A ROUND OF DAYS.

I sang to my heart in the sunshine of May, And the garrulous bird on the sycamore spray Sang to his mate in the nest, "Sweetheart, the daffodil blooms on the lea, The blossoms are thick upon bramble and

And all through the long, merry year we will be Treu und Fest, Treu und Fest!"

I sang to my heart in the burning July, And the golden-haired sun in a sapphire

Uplifted his flery crest: And the thousand-tongued land was melo-

dious with song—
"Oh, the world shall be merry, the days shall be long, And love in the sunshine is valiant and Treu und Fest, Treu und Fest!"

I sang to my heart in the wane of the year. And the glare of the sunset hung lurid and

Far down in the sorrowful West;
The nest was forsaken, the sparrow had fled,
The music was hushed and the blossoms were dead;
But a voice through the silence and soli-

"Treu und Fest, Treu und Fest!"

And still sings that voice in the wind and the snow, "There is light after darkness, and joy after

Moe, And the love that is tried is the best: I care not though tempests be black in the sky, Though the bird may be fickle, and blos-

soms may die, What matter? My darling shall find me Treu und Fest, Treu und Festi"

CITY BULLETIN.

THE NEW HORTICULTURAL HALL .-This structure, which is now in course of erection on Broad street above Spruce, is making rapid progress towards completion. The northern and western walls are almost entirely up and the southern wall is about half finished. These walls are of brick, and are thirty-one inches in thickness. The workmen are now engaged on the front wall on Broad street, which is to be of neatly dressed cut stone. This front will have a width of seventy-five feet and a height of sixty feet. There will be a pro-jecting portice in front, supported by columns of red sandstone. The window dressings are to be of the same material, which will form a striking and pleasing contrast to the pearl-gray stone of which the main body of the front will be com-

On the ground floor there will be two large halls. The one adjoining Broad street will be twenty-nine by seventy feet in di-mensions, and twelve feet in the clear. In the rear of this there is to be a banquetinghall, seventy by one hundred and twelve feet, and with a capacity for comfertably seating about one thousand persons. Both of these halls will be well lighted and ven-tilated. At the west end of the building will be a room twenty-five by seventy feet, with a height of sixteen feet. This will be devoted to the purposes of rehearsal, and will have a private entrance on Westmore-

land street, as well as a private stairway leading to the stage and main hall above. The auditorium of the main hall will be seventy one by one hundred and twenty feet in dimensions, and will contain a comfortable seating capacity for fifteen hundred persons, all the seats being regularly numbered. The entrance will be from the Broad street front, by an easy rise of only six feet. This will open into an ample yestibule, twenty by forty-two feet, adjoining which will be the ticket offices and dressing rooms for ladies and gentlemen on either side, each seventeen by twenty-nine feet.

Over the dressing-rooms, and fronting on Broad street, will be a handsome, well-lighted foyer, twenty-nine by seventy-one feet, with a height of thirty feet. /The fove will contain the library of the society, and will also be neatly arranged for their regular meetings, and for parlor concerts and simi-

In entertainments.

The main hall will be one of the largest and most attractive in the city. The stage will have an elevation of five feet above the main floor, and, being seventy-one feet deep by thirty-one feet in width, it will afford ac-commodations for about two hundred chorus singers, in addition to the orchestra and other necessary accompaniments. It will be flanked by ornamental columns and pro-scenium boxes, leaving an opening of fortytwo feet for the curtain.

On a level with the foyer, and extending around three sides of the main hall, will be a narrow gallery, resting on handsome brackets, and having stairways descending to the main floor at the west end. It will afford sitting room for five hundred persons, making a total capacity in the main hall for full two thousand spectators. This gallery will be similar to the one in the apper saloon of the old Chinese Museum. During the exhibitions of the society, balls, &c., the seats will be removed, thus affording de-

lightful accommodations for promenading.

