BERLIN. Dec. 18, 1 P. M.-The National German Conference commenced its session

in this city to-day.

LONDON, December 18th, 1 P. M.—The President's message has reached here by steamer and is published in full. It is the general topic of conversation and is variously commented upon by the press. Its statements in regard to the finances of the United States is very well, but what it says in regard to the Fenians is considered as rather weak and tame.

LONDON, Dec. 18, 11 A. M.-U.S. Five-Twenties open with more firmness and are quoted at this hour at 711@712. American Railway Shares are also rather better. Sales or Illinois Central Shares are reported at 78; Erie Railroad Shares have been done at 471 @ 471.

From Washington.

(Special Despatch to the Bulletin.) WASHINGTON, Dec. 18 .- A delegation of wool-growers had a protracted interview to-day with Secretary McCulloch, for the purpose of urging him to recommend additional protection to this important interest.

They assured him that unless something was done they would be compelled to abandon wool growing. A delegation from the present seat of Go-

vernment of North Carolina had a long conference to-day with the President relative to matters in that State. They are violently opposed to the Stevens bill, providing for a new civil Government.

The Senate Foreign Affairs Committee had under consideration to-day the nominations of General Dix and other ministers.

A Fenian Report.

[To the New York Associated Press.] SWEETSBURG, Dec. 18.—Much excitement was created in this village to-day, an alarm having been given that the Fenians were coming to rescue the prisoners.

The volunteers immediately got under arms, and the whole force has gone out to meet the enemy.

WASHINGTON, Dec. 18.—Quite a contest has sprung up in the House of Repre sentatives in an effort to strike from the appropriation bill the large sum appropriated

Mr. Brandegee (Conn.) offered a resolution instructing the Committee of Naval Affairs to inquire into and report all the facts connected with the destruction by fire of the iron-clad war steamer, New Ironsides, on the night of the lith of December, together with such recommendation as the facts may demand, with power to send for persons and papers, and to report at any time

Mr. Washburne (Ill.) favored the resolution but said he would like the gentleman from Connecticutto

state the facts connected with the destruction of that magnificent front elad.

Mr. Branderee declined to make any statement at present. It was a subject of importance, and on on which the House and country should be informed. It would be inferorous to make any statement of xn rick testimosy, such as had been published in the newspapers. The resolution was adopted.

The Speaker proceeded to call the committees for reports. The Speaker proceeded to call the committees for reports.

Mr. Price (Iowa), from the Committee on the Pacifix Railroad, reportee back adversely the Secare bill of the Railroad, reportee back adversely the Secare bill of the Bass session, granting lands to aid in the construction of a railroad and telegroph line from Placerville, the fornis, to the most fear-bile point of intersection with the Pacific Railroad in Lievada. The amendments were agreed to and Mr. Price explained the objects of the bill. It was to aid in the construction of a railroad so connect with a road authorized at the last session, with Page's Sound. It made like gran so of land with those made in that bill. The road was to enothing more por less than a conjunction of the organ and California Railroad till it struck Admiralty linet.

Mr. Washburne (Ill.) suggested the postponement of the bill till the record "Inserted". Tannary. The missly Inlet.—
Mr. Washburne (III.) suggested the postponement of
the bill till the second Thesday in January. The
House had last session asked for information as to the
quantity of public land already appropriated. That
information had not yet been received, at least he had
not seen it. It was important that the House should
kroweractly where the Governments wood in reradion

from Iowa (Mr. Price) would consent to the postponement.

nent. Mr. Price assented provided that it was made a special order.

Mr. Washburne (Ill.) bad no objection to that.

CASTOR WHEELS. CASTOR WHEELS.

TOR HEALTH AND STRENGTH USE CAPE WHEELS: & CO.'S PATENT GLASS CASTOR WHEELS: & CO.'S PATENT GLASS CASTOR These wheels are designed for Pianos, Bedsteads, &c. We claim that they give to Pianos a greatly increased force of sound, without detracting from the harmony and melody of the instrument, rendering every note more distinct to the ear. This is so apparent that they are now being applied by many to these valuable musical instruments. Dr. Valentine Mott, previous to his death, pronounced the Glass Castor Wheels an invaluable invention for bedfisst invalids, who are guarded against the damp floors after undergoing the process of cleaning, or where dampness is produced from any other cause. Aside from this, Housekeepers are relieved from the dread of having their carpets cut or torn, as frequently happens from those now in use, often caused by a rust, which adheres with gine-like tenacity. No such annoyance can possibly proceed from the Glass Castor Wheels, as we all know that glass is non-corrosive. There are no rough or unfinished edges to the Glass Wheels, such as we often find from the Glass Castor Wheels, as we all know that glass is non-corrosive. There are no rough or undinished edges to the Glass Wheels, such as we often find in those of iron, and the latter, though smoothly finished, will soop rust, from the dampness of the atmosphere, if nothing else, producing roughness on the surface, or edge, while the former will always maintain the amoothness of glass, just as they are finished.

By sleeping upon glass wheels you retain all the electricity you had in your body on retiring, and you get up in the morning feeling as freeh and active as a young man. Glass being a non-conductor, the electricity gained while in bed cannot pass off. Ask your doctor what he thinks of the Glass Castor Wheels. Ask him if all diseases, with the exception of chronic diseases, are not caused from the want of electricity. We have a man in our place, whom the doctors pronounced past curing, with the inflammatory rheumatism. The wheels cured him in less than four weeks. He is to-day a stout healthy man. These are facts which can be proven on application at our office. No. 208 Race street, Philadelphia, or at our Factory, at Westville, New Jersey where we have some sixty hands employed in the manufacture of the Glass Castor Wheels. sor Wheels.

§100 will be paid to any one who will say they have not received any benefit or relief after using Capewell & Co.'s Patent Glass Castors. A sample set (4) of the Wheels sent to any part of the United States, on receipt of \$1 50.
