## OITY BULLETIN.

Homicide.-Arnold Gilhouse died this morning at 3½ o'clock, from the effects of a blow received in a quarrel yesterday after-noon. The deceased was a German, a shoe-maker by trade, and resided at No. 723 Passyunk road below Fitzwater street. His wife is an Irishwoman. A man named James Devinny, who was acquainted with Mrs. Gilbouse previous to her marriage, has been in the habit of visiting the house. His visits must have been an annoyance to Gilhouse, for the two had words about the matter. Both had been drinking. It was proposed to settle the difficulty by taking another drink, and the two men started for a neighboring tavern. Gilhouse carried in his hand a small cast-iron skillet. When they got upon the opposite side of the street, it is said, they got into a quarrel. Devinny is alleged to have taken the skillet from Gilhouse and struck him upon the head with it. THE YOUNG AND RISING Generation, the vegetative powers of life are strong; but, in a few years, how often the pallid hue, the leach lustre eye, and emaclated form, and the impossibility of application to mental effort, show its onancil influence! It soon becomes evident to the observer that some depressing influence is checking the development of the body. Consumption is talked of, and perhaps, the yenth is removed from school and sent it is to the country. This is one of the worst movements, Removed from ordinary diversions of the ever-changing scenes of the city, the powers of the body too much enfeebled to give zest to healthful and rural exercise, though is are turned inwards upon themselves; the parent's heart bleeds in anxiety, and fances the grave but waiting for its victim.

Alas! increase of appetite has grown by what it fed on—the energies of the system are prostrated, and the whole economy is deranged.

[Dr. Kryske is a physician of over twenty years experience, and a graduate of the Jefferson Medical College, and of the University of Medicine and Surgery of Philadelphia.]

Mis. H. T. HELYBOLD.—Lear Sir:—In regard to the question asked me as to my opinion about Buchu, I would say that I have used and sold the article in various forms for the past thirty years. I do not think there is any form or preparation of it is have not used or known to be used in the various diseases where such medicate agent would be indicated. You are aware, as well as myself, that it has been extensively employed in the various diseases of the bladder and kidneys, and the reputation it has acquired in my judgment is warranted by the facts.

I have seen and used, as before stated, every form of Buchu—the powdered leaves, the simple decoction, tincture, fluid extracts—and I am not cognizant of any preparation of that plant at all equal to yours. Twelve years' experience ought, I think, to give me the right to judge of its merits, and without prejudice or partiality I give yours precedence over all others. I do not show a thing according to its bulk; if I did other Buchus would out-do yours; but I hold to the dectrine that bulk and quantity did not make up value—If they did, a copper cent would be worth more than a gold dollar.

dollar.

I value your Buchu for its effect on patients. I have cured with it and seen cured with it, more diseases of the bladder and kidneys than I have ever seen cured with any other Buchu, or asy other proprietory compound of whatever name. Respectfully yours, etc.,