The ceiling of the main hall will be fifty feet in height. In its construction the greatest attention will be devoted to the end of securing the best musical effects attainable The walls will be elegantly frescoed, and all the interior decorations and upholstering will be arranged with the view of aiding the

The entire capacity of the hall will be ample for three thousand persons. There will be two doorways on Westmoreland street, and two others on the north side of the building, in addition to the main entrance on Broad street. All the doors will open outwards.

RELIGIOUS CONVENTION.—A convention composed of delegates from the Young Men's Christian Associations throughout the country was in session in this city yesterday. The officers were Rev. J. H. kobinson, of Harrisburg, President, John Wanamaker, of Philadelphia, Vice President, and Albert Rondthaler, of Bethlehem. Secretary. Resolutions requesting the Christian young men throughout the land to organize Christian associations in the villages, towns and cities where they do not now exist; urging the pastors of churches to co-operate in the movement, and requesting the new associations to report their organizations to the Young Men's Christian Association of Philadelphia, and to receive documents and other aid to assist in carrying on operations, were adopted. John Wana-maker, P. B. Simons, Thomas Toleman, N. L. Evans, R. H. Hinckley and G. W. Mears were appointed an Executive Committee, with authority to district the State and to appoint persons to effect local organizations wherever needed. A. B. Riggs, of Pittsburgh, Jos. A. Rice, of Bethlehem, and A. T. Goodman, were appointed corresponding members of this committee. No other business of importance was transacted.

THE TWENTY-THIRD WARD THIEVES' DEN.-Mr. Benjamin Harper, the owner of the house on Second street, near Nicetown lane, which had been converted into a receptacle for stolen property, states that he had no knowledge of the uses to which his house has been put. For the purpose of having the building tenanted, he rented two rooms to the German who represented himself as being very poor, and stated that he was engaged in buying and seiling poultry about the

ACCIDENTALLY SHOT .- William Shields, aged 34 years, residing in Manayunk, was shot through the head by the accidental disthe charge of a gun, on a boat at the mouth of

SHOOTING AFFAIR.—Thomas Ryan, aged fourteen years, was shot in both legs, below the knees, about six o'clock last evening, at South Street wharf. The lad, with a number of others, was stoning a negro-named John Hall, who was arrested for having fired the shot, but he denies all knowledge of it. The wounded boy was taken to the hospital.

A SINGULAR CHARGE.—Mr. John H. Diehl was bound over before Alderman Jones, on Tuesday last, upon a charge of illegal voting at the late election. An affidavit of Mr. A. N. Haskins, charges that Mr. Diehl's legal residence is at Delanco, N. J., and that he voted in the Ninth Ward, upon a temporary and illegal residence at the Washington House in this city.

ECONOMY IN FUEL.—It is seldom any new ECONOMY IN FUEL.—It is seldom any new attacle introduced to the public wins its way into popular favor as rapidly or as effectually as the cele-frated stove patented, manufactured and sold by Mr. J. Chn S. Clark, No. 1003 Market street. All who have tried this cook stove of Mr. Clark's are delighted with the admirable manner in which it operates Mr. Clark tells his customers plainly that it is the best-cook stove ever inventee; that for all kinds of baking and cooking purposes it is unequaled; that it is more durable and conveilent than any other stove in use; that its price is more moderate; that it consume that the small quantity of one ton of coal in six months in do up the cooking, heating and boiling of a large fantly, all of which he warrants to be as represented. The fact, therefore, that no complaints have been made in the best possible evidence that strong as are the representations of Mr. Clark respecting his popular stoves, they are stricily true. We recommend all cur readers who have not yet doneso to give this stove a trial.

CONFECTIONS SURPASSINGLY FINE FOR THE SEARON.—The reputation of Mr. Stephen F. Clark's popular Stove Establishment, No. 1008 Market street.

THE GREATEST LABOR-SAVING INVEN-TION OF THE AGE.—It is no exaggeration to say that of all inventions that have contributed to reduce manual labor, and promote the health and happiness of the race, the Wheeler & Wison Sewing Machine stands at the head. The demand for these popular machines at the office of the agents, Messrs. Peterson & Little, No. 701 Chestaut street, is greater, we have reason to believe, than at any previous period in their history.

