## CITY BULLETIN.

FALL OF A WALL-ONE PERSON KILLED —This morning about ten o'clock a portion of a rear wall of a building back of No. 229 South Second street fell down. The struc-ture is four stories in height and is used as a tenement house. The staircase is at the rear. The wall was considered in an unsafe condition, and Mr. Peter Rittmeyer, the owner of the premises, was about to prop it up. A part of the wall about five feet in width, all the way to the fourth story, fell down at the time stated. The staircase was so damaged that the egress of the occupants of the upper part of the building was cut off.

Mr. Rittmeyer, at the time of the accident was in a small out-house but a few feet from the wall which fell. He was badly bruised about the head by being struck by some of the falling bricks. safe condition, and Mr. Peter Rittmeyer, the

some of the falling bricks.

It was thought that several others were buried beneath the ruins, and in the excitement which the disaster created, it was citement which the disaster created, it was impossible to get any satisfactory intelligence. Some said that there had been a man in the yard, and others insisted that the man was safe. Chief Engineer Lyle who was on the ground, went to work earnestly and remove the rubbish. Soon the body of a man appeared. With the assistance of some of the Fifth Ward police the man was got out. He was dead. lice the man was got out. He was dead, although the body was yet quite warm. His skull had been fractured, and his back was broken. He was at the hydrant when the wall fell.

The deceased was named Chas. Holman. He was 17 years of age, and resided at No. 1023 Parrish street. He was a barber, but went down to the place this morning to assist his uncle, Mr. Rettmyer, in doing some

Coroner Daniels was notified, and will at once investigate the accident.

FIRE PROOF SAFE BLOWN OPEN .- The counting house at the lumber yard of Allen Gillingham & Co., on Thirtieth street, Wes Philadelphia, was entered last night a eleven o'clock. The thieves are supposed to have landed from a boat at the rear of the yard, which extends to the river. The fire proof safe was charged with powder and was blown open. The door was torn com-pletely off. The windows of the building were all shattered. Officer Randall was within one hundred feet of the place when the explosion took place. He immediately got into the yard by scaling the fence, but saw nothing of the thieves. The only thing missing is a half box of coins.

MALICIOUS MISCHIEF.-John Higgins keeps a tavern in the neighborhood of Thir-teenth street and Columbia avenue. Close to him is a rival establishment. Both are contending for the patronage of a fire company, located in the vicinity. Higgins was arrested yesterday for malicious mischief, and it seems that he has been annoying his neighbor by throwing stones through the window. He was caught in the act yester-day. John was introduced to Alderman Massey. As the breaking of the windows was shown to have been done maliciously, he was held in \$800 bail for his appearance at court.

CHILD BURNED.—A little girl, named Mary Reinish, aged six years, was so badly burned, yesterday afternoon, that her life is despaired of. She was playing about a bon-fire, on a lot, at Thirty-sixth and Market streets, close to the residence of her parents, when her clothes took fire from some of the burning shavings. The engineer of the West Philadelphia Steam Fire Engine extinguished the flames by throwing his coat around the child, but she was terribly injured befo. e he got there.

Recc ing Stolen Goods,-James Saston, the proprietor of a lager beer saloon, on Shippen street, below Third, was before Alderman Tittermary, this morning, upon the charge of receiving some of the goods stolen by Frank Chambers, a messenger, whose arrest was noticed yesterday. Saston was committed to answer.

A BAD Boy.-A colored boy, named John Disbery, was committed by Alderman Allen this merning for assault and battery upon a lad named Farron. The latter had his head badly cut by a stone which was thrown at him by Disbery. The affair happened in Ludlow street, above Thirty-ninth.

INTERESTING LECTURE.—A lecture on an interesting topic will be delivered by Dr. O'Conner, at St. Joseph's Church, Fourth street above Spruce, this evening. There will also be given a fine selection of sacred music

DISORDERLY HOUSE.-Mary Tracy was before Recorder Eneu, yesterday afternoon, upon the charge of keeping a disorderly house, at No. 805 South Eighth street. She was held in \$1,500 bail for trial.

