Interview of Government Employes with the President. committee, consisting of the employe

of the Quartermaster's Department, waited upon the President to-day, for the purpose of obtaining from him a reply in answer to their petition relative to the reduction of their pay. The President dissents from the of the Quartermaster-General for the reduction, and in a communication to Secretary of War requests him at once to designate competent officers as a board to make inquiries, and report to the War Department the rates which should be al

This order, he adds, will apply to the two petitions accompanying the application, to which these instructions refer, and will for the present, operate against any reduction of the wages of the employe, in whose inte-

The following is the decision of the Treasury Department, relative to the taxes upon

canned meats, vegetables, &c.:
By the amendatory act of July 13th, 1866,
a stamp duty is imposed upon "every can, bottle, or other single package containing meat, fish, shell-fish, fruits, vegetables, sauces, syrups, prepared mustard, jams or jellies, contained therein and backed or sealed, made, prepared and sold, or offered forsale, or removed for consumption in the United States, on or after the 1st day of Oc-

While it is believed that it was the purpose and intent of Congress to impose a stamp tax upon the above-named articles if sold or offered for sale, or removed for consumption in the United States, en or after October 1st, 1866, regardless of the time of their manufacture or production, that in tent is so imperfectly expressed as to render it doubtful whether, under a proper con-struction of the language of the statute, such a tax can be collected. Internal Revenue officers are therefore instructed not to interfere with the possession or sale of such articles, of domestic manufacture or production, when satisfactory evidence is furnished that they were prepared and passed out of the possession of the producer prior to the 1st day of October.

Oysters and other shell fish are often re-

moved from the shell, and without undergoing any process for their preservation. are placed, in a raw state, in tin or other yes-sels for the sole purpose of transportation in ice. When put up in this manner and for this purpose only, they are not regarded as canned, within the meaning and intent of the law, no stamps will be required upon

Articles named in Schedule C. when imported or of foreign manufacture, are liable to the stamp tax in addition to the impost duties thereon. When, however, such imported articles, except playing cards, lucifer or friction matches, cigar lights or wax tapers, are sold in the original or unbroken packages, in which the bottles or other in-closures were packed by the manufacturer, the person so selling them is not subject to any penalty on account of the want of a proper stamp: but when such packages are opened, the articles should not under any circumstances be offered or exposed for sale until they had been appropriately stamped.

Antiquities of Eric County.

Eric county, like Lake Eric, derives its name from a powerful tribe of Indians known as the Erics or Irriroanous, who once occupied the southern shore of the lake.

Although supposed originally to have been of the same family as the Iricalia or Erical Although supposed originally to have been of the same family as the Iriquois, or Five Nations, they waged war with them, until they were utterly extirpated about 1655, after the Iroquois learned the use of fire arms. The name of the Eries was said to signify Wild-Cats.

Erie county was separated from Allegheny by act-of 12th March, 1860, but for several years, and for all county purposes, Crawford, Eric, Mercer, Venango and War-ren formed but one county, under the name of Crawford. On the 2d of April, 1803, Eric

pases.

The first fort erected at Erie was known as Fort de la Presqu'isle. It was probably erected early in 1749, but the precise time does not appear. It was during that year the French sent emissaries and armed men throughout the Ohio valley to drive off or

arrest the English traders who had ventured into that region from the Eastern colonies. The town of Erie was laid out by General Wm. Irvine and Andrew Ellicott, in 1795, in conformity with an act passed in April of that year. Mr, Ellicott had charge of the engineers, and General Irvine commanded a small detachment of troops for their protection, previously posted by General Wayne. General Wayne returned in 1796, and died in the garrison, and at his own re-quest was buried at the foot of the flag-staff. Subsequently his remains were removed to Subsequently his remains were removed to Delaware county. The most important event that occurred at Erie, in its early history, was the building of Perry's fleet. Captain Perry, then only twenty six years of age, arrived at Erie on the 27th of February, 1813, and immediately urged on the work which had been already commenced. The Northern frontier of commenced. The Northern frontier of Pennsylvania and Ohio was at that time little better than a wilderness; supplies and artisans had to be brought from the Atlantic coast, and the timber for the vessels cut coast, and the timeer for the vessels cut from the forest. In the face of a thousand obstacles Perry succeeded in getting his vessels ready to leave the harbor in the early part of August; though he was still greatly in want of officers and men, parti-cularly seamen. He was soon after joined by reinforcements, and the fleet weat up toward the head of the lake, and on the 10th

of September his victorious engagement was fought off Put-in Bay.

The first military commission executed by Washington was by direction of Gov. Dinwiddle of the then colony of Virginia, of which this portion of Pennsylvania was then, in 1853, considered a part—by a march to Waterford. Maj. George Washington, then a young man of twenty-one years, was despatched on a mission to Monsieur De St. Pierre, the commander of Fort Le Bœuf, to enquire into the designs of the French in thus occupying the dominions of his Britanic Majesty. He was accompanied by a pioneer, a French and an Indian interpreter, and joined at different points on the Ohio and Allegheny rivers, beying storted from a post on the on the Ohio and Allegheny rivers, having started from a post on the Ohio, by Indian Chiefs and hunters who were favorable to his cause. His journey up the streams and over the country is described in his report as very tedious and perplexing, and the result of his visit not altogether satisfactory. He did not succeed in learning the exact strength of the French in their different forth. ferent forts, or their entire purposes, but obtained information which afterward proved very useful. The French strove to deprive him of his Indian allies, and to deprive him of his Indian arises, and to embarrass and perplex him as much as pos-sible. He was fifteen days making the journey from Venango (now Franklin) to Waterford and return. It was winter. and the streams were frozen and the swamps filled with snow.—Eric (Pennsylvania) Despatch.

