there were fourteen thousand and thirty-nine applications for patents, Eight thousand seven hundred and sixteen patents (including reissues, and assigns were patents (including seven hundred and sixteen patents (including reissues and assigns) were issued; fourteen hundred and fifteen applications were allowed, but patents have not issued thereon by reason of the non-payment of the final fees; twenty-five hundred and seventy-nine caveats were granted.

During the arms.

pranted.

During the same period the receipts were four hundred and sixty thousand four hundred and sixteen dollars and eighty cents, and the expenditures three hundred and forty-three thousand six hundred and ninety-seven dollars and seventy-three cents, leaving a balance of one hundred and sixteen thousand seven hundred and sixteen thousand seven hundred and sixteen thousand seven hundred and seventy-eight dollars and nineteen dollars and seven thousand five hundred and seventy-eight dollars and nineteen cents, the balance on hand September 30, 1865, makes the amount now in the Treasury to the credit of the patent fund two hundred and ninety-seven dollars and seventy-six cents.

On the 6th instant the Union Pacific Religion

The passenger and freight traffic of the road is already considerable, and gives promise of great increase in the future. The gross receipts of one hundred and five miles of main line, and thirty miles of branch road, for the month of September, were forty-two thousand dollars.

The commissioners, under date of September 28, report that they have examined, and they recommend the acceptance of, an additional section of the road of the Central Pacific Railroad Company of California, making a distance of seventy-four miles from Sacramento.

There are on the road, or in transitu, thirty locomotives and six hundred and seventy-one cars. The company have in Sacramento the machinery for a large machine and repair shop, including a powerful horizontal engine for furnishing the driving power. The shop is in process of erection, and the company expect soon to be able to build locomotives and cars equal to those furnished in the Eastern States. The tunnels have been constructed sufficiently wide to accommodate double tracks. A full force is at present employed in constructing a tunnel sixteen hundred feet in length at the summit of the Sierra Nevada, and one of nine hundred feet in length seven miles east of that point.

Examinations and surveys indicate the veller

summit of the Sierra Nevada, and one of nine hundred feet in length seven miles east of that point.

Examinations and surveys indicate the valley of the Humboldt as the most advantageous route through the State of Nevada.

The Atchiscn and Pike's Peak Railroad Company have completed forty miles of their road west from Atchison. The company report that they have on hand six locomotives, two passenger, one baggage and express, fourteen box, and thirty-two flat-cars, three tanks, and two turntables, &c., with a machine shop and a blacksmith shop complete, the former being built of stone masonry, and covered with an iron roof, and they are now engaged in the erection of a round-house, The roal is generally built in avery substantial manner; nearly all the bridges and culverts are of the best quality of solid masonary. The longer span bridges are of the Howe truss pattern. The road-bed for the next thirty miles is nearly ready for the superstructure. The ties, iron, chains and spikes for the same are on hand or in transitu. The company report an expenditure, in the construction and equipment of the road, of two million three hundred and seven thousand six hundred and fitty dollars. They confidently expect that sixty miles of road will be completed by the first of January next.

The Western Pacific Railroad Company filed, on the 13th of last July, their acceptance of the provisions and conditions of the resolution of Congress extending the time for the construction of the first section of twenty miles of their road, approved May 21, 1868. On the 2d instant this department received the report of the government commissioners, showing the completion and equipment of that section. It extends from Ean Jose, in the direction of Sacramento, to a point in Alameda County, a distance of twenty miles.

The report of the President of the Sloux City and Pacific Railroad Company, under date of

mento, to a point in Alameda County, a distance of twenty miles.

The report of the President of the Sloux City and Pacific Railroad Comfany, under date of the left inst. sets forth that renewed surveys by their engineers, during the past season, justify and confirm the opinion that the most direct and practicable route from Sloux City to a point which they have selected upon the Union Pacific Railroad from Omaha, is on the east side of the Missouri River, to a crossing near De Soto, thence via Fish Creek to the Platie Valley and thence to the point of connection with ine latter road at Fremont, forty-six and one-half miles west from Omaha. It is also stated that the grading of the northern sixty-eight miles has been placed under contract, and a force already engaged on the work. The company has arranged to construct about six miles of road, which will connect its line very advantageously with the cedar Rapids Railroad at a point where it is expected that the latter road will reach the Missouri River Valley in a few plays.

plays.
There is nothing on file in the department, to There is nothing on file in the department, to show that the company authorized to construct the Atlantic and Pacific Railroad by the act of Congress approved July 27, 1866, have accepted the provisions of the act.

