THE GAS INVESTIGATION,—Another meet. ing of the Select Council Committee apmg of the Select Council Committee ap-pointed to investigate the affairs of the Gas Works was held yesterday afternoon, Charles Thompson Jones, Esq., President of the Board of Trustees, was examined. The latter officer appoints all the men at the Works, on the recommendation of a member of the Board. Many of the appointments are made to oblige Councilmen. If the men selected prove of no value, and are discharged, the expense of their education comes out of the city. The Trust employs from eight hundred to one thousand men. No bids are advertised for, but the Board sometimes ask firms to bid for supplying the Works. Witness never heard of any advertisement for proposals for coal, except in Pittsburgh. The coal is procured from the Penn, Westmoreland and Shafton mines. A man came from New York, last year, with tests of the gas produced from the Cameron Coal and Mineral mine by a New York company. The contract was for dry coal, but this sometimes came so wet, that one-tenth of the weight is deducted for moisture; witness could not express an opinion about Mr. Manuel; he believed him to be an honest man, and he spent most of his time about the Works; scientific knowledge was not necessary in the Chief Engineer of the Gas Works, because the foremen are all men of experience, some of them having been in the employ of the Trust for twenty years. Some of the members of Councils have received contracts from the Board: one is now furnishing castings, and another leather

EVERY MAN HIS OWN PHOTOGRAPHER. EVERY MAN HIS OWN PHOTOGRAPHER.

Among the most curious of the many curious developments of the art of photography is the "magic photograph" recently introduced. A piece of blank paper is submitted to the action of a few drops of water and in thirty seconds a beautiful picture is produced, which has only to be washed in the usual way and mounted, when it is ready for the album. The experiment is pleasing and instructive, and the result is eminently satisfactory. Mr. Bower, at Sixth and Vine, is having them extensively prepared and of the finest finish, at the low price of fifty cents the package. price of fifty cents the package.

Congress.—In the Senate yesterday Mr. Grimes reported adversely on the petitions for an increase of naval officers. The Senate insisted on its amendments to the Fortification Bill, which were disagreed to in the House. A Commit tee of Conference was ordered. Generation, the vegetative powers of life are strong: but, in a few years, how often the pallid hue, the lack-lustre eye, and emeciated form, and the impossibility of application to mental effort, show its baneful/infig-ence! It soon becomes evident to the observer that some depressing infuence is checking the development of the body. Consumption is talked of and perhaps, the yenth is removed from school and sent into the country. This is one of the worst movements, Removed from ordinary diversions of the ever-changing scenes of the city, the powers of the body too much enfeebbed to give zeat to healthful and rural exercise, thoughns are turned inwards upon themselves; the parent's bear bleeds in anxiety, and fancies the grave but we sting for its victim.

Alasi increase of appetite has grown by what it fed on—the energies of the system are prostrated, and the whole economy is deranged. Intend keeping a full assortment of everything in that line, which they will sell at the lowest rates, including

Attended with the following symptoms: Indisposition to Exertion, Loss of Power, Loss of Memery, Difficulty of Breathing, General Weakness, Horror of Disease, Weak Nerves, Trembling, Horror of Death, Night Sweats, Cold Feet, Wakefulness, Dinness of Vision, Languor, Universal Lassitude of the Muscular System, Often Enormous App-tite with Dyspeptic -ymptoms, Hot Hands, Flushing of the Body, Dryness of the Skinn, Pallid Countenance and Eraptions on the Face, Pain in the Back, Heaviness of the Ryelids, Frequently Black Spots flying before the Eyes, with Temporary Suffusion and Loss of Sight, Want of Attention, Great Mobility, Restlessness with Horror of Society, Nothing is more desirable to such Patients than Solitude, and nething they more dread for Fear of Themselves, no Repose of Manner, no Earnestness, no Speculation, but a hurried Transition from one question to sanother.

These symptoms, if allowed to go on—which this medicine invariable removes—soon follow Loss of Fouer, Fututly and Epileptic Fits, in one of which the patient may expire.

During the Superintendence of Dr. Wilson, at the

Fatuity and Epiteptic Fits, in one of which the patient may expire.

During the Superintendence of Dr. Wilson, at the Bloomingdale Asylum, this sad result occurred in two patients; reason had for a time left them, and both died of epilepsy.

Who cannay that these excesses are not frequently followed by those direful diseases, INSANITY and CONSUMPTION? The records of the Instance Asylums, and the melancholy deaths by Consumption, bear ample witness to the truth of these assertions. In Lunaticasy lums the most melancholy exhibitions appear. The countenance is actually sodden and quite destitute—neither mirth nor grief ever visits it. Should a sound of the voice occur, it is rarely articulate.

Lary Institutions throughout the land.

[Dr. Keyser is a physician of over twenty years' experience, and a graduate of the Jefferson Medical College, and of the University of Medicine and Surgery of Philadelphia.]

Mr. H. T. HELIMOOLD.—Lear Sir:—In regard to the question asked me as to my opinion about Buchu, I would say that I have used and sold the article in various forms for the past thirty years. I do not think there is any form or preparation of it; have not used or known to be used in the various diseases where such medicate agent would be indicated. You are aware, as well as myself, that it has been extensively employed in the various diseases of the bladder and kidneys, and the reputation it has acquired in my judgment is warranted by the facts.

Lave seen and used, as before stated, every form of Buchu—the powdered leaves, the simple deoccliqu, incure, findle extracts—and I am not cognizant of any preparation of that plant at all equal to yours. Twelve years' experience ought, I think, to give me the right to judge of its merits, and without prejudice or partiality I give yours precedence over all others. I do not value a thing according to its bulk; if I did other Suchus would out-do yours; but I hold to the doctrine that bulk and quantity did not make up value—if they did, a copper cent would be worth more than a gold dollar.

I value your Buchu for its effect on patients. I have

dollar.

I value your Buchu for its effect on patients. I have cared with it and seen cured with it, more diseases of the bladder and kinneys than I have ever seen cured with any other Buchn, or any other proprietory compound of whatever name. Respectfully yours, etc., GEORGE H. KEYSER, M. D., No. 140 Wood street, Pittsburgh, Pa., August II, 1885.
