## 

 This is the opening of the programme

 heir votes their approval of all the
sets of the present Congress, calaulated to diggust and exasperate th
country more than ever with thei charitable people who thought that the lesson of these elections would that be
 in December, and to assume- the dicta for the people and the Executives of the
loyal titates that this plan is developed so early. There must be preparation for
this fearfulemergency that a wickedExecutive proposes to bring on the coun-
try. He refuses to regard the popular ill, as expressed at the ballop-box
The people and their representative must stand together more firmly than
evert ro resist the agrgessions and usurp
ations of this bola, badman tre fight-imetsisste
The advocates of the eight-hour sss
tem of labor have propounded and ar propounding to the candidates for Con of their election, they would favorerent pet system. Most of the queried candir
dates have answered "yes;" and with all he fullness of the conviction staring
us in the face that the BuLLErris has
ways deemed the movenant absurd, we oo, would answer yes, and yes again foe further reduced to servengery six, five ay. But the query follows: What goo ion? There is scarcely a groon quas man
who now claims that he should not hours but who could, if than eigh he though
proper to do son limit b proper to do so, limit his daily working
hours without asking any legisiative or trade sovernmental interferencee. The
tries that now decree strikes,
and thate compel the master and hat compel the master workmen to
accede to their demands, if the journey-
man can hold out logger than the em ployer, could ! just as readily dispose o
this question of time as of the questo of compensation. Let the jo jornueymen
carpenters, for instance, say that the Fin work but eight hours per day, and dight hourreservice por man, rather have than to the arrangement, and if work was et of hands to perforim sifty per cent ulfilment of their contracts; justasectie som manufacturing estabilis
louble sets of hands. uestion elitch comes in when th presion of compensation arises. We We that there is no one insane
nough to ask for legiglation to preven arown man from working as many
gours as he pelesees. The thrifty workman who is depirous of properly mark nain
aining his Fammly, and of being fore
handed in the world, work at seven worla, chooses to go to to
whe the morning ix - in the evening. Upon the othe fom nine to firie, and no no longers. When