The Case of the Baltimore Police Com-missioners.

BALTIMORE, Oct. 29.—The examination of the charges was resumed to day at Annapolis. Some twenty witnesses were examined, and at one o'clock the prosecution announced that they were through, but would have some rebutting evidence. The examination of the witnesses for the defence will commence to more the wild and a side of the commence to more the side of the side will commence to-morrow. The evidence to-day elicited nothing of importance.

BALTIMORE, Oct. 29.—A fire broke out tonight in a large warehouse, No. 246 Baltimore street, occupied by the Fairbanks'
Scale Cempany, and by Marston & Brooks,
china store. During the progress of the fire
the cornice of the building fell, badly in-

juring three firemen who were on the ladder. Two of them, it is thought will die. The loss by the fire is quite heavy. The stock in the carpet store of Messrs. Turnhill was slightly damaged.

The Attack on Matamoras Postponed. GALVESTON, Oct. 29.—Brownsville papers received here say that a new revolution from Ortega is anticipated. Cortinas has postponed the attack on Matamoras, at the request of Tapia. Juarez sent Commissioners to Canales, who put them in the calaboose

The ex-rebel Postmaster-General, Reagan, publishes a long letter, referring to a former letter. He is strongly in favor of negro suffrage, and granting them all the rights of white men. He says any man unwilling to do this is a demagogue.

EGYPT.—A letter of the 27th of September from Alexandria, Egypt, says that the country was threatened with an inundation country was threatened with an inundation of the Nile, then very high. There was great anxlety for the crops, which were very fine in all Lower Egypt, and which it is feared would be spoiled. Every precaution was being taken, but the situation of affairs seriously affected trade. The revolt in Candia will have imposed heavy charges on the Egyptian Treasury. The Viceroy is said to have furnished thirty thousand men, four of his principal generals, including the four of his principal generals, including the Minister of War, money, coal, ammunition and provisions. The Suez Canal Company contemplates soon undertaking the trans-port of certain kinds of merchandise, but it seems doubtful whether they will be able to supply sufficient means of conveyance. The traffic across Egypt is enormous. Lately in a very short space of time, twelve thousand bales of manufactured goods for India passed over the Suez line, and a great deal of cotton comes from Bombay by that route, There has been a reduction of twenty-five per cent. on the rate of carriage of goods sent by slow trains.

GAME IN VIRGINIA.—The Richmond En-GAME IN VIRGINIA.—The Richmond Enquirer says: "Game of all kinds is to be found now in this region. Partridges are more abundant than for many years; hares jump from behind every bush; coons infest every corn-field; opossums spoil every persimmon tree; squirrels fill the forest; foxes bark around every hennery, and the music of the hounds resounds on of the hounds resounds on every breeze. The crack of the sportsman's rifle and the dawn of day greet us simultaneously, while the huntsman's horn and the set of sun bid farewell to the parting day."

CASTOR WHEELS. FOR HEALTH AND STRENGTH USE CAPE. WELL & CO.'S PATENT GLASS CASTOR WHEELS.

NOR HEALTH AND STRENGTH UNE CAPE
WHILL & CO.'S PATENT GLASS CASTOR
WHEELS.
These wheels are designed for Pianes, Bedsteads, &c.
We claim that they give to Pianes a greatly increased
force of sound. without detracting from the harmony
and melody of the instrument, rendering every note
more distinct to the ear. This is so apparent that they
are now being applied by many to these valuable musical instruments. Dr. Valentine Mott, previous to his
ceath, pronounced the Glass Castor Wheels an invaluable invention for bedfast invalids, who are
guarded against the damp floors after undergoing the
process of cleaning, or where dampness is produced
from any other cause. Aside from this, Housekeepers
are relieved from the dread of having their carpets cui
or torn, as frequently happens from those now in use,
often caused by a rust, which adheres with gine-like
tenacity. No such annoyance can possibly proceed
from the Glass Castor Wheels, as we all know that
glass is non-corrosive. There are no rough or unfinished edges to the Glass Wheels, such as we often find
in those of iron, and the latter, though smoothly finished, will soos rust, from the dampness of the atmosphere, if nothing else, producing roughness on the surface, or edge, while the former will always maintain
the smoothness of glass, just as they are finished.

By sleeping upon glass wheels you retain all the eleotricity you had in your body on retiring, and you get
up in the morning feeling as fresh and active as a
young man. Glass being a non-conductor, the eleotricity gained while in bed cannot pass off. Ask your
doctor what he thinks of the Glass Castor Wheels
Ask him if all diseases, with the suception of chronic
diseases, are not caused from the want of electricity
We have a man in our place whom the doctors pronounced past curring, with the inflammatory rhenmatism. The wheels cured him in less than four
weeks. He is to-day a stout healthy man. These aracts which can be proven on application at our office.
