"The Man with the Broken Ear." Translated from the French of Edmond About, by Henry Holt. Leopold & Holt, New York. According to the various chroniclers, Professor Johann Meiser, deeply interested in physiological studies, especially occupied with the theory of desiccation, flourished in Dantzig during the early part of this century. Drantzig in the pursuit of science, this violet-wigged naturalist had but one desire, viz., to try the experiment of desiccation upon a human subject. Rottifer and various crawling things had been dried up and laid away for a number of years, and on being subjected to immersion, had again entered upon a normal life. The success of such processes, which, in terms rather than fact, suggest certain religious rites, led him to believe that a human being might with safety be submitted to similar tests.

But how to obtain a subject was a consideration which seriously puzzled the worthy professor. How to satisfy so many quarts of water and so many quarts of clay that the dried-up outline of his elegant form would, on the proper occasion, receive its due moistening? How to convince the uneducated and unfeeling patient that his emotions would be nothing but water, and that he would avoid science for a while to deprive him of his possession, science would, in return, oblige him to pump them into him again—these, it is readily conceived, were problems not so easily solved.

Could we but feel assured that to be dried up, and laid away would involve no danger of drying up and blowing away, how many of us could thus indulge in an occasional vacation, and, to use an Hibernianism, quit the world without leaving it? How many of the nervous conservatives would like to step while the all-important question of women's rights is being adjusted? How many a poor devil would be willing to be laid on a shelf until certain inheritances had matured—for rich uncles and aunts are always tardy in keeping their engagements with expectant heirs. Nor can we easily overrate the advantages of a system which would allow the worker of mischief to withdraw himself from the scene of his misdeeds, only to return when the lapse of years had helped his victims to forget the sufferings he had occasioned. We might instance other cases in which a *quies* sleep, unlike that of Rip Van Winkle's, since it would not add to our years, would be eagerly indulged in by dissatisfied samples of humanity. But to return to our story.

In the winter of 1813, Colonel Fougas, of the Grande Armee while bearing an important message from Napoleon to General Rupp, fell into the hands of the allied forces, "as he was trying to pass the Vistula on the ice, while on his way to Dantzig." He was brought into camp as a prisoner, and, with Mexican despatch, sentenced to be executed as a spy. In obedience to that immutable law in nature, which prevents a tragedy catastrophe from coming in before the fifth act, and which invariably leads the fating and ransoming comely-uncle to determine that his ward shall marry the man she does not desire, lest the play should end too soon, Professor Meiser found a subject in Colonel Fougas. While awaiting execution, the prisoner had been confined in the tower of Liebenfels, and when, on the 12th of November, the Professor called to bid the Colonel a last farewell, he was informed that the Frenchman was "frozen to death."

The Professor, however, soon satisfied himself that the Colonel had only "fallen into that profound and fatal sleep which is not annihilated by intense cold, and which, if too prolonged, slackens respiration and circulation to a point where the most delicate physiological tests are necessary to discover the continuance of life." Without dwelling upon the casuistic considerations with which the Professor satisfied himself as to the propriety of his course, suffice it to say that he purchased the body of the Colonel for a trifle, and subjected it to the desiccation process, with what result the following extract from his last will and testament will show:

"I bequeath my books, papers and scientific collections of plants, excepting No. 5712, to my very estimable and learned friend, Herr von Humboldt.

"I bequeath all the rest of my effects, real and personal, valued at 100,000 Prussian rixdollars, or 37,500 francs, to Colonel Fougas, to be held at present desiccated, but living, and entered, in my catalogue opposite No. 3712 (Zoology).

"I trust that he will accept this feeble compensation for the ordure he has undergone in my laboratory, and the service he has rendered to science."

Another clause constituted Nicholas Meiser his legatee, in the entirely unexpected event of a failure to reanimate the Colonel. His desiccated remains, increased in three coffins, and entered in the catalogue, received but little consideration at the hands of the brewer of Dantzig. A morbid dread of ghosts, and an aversion to any division of the rich inheritance, moved the surviving Meiser to rid himself of No. 3712 with all possible despatch. He incontinently sold it to a rag merchant, and in 1859, forty-six years after desiccation, M. Leon Renault, while on his return from the Ural mines, purchased it in a junk-shop, in Berlin, in order to present it to his father, who, being interested in zoological studies, welcomed the gift with genuine joy.