LECTURE ON SUPERSTITION.-Thomas M. Coleman, Esq., will deliver an interesting lecture this evening, at Mechanics' Hall. Fourth and George street, on "Superstition,"

L' OAKFORDS' Continental Hotel,

MRS. ELIZABETH CADY STANTON had MRS, ELIZABETH CADY STANTON had eight votes for Congress—eight gallant fellows whe would rather have Elizabeth familiarly known as 'Betg.' to represent them than John Morrissey. We do not know the physical proportion of Betay, but we suppose she is of some size, as the New York papers were continually relevating before the election 'that heavy. Betz would change hands in the issne.' It Elizabeth would succeed in the political arena, we would recommend a change of dress, such as sold at Charles Stokes & Co.'s "ene-price, under the Continental.

The Ladies of Philadelphia, and those visiting eur city, are invited to examine the elegant stock of Furs for fall and winter wear now open at our Store under the Conlinental Hotel. Charles Oakford & Son, Furriers.

New Jersey Matters. THE WILLIAMSTOWN RAILROAD .- The arrangements for commencing work on this new railroad are advancing quite satisfac-torily. The route, it is said, has been fixed to connect at the Jackson station, on the to connect at the Jackson station, on the Camden and Atlantic Railroad, with the Raritan and Delaware Bay Railroad, and thence by way of Williamstown and Glassboro', to Pennsville, on the Delaware river. This will be an important road to the local interests of the sections through which it will pass, as there is much highly improved and cultivated land all along its route, and the country is thickly populated.

SUNDAY SCHOOL MATTERS. - Yesterday the Ninth Annual Meeting of the New Jersey Sabbath School Association commenced at Newark, in the First Presbyterian Church. Preparations were made for accommodating five hundred delegates. These conventions generally excite unusual interest, because they call out the highest and best talent of the church, and are produc-tive of a vast amount of good. A large dele-gation left Camden in the morning to attend the sessions of this convention, which will continue until the evening of the 16th inst.

THE MARL BUSINESS.-The marl business in West Jersey is rapidly increasing and that valuable fertilizer is found in abundance on the lands of the West Jersey Marl Company, and two or three trains of cars are daily engaged in transporting it to different points on the railroad. Marl is found also in extensive beds in nearly every county in South Jersey. One of a very rich character is being worked on the Camden and Atlantic Railroad, near White Horse, about seven wiles from Haddonfield miles from Haddonfield.

BREAKWATER NEEDED .- The shore a BREAKWATER NEEDED.—The shore at the upper end of Atlantic City is gradually washing away, and considerable alarm has been felt for the safety of some of the houses at that point. Application will be made to the national legislature for the construction of a breakwater. Such an improvement is very much needed, and would be the means of protecting a large amount of property, as well as the Government Lighthouse itself.

REMARKABLY QUIET.-Since the large number of persons engaged in the business of keeping restaurants, hotels and victual-ing establishments in Camden were arraigned before the Court for violations of the Sunday law, the Sabbaths have been more quiet and peaceful than previously. There seems to be a determination on the art of the authorities to break up the illegal traffic in rum on Sunday, in order to pre-

HANDSOME CHURCH EDIFICE.-The new Methodist Episcopal Church edifice, which is now in process of construction, at Longa-coming, is to be one of the handsomes and most convenient of any of the new ones which are being built this centenary year.

The members of the Society to which it belongs are really proud of their house of worship. It will be completed in a few months.

Death of Col. Hollenback.

