies sent from the Keystone State to the South, will show that benevolence and Christianity can aid the Government in the work of reconstruction as much as they did work of reconstruction as much as they did in prosecuting the war against rebellion: ATLANTA, Ga., April 30, 1866.—Mr-Joseph Parker, Secretary. DEAR SIR: A month has elapsed since your visit to Atlanta, and I will commence the pleasant duty of report-ing progress to your esteemed Association. The Free Schools in this city, established

by your Commission, are in a flourishing condition. The trouble with us is not how shall we get the children into school, but how shall we keep them out.

The teachers all manifest a great interest in their work, and labor diligently. Each teacher has from eighty to one hundred scholars. All feel very sorry to refuse admittance to a single child, but find it impossible to admit all that apply: consequently, almost every day children are refused admit all that apply: consequently, almost every day children are refused admit all the apply all the apply and all the apply are all the apply and all the apply are all the apply apply are all the apply apply and all the apply apply are all the apply apply are all the apply are all the apply are all the apply are all the apply apply and apply apply apply apply apply are all the apply apply apply and apply ap mittance, for the reason the schools are already full. Many articles of clothing have been received from the Ladies' Union Aid

of Philadelphia, and have been distributed among the scholars. At the close of the term I will send you a list of articles issued to the destitute children from the opening to the closing of the term. The general appearance of the children is very much improved. I wish your association and generous contributors could see the improvement of the scholars, and

hear the expressions of gratitude from parents who, having been impoverished by the war, are unable to pay for educating their little ones.

Could they see and hear as we do, they would be encouraged, and renew their efforts to carry on one of the noblest works ever commenced in the South, and which is doing more to remove prejudice and restore union between the sections of country estranged by civil war than anything tha

has yet been attempted. The weather is very warm. The close of the day usually finds us almost exhausted, yet, after a night's rest, the duties are again resumed. Not one teacher has been absent from her post a single day since the opening of the schools. Hoping friends at the North will not weary in well-doing but will continue in the good work, and kindly remember the little band of laborers in the will say, good night. Very respectfully, yours, HARRIET M. PHILLIPS.

FROM CANADA.

The Gold Region—The Prospects of the Diggings-Contrast of the Expenses of Mining Between the Gold Regions of the Pacific and Atlantic Slopes—Prac-tical Views of Actual Mining Opera-tions and Superintendence.

Correspondence of the N. Y. Times]. QUEBEC, Monday, April 23.—Now that the season for "prospecting" in the gold fields of Canada is again coming round, and as several United States companies are already interested, it will be of some consequence to your readers to know what pro-gress has been made in bringing to light the hidden treasures of this interesting region, lying so close to our borders, to the great centres of capital and enterprise, and partly within our own territory. It seems, in the first place, necessary to disabuse the mind of an impression that has heretofore been somewhat prevalent, to the effect that it was useless to expect any very rich deposits of gold on this continent to the eastward of the Cordilleras, or great chain of the Rocky Mountains, and even since Colorado, on the eastern slope of the mountains, has exploded that theory, a prejudice has still existed against the probability of finding anything of so rich a character, so near at home as the Eastern States and Canada. It is true that the gold mines of more or less worked for a long period, without such results as have accrued from the development of California and the other mining territories, which may be termed the offshoots from it. But it must be borne in mind that the great impetus given to the gold-mining of the present day arose from the accidental discovery of the rich alluvial diggings of Cali-fornia having induced a rush of people

to the mines, who, without means of retreat, had either to work orstarve, and hence produced that extraordinary developmen which by the time the alluvial diggings were being exhausted, had been extended to the more permanent enterprise of quartz mining and produced a class of skilled miners, whose vast numbers have spread themselves over territories and countries which had not previously been known to contain gold, and discovered new fields for their enterprise, of the richest character; nor is it at all certain but what when the skill thus acquired is applied even to the mines worked with only partial success long since in Virginia, they may be found as produc-tive as those of localities developed under the stimulus given to such enterprises of late years. But, even if otherwise, it would be no proof against the richness of the gold fields of the Eastern side of the continent I am utterly opposed to universal negro suffrage and the extreme radicalism of certain men in Congress and in our own State who have been striving to shape the platform of the Union party in the interests of gold fields of Virginia were proved to form of the Union party in the interests of negro suffrage. I look upon negro suffrage and the recognition of the power in Congress to control suffrage within the States, as the virtual subordination of the white race to the ultimate control and denomination of the negro in the State of Maryland; sections of the Eastern gold fields, where the auriferous formation again appears on the surface of the control of cortain extension of the surface of the sur our northeastern frontier in Vermont, New Hampshire and Maine, and more extensively in Lower Canada and Nova Scotla. The latter at any rate may be taken as a positive proof that at least some of the Eastern gold mines may be as rich as those of the Pacific slope, and their splendid success may serve as an indication of what the re-sults will be in Canada—where the most extensive outcrop of the auriferous forma-tion occurs—and the adjoining high lands