The work on the wagon road from Niobrarato (Virginia City has been continued, though with Berious annoyance from hostile Indians. The route has been shortened nearly one hundred imiles.

route has been shortened nearly one hundred miles.
From the report of the architect of the Capitol extension, it appears that the northern and western porticos of the north wing are completed, and the columns of the southern portico are soon to be set. It is believed that the ensuing year will witness the completion of all the porticos. Efforts have been made, which it is hoped will prove successful, to improve the imperfect and objectionable ventilation of the Senate chamber and hall of the House of Representatives.

senate treather and han of the House of Representatives.

The balance on hand of the appropriation for the Capitol extension, October 31, 1886, was seighty thousand four hundred and ten dollars and eighty-three cents. The architect estimates that two hundred and fifty thousand dollars will be required to continue the work during the next fiscal year.

The appropriation for lighting, by means of galvanic electricity, the one thousand and galvanic electricity, the one thousand and

eighty-three gas-burners of the dome, has proved a complete success. They can now be lighted in a few minutes.

The appropriations for repairing and furnishing the Executive Mansion have been expended in a judicious and satisfactory manner, and the grounds between it and the Treasury Deartment have been improved and empellighed. partment have been improved and embellished The relations of the general government to the District, and the duties resulting therefrom, have been fully and elaborately discussed in the recent annual reports of this department. I refer to the carefully considered views there presented, and cordially commend them to favorable engisteration.

presented, and cordinally commend them to favorable consideration.

The sums advanced to United States Marshals during the year ending June 30, 1866, for defraying expenses of the United States courts, including fees of marshals, jurors, and witnesses, maintenance of prisoners, and continger cles of holding the courts, amount in all to \$889,550,20;

western the street the constant of the control of t

sents.

The report of the Board of Directors contains

The report of the Board of Directors contains an interesting comparison of the system of instruction of semi-mutes which prevails in this country with that adopted in Germany. It is proposed to confer upon the papils the advantages and benefits of each method.

Congress, by an act approved May 20, 1858, allowed for five years to the institution three thousand dollars per annum for salaries and incidental expenses. At the expiration of this period four thousand dollars was allowed for this purpose, and successive annual appropriations were made respectively of four thousand and four hundred dollars, seven thousand five hundred dollars, and twelve thousand five hundred dollars.

The directors, in their annual report for 1865, proposed, in lieu of the annual allowance for each government pupil, and appropriation in gross for the support of the institution. Their estimate was twenty thousand seven hundred dollars, which sum was allowed by Congress for the current year.

Congress has appropriated one hundred and

estimate was twenty thousand seven hundred dollars, which sum was allowed by Congress for the current year.

Congress has appropriated one hundred and thirty-six thousand and sixty-five dollars and eighty-seven cents for the purchase of ground, the erection of buildings, and other improvements. Deducting from the existing appropriation the sum of three thousand and three hundred dollars, to which the institution would have had undoubted claim on accout of the twenty-two government pupils, and it appears that Congress, in addition to the payment of the stipulated per capita charges, has advanced to this institution tne sum of one hundred and sixty-five dollars and eighty-seven cents.

The directors submit the following estimate for the next year: Twenty-five thousand dollars for the support of the institution, and sixty-two thousand one hundred and seventy-five dollars for buildings and improvements, making an aggregate of eighty-seven thousand one hundred and seventy-five dollars in excess of the last appropriations for the sup ole to the support of the support for the support of the support of the institution, and sixty-two thousand one hundred and seventy-five dollars for buildings and improvements, making an aggregate of eighty-seven thousand one hundred and seventy-five dollars in excess of the last appropriations for the seme objects.

lars in excess of the last appropriations for the same objects.

The whole subject is respectfully presented for consideration, in connection with the estimates furnished by the Board. In my opinion no further sums should be advanced until the charter of the institution be so modified as to secure to the government an efficient control in its management, and a proper accountability in the application and disbursement of the funds appropriated.

appropriated.

I desire to bear testimony to the energetic and faithful manner in which the officers of this department have, since my connection with it, discharged their duties; and I cannot suffer this opportunity to pass, without asserting their just claims to more ample compensation.

I am, sir, very respectfully, your obedient servant,

O. H. Browning,

Secretary of the Interior.
