

WEIGHING THE BABY.

How many pounds does the baby weigh—Baby who came but a month ago? How many pounds from the crowning curl To the rosy point of the reddest toe? Grandfather ties the kerchief's knot. Tenderly guides the swinging weight, And carefully over his glasses peers To read the record, "Only eight."

EASY LESSONS IN GEOGRAPHY.

The Earth is an old subject, we don't know how old. Wise men have endeavored to ascertain its age in various ways, and have succeeded very well, only differing in their calculations a few thousand centuries or thereabouts. We have several reasons for writing upon the Earth, the principal one being the imperfect facilities afforded for getting upon any other planet to write. Nothing prevents our writing upon the sun, or the moon, except the difficulty in getting there.

Lieut.-Gen. Sherman and His Ways.

The idea generally prevails that commanding generals are very didactic on the battle field, and give their orders in precise language and stern tones. A little familiarity with actual war will soon dispel this false impression, particularly if you meet Sherman on the battle-field, for there is less of dignity, display and grandiloquence in him than any other general whom I have met during the war.