THE TENANT-HOUSE COMPANY.-About eighteen months ago a proposition was made by some capitalists in Camden to purchase twenty or thirty acres of ground with-in or in close proximity to the city, on which they were to erect some five hundred comfortable dwelling houses. These were to be sold to those in want of homes, by the payment down of the price the lots cost, in proportion to that paid for the whole ground, and the balance in easy instalments. These gentlemen went so far as to obtain from the Legislature, last winter, a charter for carrying out their contemplated enterprise. But, up to the present time, no further action has been taken. Why the matter has

thus been delayed none, save those who are immediately interested, can divine. ANNUAL FESTIVAL.—On Thursday evening the ladies and members connected with the Methodist Episcopal Church, of Atlantic City, gave their annual festival and supper at the Alhambra, and although the rain iell in greater torrents than the meteoric showers the attendance was very large. showers, the attendance was very large. The proceeds are to be appropriated for the benefit of the church, and a handsome sum

was realized. May's Landing.—It is contemplated by some influential gentlemen to connect May's Landing and Egg Harbor City, by a rail-road. Part of the route was surveyed three or four years since. This road will be a great convenience.

Robbery.—A few days ago a widow, whose husband was killed in the late war, residing in Atlantic City, while temporarily absent, had her house broken open, and some goods and twenty dollars in money were taken therefrom.

A RICH COUPLE.—A London correspondent says: The betrothal is just declared of perhaps our very wealthiest marriageable lady (for Miss Burdett Coutts I look upon as already wedded to her good works), and Dame Fortune, in her blindest mood, has decreed that she shall find a bridegroom nearly as wealthy as herself. Such will be the case in the marriage of Earl Beauchamp with Miss Dundas-Christopher-Hamilton-Nisbett, in whom each patronymic is understood to imply a fortune. Lord Beauchamp, well-known in the House of Commons as the staunch Conservative member for Worcestershire, succeeded last year, by the death of his younger brother, to the title and estates, estimated at over forty thou-sand a year. But his bride is even more richly endowed, for it is admitted that she will ultimately succeed to an income of more than sixty thousand a year, to say nothing of an immense and increasing amount of ready money.

THE General Assembly of the Presbyterian Church South, in session at Memphis, was engaged yesterday, principally in discussing the rules of parliamentary order recussing the rules of parmamentary order re-ported by the Revision Committee, and hearing the reports of the Executive Com-mittee, of the Committee on Domestic Mis-sions, and on Education. The proceedings of the Assembly awaken general interest, and its deliberations are harmonious.

THE HARRISON BOILER A SAFE STEAM

This new Steam generator combines essential advantages in AbsOLUTE SAFTY FROM EXPLOSION in first cost and cost of repairs, durability, economy of suel, facility of cleaning and transportation, not possessed by any other boiler.

It is formed of a combination of cast-fron hollow spheres—each eight inches in external diameter, and three eighths of an inch thick, connected by curved necks, and rebate machine made joints, hald together by wrought-iron boils with caps at the ends. The form is the strongest known; its strength to resist internal pressure/very great—unweakened as it is by punching or riveting, which lessens the strength of the wrought-iron boiler plate about forty per cent. Every boiler is tested by hydraulic pressure at 200 pounds to the equate inch. IT CANNOT BE BURST UNDER ANY PRACTICA—BLE STEAM PRESSUEE.

Under pressure which might cause rupture in ordinary beliefs, every joint in this becomes a safety valve. No other steam generator possesses this property of reief under extreme pressure without injury to liself, and thus preventing disaster.

It is not seriously aff cted by corrosion, which so soon impairs the strength of the wrought iron boller, it has economy in fuel, equal to the best boilers.

It has economy in fuel, equal to the best boilers.

It is easily transported, and may be taken apart so that no piece need weigh more than eighty pounds. In difficult places of access, the largest boiler may be put through an opening one foot square. It is readily a cleaned inside and ent. Under ordinary circumstances it is key free from permanent deposit by blowing the water entirely out under full pressure once a week.
