

From our Third Edition of Yesterday.

From Washington. Special Despatch. WASHINGTON, June 5.—Messrs. O'Connor and Shea are still here, and it is understood that no conclusion has been reached on the part of the Government in regard to bailing Davis. Judge Underwood left late last evening, with instructions as to the course he is to pursue.

No decision has been arrived at by the Government respecting the disposition of the Fenians in our possession. One thing has been decided on, not to surrender them to the British authorities. Head Centre Stephens has arrived. Quite a number of leading Fenians have also arrived.

The Committee on Foreign Affairs had a special session to-day, but came to no conclusion in regard to Mexican matters. The Fenian Movement. HAMILTON, June 5th.—(Special to the New York Tribune.)—Two thousand men are now concentrated along the line of the Detroit and St. Clair rivers, and the lines are strongly picketed. The main concentration of the troops is about Briscot, that being considered the real point of attack. Few troops from the West have been sent to this point; it being cared for by the regular volunteers from Montreal. The West is quiet to-day; all the troops being at the front.

The Fenian Prisoners at Buffalo. BUFFALO, June 5.—At an early hour this morning warrants were issued by the United States Commissioner in this city, commanding the United States Marshal to apprehend the Fenian officers now on board the United States Steamer Michigan, and bring them before the Commissioner for examination, when it will be decided whether they shall be held for trial before Judge Hall.

The complaint is stated as follows: Whereas, complaint has this day been made, that May, 1866, at the city of Buffalo, within the northern district of New York, and the jurisdiction of the United States, begin and set on foot, and provide and prepare means for a military expedition to be carried on from these against the territory and dominions of the province of Upper Canada, a Government and people with which the United States are at peace, contrary to the provisions of the act of Congress concerning neutrality, passed April 20th, 1818, etc. It is said the officers will make no defence, confessing to a breach of the neutrality laws. The writ of habeas corpus was served last night, returnable at 9 o'clock this morning, but the hearing has been postponed until 9 o'clock to-morrow, to allow Commander Bryson, of the Michigan, time to consult with the Washington authorities.

The prisoners are really in custody of the civil authorities, and the military and naval forces are guarding them. On the Canada side, early this morning, four more Fenians were caught and placed in the Niagara ferry house. Many have met with a quicker fate, as the volunteers shoot them immediately on capture. It is reported that not less than 25 or 30 have been shot in the woods about Fort Erie and Ridgeway, but this needs confirmation. Boston, June 5th.—Special despatches from St. Albans, dated to-day, say that the main column of the Fenian army moved from Fairfield yesterday afternoon, the column heading towards Canada. Small detachments soon after followed in the same direction. Generals Spear and Mahan rear and look after expected arms and ammunition. The non-arrival of war material has delayed the movement. It was known that a large amount of much needed stores had been sent from Troy to this point, and its failure to arrive caused serious disappointment. Twenty officers and men have been despatched to hunt up and secure the missing material. Seven car-loads of Fenians arrived from Massachusetts, this morning, bound for the front. Generals Spear and Mahan will go to the front to-day.

From California. SAN FRANCISCO, May 31.—The piracies in Chinese waters still continue. Six hundred and fifty Chinese emigrants on the ship Napoleon mutinied, set fire to the ship. The captain and crew escaped in small boats. The Africa Signalled. HALIFAX, June 5th.—The steamship Africa, from Liverpool with 1400 passengers, 27th ult., has been signalled.

XXXIXth CONGRESS—FIRST SESSION. WASHINGTON, June 5, 1866. SENATE.—Mr. Pomeroy (Kansas) introduced a bill to authorize the Secretary of the Interior to lease and preserve the public lands of the United States which contain mineral springs. Referred to the Committee on Public Lands.

Mr. Edmunds (Vt.) on the Committee on Commerce, reported the House bill for the protection of the lives of passengers travelling on Great Lakes and Western rivers, which was ordered to be printed. At 1 o'clock the Reconstruction resolution was taken up.

Mr. Poland (Vt.) took the floor to deliver a written speech. HOUSE. Mr. Julian (Ind.), on the Committee on Public Lands, reported a bill to provide for the survey and sale of lands of the United States, containing gold, silver, and other valuable minerals, and for the assaying and counting of such minerals. Read twice and recommitted.

On motion of Mr. Stevens (Pa.), the vote by which the Senate bill to enable the New York and Montana Iron Mining and Manufacturing Company to purchase a certain amount of the public lands not now in the market, was referred to the Committee on the Public Lands, was reconsidered, and the bill came before the House for its action. The bill was read a third time, and passed.

Mr. Ashley (Ohio) introduced a bill to aid in establishing a branch of the United States wagon from the Missouri river to the Rocky Mountains. Read twice and referred to the Committee on Public Lands. On motion of Mr. Farguhar (Ind.) the House concurred in the Senate amendment for carrying the mail from Boz City to Idaho city, and asked for a committee of conference.

Mr. Garfield (Ohio), from the Select Committee on Education, reported a substitute for the bill to establish a Department of Education at Washington. Mr. Donnelly (Minn.) addressed the House in support of the bill. He claimed that with the rebellion the nation was born into a new life, the Southern people had sought for years to overthrow the Government, and they could not be trusted to administer it unless measures were taken to provide against the dangers of the future. Slavery was destroyed, but the ignorance which was its consequence remained. That must be destroyed or the nation must die. Four million slaves had been liberated and must

be raised to the level of citizens. This could only be done by educating them. The white man of the South must also be educated for he can only become loyal as he becomes intelligent. This must be done by the most intelligent as well as the most energetic and industrious people in the world. In France, Prussia, Austria, Russia, provision had been made for public education by the nation. The United States alone while its government rested solely on the intelligence of the people had done nothing. All this had been left to the States, and the rebellion had been the consequence. The ignorance of the South, if not removed, would cause another rebellion. A Republican Government was the result of both and could not exist without both. Two distinct policies were established two hundred years ago, one in New England, the other in the South. They had travelled over the world. One was the policy of popular education, the other that of popular ignorance. He compared the condition of the South with that of the North, industry, happiness, virtue and prosperity with that of the South, and stated that in 1850 three-quarters of a million of dollars were expended in the Slave States in support of public schools, while in the Free States seven millions were expended.

The Public Debt. WASHINGTON, June 5.—The following is a statement of the public debt of the United States on the 1st of June, 1866:

Table with 2 columns: Description of debt and Amount. Includes items like Five per cent. bonds, Six per cent. bonds, Debt bearing coin interest, etc.

Total debt, \$2,799,979,450 76. Amount in Treasury, \$50,679,857 72. Currency, \$79,011,252 52. Amount of debt less cash in Treasury, \$2,670,288,337 52.

The foregoing is a correct statement of the public debt, as appear from the books of the Treasurer of the department on the 1st of June, 1866. HUGH McCULLOCH, Secretary of the Treasury.

New York Stock Markets. NEW YORK, June 5th.—Stocks better. Chicago and Erie, 3/4; Canada, 1/2; Erie, 1/2; Michigan Southern, 1/2; N. Y. Central, 1/2; Reading, 1/2; U. S. Steel, 1/2; Western Union, 1/2; U. S. Telegraph, 1/2; U. S. Express, 1/2; U. S. Savings, 1/2; U. S. Bank, 1/2; U. S. Trust, 1/2; U. S. Insurance, 1/2; U. S. Real Estate, 1/2; U. S.