Specie forlids us from entering into the details of the re-ventilation of the Colonel. His subsequent meeting with Nicholas Meiser, his falling in love with his own granddaughter, and his remarkable interview with "that young man," Napoleon the Third, furnish delicious passages abounding in truth as well as boisterous fun. M. About's style is at times brilliant, at others forcible, but always lively, while, through all, the most amusing feature is the quasi-scientific tone which pervades the work.

Mr. Holt has paraphrased M. About's little book in strong, idiomatic English, the graceful periods of which, with rare exceptions, flow as smoothly as those of the original, while his clever dedicatory letter is almost a model in its way.

"Bench and Bar," recently published by Harper & Brother's professes to be "a complete digest of the wit, humor, aptitudes and amenities of the law," and the compiler, Mr. L. J. Bigelow, in his preface, informs his readers that the field "has been faithfully gleaned." But when we remark that, with the exception of one comparatively flat report of Mr. Ingraham's, there is not a single specimen of the rare wit and humor for which the Philadelphia bar has been pre-eminent for generations, it is unnecessary to add that the author has done his work very badly indeed. A volume as large as this could easily have been compiled from this field alone, which he has so strangely neglected. Not to know Philadelphia as the fountain-head of legal wit and lore is to argue himself unknown; and Mr. Bigelow, should his book ever reach a second edition, will do well to repair the singular defect of the first, by adding a due proportion of the *joies* of the Philadelphia bar to the material which he has laboriously collected, but which is rather deficient in epigrams and point, in many of its anecdotes. For sale by T. B. Peterson & Brothers.

Hurd & Houghton, New York have just issued another volume of their "Globe Edition" of Dickens. This volume contains "Donkey & Son," complete for \$1.50. The illustrations are by Barley and Gilbert, and the clear type and fine paper of this edition make it one of the cheapest yet published. For sale by Howard Challen, 1248 Chestnut street.

CITY BULLETIN.

A DELIGHTFUL TRIP.—On Thursday, Dr. Schenck, the proprietor of the famous "Pulmonic Syrup," with characteristic liberality, gave a picnic at his elegant country seat on the Nesamony, to his employees. The party numbered about 60 persons of both sexes, and the day was one of the most delightful that could be imagined. The weather was all that could be desired, and the liberal host took good care that his guests should have "a good time." Dr. Schenck's country seat is one of the most elegant in the vicinity of Philadelphia. The mansion is built in the form of the letter L, with a wide frontage. The whole of the first story is surrounded by a piazza, which will climb elements and other shading vines. The house is crowned by a tower 120 feet high, elaborately ornamented, surmounted by an adaptation of the Mansard roof, on the summit of which is a round house or observatory, bearing a flag-staff. Water is pumped to the summit of this tower to supply domestic uses and to be available in case of fire. In a separate building, some distance from the house, is the gas-works, where all the gas consumed in the house and other buildings is manufactured. There are all the apartments necessary in a first-class country residence, including a billiard room, which is roofed over by being immediately over the ice house. A level lawn sweeps away from the building and merges into an immense farm of 225 acres, divided into two parts. The Doctor expects to garner 200 tons of hay from these acres this summer. Dr. Schenck makes a judicious and liberal use of the large means which have rewarded his professional skill, and his business is energetic and enterprising.

NEW YORK AND LONG BRANCH.—We would call the attention of tourists, and the public generally, to the advertisement of the Haritan and Delaware Bay Railroad, which they will find in another column. Parties visiting New York will find it a very attractive way of reaching that city. After a ride of some ninety miles, including a billiard room, which is roofed over by being immediately over the ice house. A level lawn sweeps away from the building and merges into an immense farm of 225 acres, divided into two parts. The Doctor expects to garner 200 tons of hay from these acres this summer. Dr. Schenck makes a judicious and liberal use of the large means which have rewarded his professional skill, and his business is energetic and enterprising.

FIRE.—This morning, between twelve and one o'clock, a fire occurred at the Continental Dyeing and Finishing establishment, belonging to Harris & Co., located on Masher street, above Thompson. A quantity of woolen yarn in the bleaching house took fire, and the roof of the building was badly damaged. The loss was about \$200.

