BUSINESS NOTICES.

CHAINS.

Now "hung in chains" each belle appears,
By the decree of fashion;
Chained by the necks, and even ears,
They still can briskly dash on.
But he whose gaze is fettered so,
Finds that by artful feigning,
In bands the ladies seem to go;
But 'tis the men they're chaining;
And to report well as we may,
We don the Tower's smart array!

WE HAVE
Good style Cassimere suits to match as low as... $15 00
Finest French Cassimere Suits to match up to 50 00
And all the intervening grades.

WE HAVE

TRAGIC AFFAIR IN NEW YORK.

A Mining Company's Treasurer Attempts to Murder His Wife and then Commits Suicide---Insanity Supposed to be the Cause.

[From to-day's N. Y. Times.]

Coroner Wildey held an inquest, yesterday, at No. 250 West Nineteenth street, over the body of William A. Francis, who had committed suicide by cutting his throat with a razor. It appears from the evidence adduced and the statements made by the family, that Mr. Francis was the Treasurer of the New York Montana Mining and Discovery Company, and had been for some time in very bad health, so much so that his mental faculties were materially affected, and his friends saw fit to remove him to an asylum about five years ago. He remained there but a short time, and since then has suffered several attacks of temporary insanity, of a very mild type, however, and his wife and son did not fear any attempt at suicide on his part.

During Thursday and up to midnight Mr. Francis appeared to be in good health and in perfect possession of his reason. At 6 o'clock yesterday morning he rose and accompanied his wife to the basement kitchen to assist her in making a fire preparatory to getting breakfast. At this time Mrs. Francis was doubtless not aware that her husband had placed his case of razors in his pocket before leaving his chamber, as subsequently proved to be the case. When he reached the kitchen Mr. Francis must have deliberately removed his coat, shirt collar and cravat, for those articles were found on the table. It is supposed, for no one except Mrs. Francis (now unhappily unconscious), saw the dreadful deed accomplished, that as the deceased was about to draw the razor across his throat his intention was discovered by the wife, who no doubt endeavored to take the weapon from him. A struggle must have ensued at this juncture, for Mrs. Francis received several wounds on the face from the razor, and was at length knocked down by a blow on the head with a heavy hatchet. The desperate man must have then completed his purpose, for he was found with his head nearly severed from his body.

At this time there was no one else stirring in the house, the family consisting of the deceased, his wife and a son, Mr. Edward W. Francis, about 23 years of age, who was asleep in his room. At 8 o'clock young Francis rose, dressed himself and went down stairs, expecting to find breakfast all ready for him. What was his horror on opening the door leading to the kitchen, to discover his father lying dead on the floor, and the bleeding and insensible form of his mother lying across the body of her husband! Scarcely stopping to make an investigation, Mr. Francis ran out of the house, alarmed the neighbors, and then called Dr. A. Buchanan to attend the case. On the arrival of the physician Mrs. Francis was removed to the dining room, and every effort was made to restore her to consciousness, but up to a late hour last evening she was still insensible and in a very critical condition. The physician found a ragged wound behind the right ear, about two inches in length and penetrating to the skull; he found another clear cut wound two inches in length in the right cheek, the latter being evidently inflicted with the razor.

On examination the body of the husband was found to be quite cold, and the physicians pronounced life to have been extinct over an hour. The trachea and right carotid artery had been severed, causing death in a few moments from hemorrhage. On the kitchen floor were the razor and hatchet.

On these facts being stated by the witnesses who appeared before the coroner, the jury rendered a verdict in accordance, when the case was closed.

Mr. Francis was a native of Utica, N. Y., 55 years of age. He was in comfortable circumstances, and had been for twenty-five years a member of the Twenty-third Street Baptist Church. He was a man of education, and had passed many years abroad in travel.

Dr. Schenck's Pulmonic Syrup,
FOR THE CURE OF COUGHS, COLDS AND CONSUMPTION.

DR. SCHENCK'S SEA WEED TONIC,
For the Cure of Dyspepsia and all Debilitated Conditions of the Stomach.

DR. SCHENCK'S MANDRAKE PILLS,
For the Diseases of the Liver, and to act as a Gentle Purgative.

All of these three medicines are often required in curing consumption, though the Pulmonic Syrup alone has cured many desperate cases. The Sea Weed Tonic and Mandrake Pills assist in regulating the stomach and liver, and help the Pulmonic Syrup to digest and search through the blood vessels, by which means a cure is soon effected.

These Medicines are conscientiously offered to the public as the only safe, certain and reliable remedies for pulmonary consumption, and for all those morbid conditions of the body which lead to that fatal disease. Liver complaint and dyspepsia are often forerunners of consumption, and when they manifest themselves they require most prompt attention.

The Pulmonic Syrup is a medicine which has had a long probation before the public. Its value has been proved by the thousands of cures it has made through a period of more than thirty years, in all of which time its reputation has constantly increased, and the most obstinate skepticism can no longer doubt that it is a remedy which may be used with confidence in all cases which admit a cure.