near and along the boundary. Gold mining in Nova Scotia is indeed but in its infancy yet, so that although there are in all thirty-three small mills in operation throughout the gold-mining region, the capacity of the whole does not exceed that of one large establishment, say of seventy five stamps, the total quantity of quartz crushed during twelve months having been 23,835 tons. Some of the operations, too being on so small a scale that they can scarcely be said to be more than experimental: they could hardly be worked or the most economical principles, and yet none of them appear to have been worked at a loss, while the most extensive are highly prosperous, and the aggregate of the whole most satisfactory. That all the mines there are not yet worked on the best system, may be gathered from the fact that while the aggregate average richness of the quartz crushed has been \$19 30 per ton, the locality that has paid best—"Wine Harbor"—has yielded only \$11 25 per ton. Taking the latter locality alone, and estimating the work at the rate at which labor can be procured in Lower Canada, the run ning expenses would have been about \$16. 000, while the actual proceeds have been \$49,284, thus yielding a profit of \$33,600 on

the year's operations.

The official report of the Gold Commis sioner, now before me, does not afford the means of distinguishing between preliminary and productive work, and hence does not show why the labor of 50 men gives only not snow why the labor of 30 men gives only a product of 681 tons in a locality of which he speaks equally well, while in another the labor of 51 men produced in the same time 4,363 tons; but even taking the whole year's operations, preliminary and produc-tive, in Nova Scotia, as that of one establishment, and estimating as above the ac-tual number of men employed, and the rate at which labor can be procured in Canada (which is presumed to be much the same in Yova Scotia) and the result would be: Running expenses for one year, \$207,600 Running expenses for one year, Actual product of the mines, same - 460,039

Giving the enormous profit of \$252,439 which would pay the entire investment, machinery and all, in one year, and a very

large profit even on that. This is not a fanciful estimate, but the actual result of last year's operations as regards the number of men employed in and about the mills and mines and the value produced in gold, according to returns made every month, strictly enforced by law and closely watched, the Nova Scotia system still exacting a royalty, which has been abandoned in Canada, so that the tendency would be, if fraud could creep in, to lessen rather than exaggerate the product.

Of course it is not presumed that all the small mills have been so managed as to produce anything like so good a result as the above, but it is quite evident that the best establishments have exceeded it. The cost of the mining and reduction of the ores by the above estimate would be over \$8 per ton which all experienced miners will admit is nearly double what it should be where labor and supplies are so cheap. But this is accounted for by the fact that the estimate is based upon the whole number of men employed, whether producing or only pre-paring to produce. In one of the most suc-cessful localities above alluded to, however, at "Wine Harbor,"—take alone, the cost of

mining and reduction, estimated on the same basis, was less than \$3 50 per ton, thus proving that in a well-regulated establishment, it should not, at all events, exceed an average of from \$4 to \$5 per ton. All California and Colorado miners who have visited the Chaudiere region in Canada agree in this.

So far as known, however, the Chaudiere presents a richer gold field than Nova Scotia —at least the indications and the assays are richer than Nova Scotia presented at the beginning, with only the same degree of development as now exists on the Chaudiere, where it may be said that the quartz only began to be explored or tested in August last. It must also be observed that rich alluvial diggings exist in many parts of the Chaudiere region, which would pay well by the hydraulic process, which is not the case to any extent in Nova Scotia, while the fee of the land conveys the mining right in the former and not in the latter.

The yield per ton of the Nova Scotia

mines, above given at \$19 30, is based upon the rate per ounce at which the Government values the gold in collecting the royalty, which is under its real value. Hence it may be safely computed that the total quantity of quartz crushed during last year averaged over \$20 to the ton. This is about the averaged yield from the quartz mills of Cali fornia, while the cost of mining and reducing the ores in Canada or Nova Scotia cannot certainly exceed half the cost in California. In the interior Territories, Colorado, Nevada, &c., no doubt the ores are richer, but there again the cost of dealing with them vastly exceeds what it does in California. But a still more important point as regards these gold fields, lying as it were at our very doors, is the superinten-dence and management. It is safe to assert that, if in nine cases out of ten in which mining in these remote gold fields results in failure, at least in a majority of such cases the failure is due to the incompetence, dishonesty, or carelessness of the manager or superintendents at the mines.

With mines of the same character and of equal richness (as now practically proved to Nova Scotia) within from one to two days' travel of New York, with labor at haif the price, or less, and all kinds of sup-plies, and even machinery in proportion, and the vigilanteyes of the parties interested always watching their progress, it seems impossible to believe that gold mining should not pay in Canada or any portions of the adjoining States where the gold belt crosses the boundary.

Having already extended this to too great

a length I shall reserve for another communication a statement of the present prospects of the gold mining interests on the Chaudiere, &c., merely stating for the pre-sent that the evidences of great value in some of the quartz lodes continue to accu

Since writing the foregoing, an inspection of the report of one of the companies at Waverly, in Nova Scotia, for the past year, gives a remarkable confirmation of the above estimate of running expenses and profits. The Company's balance sheet is published and shows the running expenses have been \$11,949 77 at the mines, and \$1,290 37 at the Company's office in Boston in all \$13,240 14, while the gross proceeds amounted to \$43,859 06, making a profit o \$30,618 92.
