The matter was submitted to the Comptroller of the Currency for his decision, and that officer has decided that mutilated notes must be redeemed by the redemption agen-cies of the National Banks at commercial centres, so long as no reasonable doubt exists as to the value or identity of the notes presented. When the notes are so badly mutilated as to make the value or identity difficult to determine, the case shall be re-ferred to the bank from which the notes were issued. A circular to this effect will be issued to all the agencies and banks tomorrow.

LIGHTS ON THE DANISH COAST,-The State Department has received the "Notice to Mariners" issued by the Navy Depart ment of Denmark on the 10th of September and which is as follows:--That the light vessels at Lasso Trindelen. of Kobber grunden, and at Anholt Knob, which have hitherto been withdrawn from their respective stations, from the 31st of December to the 1st of March, will hereafter. as well as the light vessels in Drogden and Lasso Rende, be kept at their respective istations all the year round as long as the ice will permit, and further, that all the said light vessels, when forced by the ice to leave their stations, will be replaced as soon as given stations. as circumstances will allow.

SMUGGLING IN TEXAS,-The Treasury Department is informed that smuggling operations of an extensive character have recently been carried on from Matamoras to Brownsville, Texas, across the Rio Grande. The withdrawal of troeps sta-tioned at Brownsville has given the smug-iglers an opportunity for effecting their unlawful purposes, which they have been prompt to seize. Measures have been instituted for the prevention of these transac-tions. Such is the factivity of smugglers at the various points of the frontier, that the exer-cise of the greatest vigilance is required from revenue officers in the performance of their duties.

He instantly scrambled on his legs, picked up his cap, and was deliberately walking off, when the guardians po-litely requested him to accompany them to a neighboring guard house.

PARIS A SEAPORT .- A correspondent writes that the idea of making Paris a seaport has again revived. This time there is no question of cutting costly canals from Paris to the seacoast, but of bringing merchant ships up to the Quai d'Orsay as it is at present. The inventor of this scheme is a Captain Brazer, and what he proposes to do is to construct ships of a peculiar make, adapted to the sea, at the same time capable do is to construct ships of a peculiar make, adapted to the sea, at the same time capable of reaching Paris in the depth of water afforded by the Seine at an average height,