If the patient will perseveringly follow the directions which accompany each bottle, he will certainly be cured, if his lungs are not too much wasted to make a cure possible. Even in cases supposed to be incurable, where friends and physicians have despaired, the use of this medicine has saved the life of the patient and restored him to perfect health.

☞ Dr. Schenck himself was cured in precisely such circumstances; and many others have been equally fortunate by judiciously making a timely use of his remedies.

He does not say that all cases of pulmonary consumption are within the reach of medicine, but emphatically asserts that often, when patients have the most alarming symptoms, such as a violent cough, creeping chills, night sweats, and general debility—even to such a degree that they are obliged to lie in bed, and when they are given up by their physicians,

THEY MAY STILL BE CURED.

No medical treatment can create new lungs, but when the lungs are very badly diseased, to some extent destroyed, a cure may be effected by his medicines; also, in

SCROFULOUS DISEASES,

these medicines are equally efficient. Dr. Schenck has photographs of a number of persons who have been nearly covered with running sores and are now healed up. This shows its purifying properties, which must be done to heal cavities in the lungs.

In the treatment of consumption, it is of the utmost importance to give vigor and a healthy tone to the system. Hence it is necessary to strengthen the appetite of the patient and improve the digestion. Proper nourishment is required, together with such means as will make the food easily digestible. The articles most suitable for the diet of consumptive patients are designated in Dr. Schenck's pamphlets, which are distributed gratuitously. In general, the most highly nutritious articles are to be preferred, but the digestive organs must be strengthened, in order to make either food or medicine serviceable. This requirement is met by the Sea Weed tonic, and for this purpose it was designed.

When the digestive powers are put in good order, the food has its proper effect, the system of the patient is invigorated, and the lungs begin to exercise their functions in a normal and healthy manner. Then the healing powers of the Pulmonic Syrup will complete the cure.

Pulmonary Consumption is almost always complicated with dyspepsia and liver complaint.

SCHENCK'S MANDRAKE PILLS

are intended to remove obstructions from the liver, and to restore its healthy action. They have all the efficiency which is ascribed to calomel or blue mass, and are warranted not to contain a particle of any mineral poison. These pills cure the most obstinate costiveness, sick headache, piles, bilious affections, and all other diseases which arise from a torpid or obstructed condition of the liver. One box of these Pills, valued at 25 cents, will prove the efficiency of the medicine.

In consumption, the Sea Weed Tonic and Mandrake Pills are invaluable auxiliary medicines. They relieve the sufferings of the patient, and assist the Pulmonic Syrup in effecting a cure. They have been found useful in advanced stages of consumption, where the lungs were almost entirely destroyed, and all symptoms, according to the judgment of the physicians, indicated speedy death. The lives of patients who were actually in a dying condition have been preserved for months by the use of Dr. Schenck's three great remedies.

Dr. Schenck pledges himself to effect a cure if the patient will apply to him before his case is altogether desperate, that is to say, before the vital organs are too far gone to admit of any cure, except by a miracle.

Dr. J. H. Schenck is the inventor of that celebrated instrument called "Schenck's Respirometer," with which he makes examinations of the lungs, with the certainty of discovering their true condition. The charge for making an examination with the Respirometer is $5, but all advice gratis; and for this purpose he is at his Principal Office, No. 15 North Sixth street, Philadelphia, every Saturday, from 9 A. M. until 4 P. M.

Price of the Pulmonic Syrup and Sea Weed Tonic, each $1 50 per bottle, or $7 50 the half dozen. Mandrake Pills 25 cents a box.

PROBABILITIES OF MARRYING.—"Figures won't lie," says an old proverb, but it must be confessed that they make some very paradoxical statements. Statistics of marriages show that from twenty to twenty-six and from twenty-five to thirty the probability of a widower marrying in a year is nearly three times as great as that of a bachelor. At thirty it is nearly four times as great; from thirty-five to forty it is nearly five times as great, and it increases, until at sixty the chance of a widower marrying in a year is eleven times as great as a bachelor. It is also curious to remark how confirmed either class becomes in its condition in life—how little likely, after a few years, is a bachelor to break through his habits and solitary condition; and on the other hand how readily in proportion does a husband contract a second marriage, who has been deprived prematurely of his partner After the age of thirty the probability of a bachelor marrying in a year diminishes in a more rapid ratio. The probability at thirty-five is not much more than half that at thirty, and nearly the same proportion exists between each quinquennial period afterward.

[For the Phila. Evening Bulletin.]

Shooting Stars.

Very few subjects in Astronomy have excited so much interest among the people at large as the wonderful spectacle of vast numbers of shooting stars, or meteoric showers, as they are now called. On the morning of the 13th of November, 1833, one of these showers occurred, which surpassed in splendor and brilliancy any other similar phenomena on record. The shower pervaded nearly the whole of North America, extending from the British Possessions on the north to the Gulf of Mexico on the south, and from sixty degrees of longitude east of the American coast to the Pacific Ocean on the west. Over this vast extent of territory the duration was nearly the same. The meteors began to attract attention from nine to twelve o'clock in the evening, and continued throughout the night, reaching their height about about four o'clock in the morning, and continued until daylight rendered them invisible.

