THE DAIL Y EVENING BULLETIN : PHILADELPHIA, SATURDAY DECEMBER 8. 1886 .- TRIPLE SHEET.

THE MISSING STEAMSHIP BBITANNIA.

Thirty-four Days Out---List of the Passengers.

From to-day's New York Herald, I

The first notice of the steamship Britannia. of the Anchor line, being over due, was published in the Herald, on Sunday, Nopublished in the *Herald*, on Sunday, No-vember 25. As thirty-four days have now elapsed since she put to sea, serious appre-hensions for her safety are entertained by those having friends and relatives on board. The Britannia plied between Glasgow and New York. She left the former port on the 3d of November; touched at Moville, below Londonderry, on the 4th, and left on the same day for New York. Since then no tidings have been received of her. The last dates from St. Michaels (one of the Western islands) are to November 8, and from Fayal (another of the Western islands) to Novem-(another of the Western islands) to November 10; as she may have since put into one of these places in distress, or been driven further towards home to the Island of St. Thomas, or some other of the West India

Islands, there are still hopes that the miss-ing steamship may be safe. The Britannia is a bark-rigged screw steamer of 1,391 tons. She was built in the Clyde, by Todd & McGregor, in 1863; has two engines, with 360 horse power, and has been running since she was launched: If her machinery should have become broken or disarranged so as to render steam power or disarranged so as to render scent power useless, her propeller could be removed on deck. The Britannia is commanded by Captain James Laird.

Since the year 1786, when Mont Blane was first ascended by Saussure, there have been twelve fatal accidents during the ascensions of the mountain. That first man thought he was doing a very smart thing. Perhaps so, but we are not Saussure. There were 35 Boston "drummers" at a hotel in Bangor recently. Such a "long roll" is hard to beat, even among the Maine Bangeis,

Facts and Fancies

The medical savans of Germany have de-cided that the exhalations of plants produce fever and ague. On the principle of curing with "a hair of the dog that bit you" they re-commend patients who have exhaled too much to try XX-ale.

A volume of sermons by Bishop Colenso is on the eve of publication. It will make a neat birth-day present, being full of Natal ideas.

ideas. Some statistical genius declares that more money is expended in the United States for cigars than for all the common schools in the country. A wag, who is undoubtedly a lover of the weed, seeing the statement go-ing through the papers, gets off the follow-ing: It has been calculated that the cost of washing linen that might as well be worn washing linen that might as well be worn washing linen that might as well be worn two days longer, amounts to enough in this country to more than defray the expenses of the American Board of Foreign Missions. The expenses of buttons on the backs of coats, where they are of no earthly use, is equal to the support of all of our orphan asylums. The value of tails to dress-coats (of no value in reality for warmth or conveasylums. The value of tails to dress-coats (of no value in reality for warmth or conve-nience) is actually greater than the cost of our excellent system of common schools. It is estimated that the value of old boots thrown aside, which might have been worn at least a day longer, is more than enough to buy a flannel night-gown for every baby in the land. in the land.

We are glad to learn that the United States are at last about to interfere in behalf of the persecuted people of Candla. Arrangements are being made to give Turkey a first rate dressing—about Christmas time.

The cable news, according to a morning paper, informs us that "provisions exhibit no few features, and the demands for all kinks is moderate." The depreciation of kinks is a good sign.

A gymnast named Garcia, at a circus in Havana, fell the other day from a height of forty feet during a performance, and dislo-cated both wrists. A gym-nasty accident.

OBSTRUCTIONS IN THE SAVANNAH RIVER -The Savannah (Ga.) News urges the legis-lature to make an adequate appropriation for the opening of the Savannah river. The for the opening of the Savannan river. The numerous obstructions which were placed in the river during the war have made the channel in some places very tortuous, and in others very shallow; so that it is only with the superturbation of the two places with the greatest difficulty that vessels of heavy tonnage can reach the city. The municipal authorities have negotiated the municipal authorities have negotiated the purchase of a dredging machine, in the ex-pectation that the legislature will grant them assistance. The Λ cws claims that the im-provement of the channel is a benefit to the whole State, and that if it is not effected the success of the Atlantic and Gulf Railroad, in the provide the State has invested nearly whose bonds the State has invested nearly \$1,000,000, will be seriously endangered.

ANOTHEE SHOOTING AFFAIR — A trivial incident occurred at Lexington, Va., a few days ago. One of General Lee's pupils shot and killed a respectable black man of that town. On his examination he stated that the negro had "insulted him." This statement was corroborated by spectators of the occurrence. The learned Dogberry; who heard the case made the following points in his decision: That the laws of Virginia have always recognized the difference between the white man and the black; that a white man may protect himself from negro in-sults; that; though the deed was clearly proved, it was the result of the insult, and he should discharge the defendant from
