Those that see Paris on the Boulevards, or in the Champ de Mars, or in the Bois de Boulogne, or in the Mabille gardens, or in still worse haunts than the latter, see but one phase of Paris life, and they are not fit to write about it. The Paris of the University, the Institute, the Sorbonne, the French Academy, the great schools of science and art, the libraries, the museums, the hospitals—this is a Paris wholly unknown to them. And yet these institutions are the

glory as well as the strength of Paris. They give it the leading influence all over the world, X in matters of intellectual culture. Why these should be neglected by visitors and correspondents, for the sake of telling over the old, old story of the splendor, the gayety and the vice of Paris, is a thing hard to understand.

> THEIR FIRST MORTGAGE BONDS As an Investment.

The rapid progress of the Union Pacific Railroad, now ts western connections, an unbroken line across the coninent, attracts attention to the value of the First Mort he first question asked by prudent investors is, "Are here bonds recure?" Next, "Are they a profitable invest nenty". To reply in brief: lst. The early completion of the whole great line to the Pacific is as certain as any future business event can be. The Government grant of over twenty million across of and and fifty million dollars in its own bonds practically. guarantees it. One fourth of the work is already done, an he track continues to be laid at the rate of two miles a day, 2d. The Union Pacific Railroad bonds are issued upon what promises to be one of the most profitable lines of ailroad in the country. For many years it must be the only line connecting the Atlantic and Pacific; and being without competition, it can maintain remunerative rates.

3d. 376 miles of this road are finished, and fully equit ped

daily running each way. The materials for the remaining 141 miles to the eastern base of the Rocky Mountains are on hand, and it is under contract to be done in September 4th. The net earnings of the sections already finished are several times greater than the gold interest upon the First Mortgage Bonds upon such sections, and if not auleted would not only pay interest and expenses, but be rofitable to the Company.

5th. The Union Pacific Railroad bonds can be issued only as the road progresses and therefore can never be in the market unless they represent a bona side property. 6th. Their amount is strictly limited by law to a sum equal to what is granted by the U.S. Government, and for which it takes a second lien as its security, This smount upon the first 517 miles west from Omaha is only \$16,000 per mile. o,000 per mine, . The fact that the U.S. Government considers a second lien upon the road a good investment, and that some of the shrewgest railroad builders of the country have ally paid in five million dollars upon the stock (which s to them a third lien), may well inspire confidence in a 8th. Although it is not claimed that there can be any better securities than Governments, there are parties who consider a first mortgage upon such a property as this the greater interest.

9th. As the Union Pacific Railroad bonds are offered for the present at 90 cents on the dollar and accrued interest, they are the cheapest security in the market, being 15 per cent. less than U. S. Stocks. 10th. At the current rate of premium on gold, they pay

and are rapidly filling up. The shore is lined with bath-houses, upwards of fifty new ones

having been put up this season, and the bathing is delicious. The lamps have been put up, and are a great advantage. Many of the avenues have been gravelled and improved in a satisfactory manner to the Street Committee, and the day and

night police are vigilant in the discharge of thei

duties. Upwards of twenty new and fine buildings have already been contracted for, to be com-

menced soon, so that they will be ready for next season. The indications are that a hundred new ones will be completed before that time. Horse-

cars are now run the whole length of the city

and they are highly appreciated by parties who go to the inlet for fishing or sailing excursions.

The rapidity with which the city is advancing is truly astonishing, and in a few years more it will