The spectacle is stated by observers to have been grand and impressive in the highest degree. One or two instances are recorded of persons who died of fright, and the Second Adventists, who were in the ascendancy at that time, verily believed that the last day had come. Throughout the entire night a constant succession of fireballs resembling rockets, was seen moving in all directions down the celestial vault. All or at least the greater part of these seemed to radiate from a fixed point or star in the constellation Leo, which is a little southeast of the Zenith. The meteors were of all sizes, some appearing as large as the principal planets while others seemed to be mere points or specks of light. By some the appearance was compared to snow, while others, with excited imaginations, in the language of the Scripture, likened it to the fig tree "casting her untimely figs when shaken by a mighty wind." The flashes of light were so intense as to arouse people from their sleep. One of the meteors was described by an observer in North Carolina, as follows: "In size it appeared somewhat larger than the full moon rising. I was startled by the splendid light in which the surrounding scene was exhibited, rendering even small objects visible, but I heard *no noise*, although every sense seemed aroused in sympathy with the violent impression on the sight." Another observer, however, at Charleston, South Caralina, says that a meteor of extraordinary size was observed to course the heavens, and afterwards to explode with the noise of a cannon.

A gentleman in Macon, Georgia, also stated that a meteor was observed to fall as near the earth as one hundred feet, when it exploded into several fragments. So far as is known, no report was heard in any of the Northern States, and it is believed that these phenomena are rarely attended with any sound. It has been computed by a French astronomer that not less than two hundred and forty thousand of these fiery bodies were visible above the horizon of Boston at this time, so that when we take into consideration the immense surface over which the meteors were seen, the conclusion is irresistible that the number was almost infinite. Although this shower attracted so much attention, it was not by any means without precedent.

Thirteen, at least, of these wonderful showers are recorded between the years 903 and 1833. One is said to have occurred at Quito in 1753 above the volcano, which led the affrighted inhabitants in the vicinity to suppose that the mountains were on fire. Humboldt, in his works, mentions a similar display seen by him at Cumana, in South America, in 1799. A comparison of the seasons of appearance of these showers has led to the discovery that they are likely to occur at regular intervals. They seem to be separated from each other by a third part of a century, or at least some multiple of this period.

Scientific men who have devoted much time and study to the investigation of these wonderful phenomena expect that a great flight of meteors will be seen on the morning of the 13th or 14th of November next, which will equal in splendor and brilliancy the great shower of 1833.

If the comparisons are true there is every reason to believe that they will not be disappointed.

In considering the nature and origin of these shooting stars, care must be taken not to confound them with the solid meteors which often sweep through the air with prodigious velocity, accompanied by loud reports, and finally bury themselves in the earth. These are probably the fragments of broken spheres, which come within the attraction of the earth.

The shooting stars are believed to have their origin above the limits of the atmosphere, in some body or bodies in the system moving about the sun.

That these bodies revolve about the sun we conclude, because the earth falls in with them at regular intervals. The stars must consist of combustible matter since they take fire and consume while passing through the air. That these bodies undergo combustion we know from the direct evidence of our senses since we actually see them burn.

The great velocity with which they descend is supposed to condense the air before them, and thus by sudden compression to produce a great amount of heat sufficient to set them on fire. They must also consist of very light material, otherwise they would make their way to the surface of the earth.

The causes of these phenomena are still veiled in mystery. A great many theories have been advanced, which have not stood the test of close examination. Some have attributed them to electricity and magnetism, and have thought that they are connected with the Aurora Borealis. In the shower of 1833, in some parts of New England, an auroral bank of light was seen throughout the entire night. A gentleman in New Haven, Connecticut, stated that an electrical machine in his possession was charged to its fullest extent with the electric fluid, and that sparks of extraordinary light and brilliancy were taken from it during the shower. It has been supposed by others that the meteoric body from which the stars originated is what is called the *zodiacal light.* This is a faint triangular-shaped light seen in February or March in the west; or in October in the morning sky. It was thought that the extremity of this light at stated intervals came within the earth's attraction and thus caused the meteors. To this theory, however, serious objections have been found, so that the matter is still open for speculation to the curious and the learned. S.

CHICKERING'S
GRAND, SQUARE AND UPRIGHT
PIANOS.
DUTTON'S
914 Chestnut Street,
ENTRANCE IN ART GALLERY.
THE UPRIGHT PIANO,
THE FASHIONABLE PIANO OF EUROPE.
CHICKERING & SONS
Have paid particular and minute attention, by frequent and costly experiment, to the manufacture of THE UPRIGHT PIANOS.
The Upright Piano is, from its size, suited to hundreds of houses where a Grand or a Square would prove an incumbrance. It is suited not only for the Parlor, but for the Boudoir and the Study.
The CHICKERING Upright Pianos have quality of tone and an amount of power, second only to the Grand Piano. They are small, compact, well adapted to moderate sized rooms. Their action is light and elastic and in sweetness, purity of tone, richness and equality throughout the entire scale, and in refined beauty of tone elegance of design, and perfection of finish are UNEQUALED.
CHICKERING ROOMS,