The Wilkesbarre (Pa.) Record records the sudden death of Col. Hollenback. It says: George M. Hollenback was a remarkable man. His early training made him a careful and industrious business man, and in many particulars he might have been considered too close in small matters, but he was often most liberal where the public was concerned, and his name is connected with all the charitable and useful enterprises of our county. Because he was rich, we should not overlook the magnificent subscription of a hundred thousand dollars to the Junction Canal, made because the Governor of Pennsylvania intended that an appropriation by the State to complete the North Branch Canal could not receive his sanction till the completion of the Junction was assured. The people of Northern Pennsylvania looked anxiously for the completion of our Northern outlet, and Col. Hollenback had labored for years to have the State resume operations on the abandoned line. He stepped forward and induced Mr. John Ar-

not, of Elmira, to join him, and each pledged \$100,000, and all difficulty was removed. It was a magnificent act at that time. Mr. was a magnificent act at that time. Mr. Hollenback had not grown rich by speculations with thousands easily gained to be be rashly squandered. By long labor and patient waiting his wealth had grown, and by that standard should his liberality be estimated. The gift of the site of the Cemerary was prother private and the company of the standard should his liberality be estimated. tery was another princely gift to the public.

A REMARKABLE CALCULATION.—In the year 1815, Elkanah Watson, the friend of Benjamin Franklin, made public the results of a calculation as to the population of the United States for each decade up to the year 1900. The closeness with which his predictions tally with the census reports up to the year 1860 is somewhat wonderful. Whether the rate of increase as estimated by Whether the rate of increase as estimated by him has been disturbed by the war remains to be seen. His estimates as compared with

the actual results are as follows: Actual **Estimated** Year. 1820, 1830, 1840, 1850, 1860, 1800, Population, 9,025,735 Results. 9,638,151 12,833,645 17,116,526 23,135,363 31,753,824 12,856,070 17,062,565 23,191,876 31,445,080 42,328,432 56,150,241 77,526,989 100,350,955

THE TENNESSEE CORN CROP.—The Chattanooga American Union says: "The corn tanoga American Union says: "The corn crop is turning out much better than was hoped for by the most sanguine. Up the river farmers are jubilant over splendid crops of corn, and the hay crop has been large."

THE HARRISON BOILER A SAFE STEAM BOILER.—
This new Steam Generator combines essential advantages in Assolute Safety from Explosion, in first cost and cost of repairs, durability, economy of usel, iscility of cleaning and transportation, not possessed by any other boiler.

It is formed of a combination of cast-fron hollow spheres—each eight inches in external diameter, and three eighths of an inch thick, connected by curved necks, and rebate machine made joints, held together by wrought-iron boiles with caps at the ends. The form is the strongest known; its strength to resist internal pressure/very great—unweakened as it is by punching or riveting, which lessens the strength of the wrought-iron boiler plate about forty per cent. Every boiler is tested by hydraulic pressure at 300 pounds to the square inch. It CANNOT BE BURST UNDER ANY PRACTICABLE STEAM PRISSURE.

Under pressure which might cause runturein ordine reaced by hydraulic pressure at 330 pounds to the square inch. It CANNOT BE BURST UNDER ANY PRACTICALILE STEAM PERSSURE.

Under pressure which might cause rupture in ordin any boilers, every joint in this becomes a safety valve. No other steam generator possesses this property of relief under extreme pressure without injury to itself, and thus preventing disaster.

It is not seriously affected by corrosion, which so soon impairs the strength of the wrought iron boiler, it has economy in fuel, equal to the best boilers. It gets up steam quickly, and with little fuel—produces superrested steam without separate a pparatus, and is not liable to priming or foaming.

It is easily transported, and may be taken apart so that no piece need weigh more than eighty pounds. In difficult piaces of secess, the largest boiler may be put through an opening one foot square. It is readily cleaned inside and est. Under ordinary circumstances it is kept free from permanent deposit by blowing the water entirely out under full pressure once a week. It requires no special skit in it is management. Injured parts can be renewed with great facility, as they are uniform in shape and size. When renewed the entire boiler remains as good as new. The greater part of the boiler will never need renewal, unless unfairly used.

A boiler can be increased to any extent by simply adding to its width, and being the multiplication of a single form, its strengh remains the same for all sizes, it has less weight and takes less than one-half the ground area of the ordinary cylinder boiler, without being increased in height.

Over two hundred of these boilers are now in operation, some of them in the best estabilishments in this city. For descriptive circulars or prices, apply to JOSEPH HARRISON, Jr., Harrison Boller Works, Gray's Ferry road, adolining U. S. Arsenal, Philadelpha.