CHILD RUN OVER.—This morning, about half-past seven o'clock, a boy named Otto Faus, was run over by a furniture car at Ridge Avenue and Callowhill street. He was severely injured when taken to his home, E. Mackley, the driver of the car, was arrested, and after a hearing before Alderman Massey, was held in \$600, to answer the charge of assault and battery.

DOG-SAND GOATS CAPTURED.—During the past week 212 unbranded dogs were captured in the city. Of that number, 20 were sold and 170 were killed. The stray goats taken up, during the same period, numbered 21, of which nine were sold at public sale. The remainder were redeemed by their owners.

ST. ANDREW'S LUTHERAN SUNDAY SCHOOL.—This large and flourishing Sunday School, at the N. E. corner of Broad and Arch, will hold its session in the morning at 9 o'clock, during the week ending July 24th. The teachers and children will please take notice.

ROBBERY.—The grocery store of William L. Maddock, at Third and Carter streets, was entered early this morning by forcing the lock of the cellar door. Several bottles of brandy and a lot of cigars were stolen.

FROM A NOTICE IN OUR ADVERTISING COLUMNS, it will be seen that the eloquent and popular divine, Rev. E. W. Hitchcock, of New York, is expected to preach in the North Broad Street Presbyterian Church to-morrow.

AMONG the very few remedies for peculiar diseases of the season that have kept their hold upon popular favor through many long years of trial, *Bayer's Liquid Carbolic* holds a high place—prepared by an experienced druggist, from the best of materials, and consisting of some of the simplest, and yet most efficient, agents known to the profession; it is a most admirable remedy for all diseases of the bowels.

SEASONABLE CONFECTIONS.—At this season of the year, lassitude and nausea are common effects of warm weather and an enervated system. Stimulants become necessary, particularly to the young and E. G. Whitman & Co.'s famous Confectioners, of No. 218 Chestnut street, below Fourth, get them up in the most convenient form, and with entire freedom from any unhealthy or deleterious components. Their preparations of ginger and mint stand deservedly high among the best of confections; while their general stock of articles, embracing Chocolate preparations, the bon-bons, cream fruits, roasted Jordan Almonds, Caramels, &c., are as famous as they are excellent.

WOOD'S AMERICAN KITCHENER.—A thoroughly good cooking range is an indispensable article in every dwelling, and the place to get the best in the world is at Messrs. James P. Wood & Co.'s, No. 41 South Fourth street. "Wood's American Kitcheners" is without doubt superior to any other range in use, as it combines more decided advantages. Every home, to be perfect, should have one of these ranges.

PURE FRUIT SYRUPS for Soda Water; also bottled for domestic use. Hanco, Griffith & Co., N. W. corner of Marshall and Callowhill streets.

FINANCIAL AND COMMERCIAL. Sales at the Philadelphia Stock Exchange.

PHILADELPHIA, Saturday, July 20. The stock market was very dull this morning, but closed with a better feeling, under the telegraphic advice from New York noting an upward turn there. Money continues as abundant as ever, but fears are entertained that the same demand for capital to move the crops to the seaboard may cause some stringency during the ensuing fall. Pennsylvania Loan closed quiet at 110½@110½ for the Coupon 6s, 81, 111½@111½ for the Five-twelves, '62; 102½ for the Ten-forties; 109½@109½ for the '64's; 109½@109½ for the '65's, and 107½@108 for the Seven-thirties. State and City Loans quiet, some of the rates of the exchange for the former selling at 97½. Reading Railroad closed dull at 52½. Pennsylvania Railroad sold at the same figure, and the Second Mortgage Bonds at 95½. 129½ was bid for Camden and Amboy Railroad; 56½ for Mine Hill Railroad; 29 for Little Ferry; 26½ for Baltimore and Pennsylvania Railroad; 28½ for Lehigh Valley Railroad; 23½ for Catawissa Railroad Preferred, and 27½ for Philadelphia and Erie Railroad. Canal and Bank shares were inactive. Passenger Railway shares were quiet. Second and Third Streets advanced to 70. Heatolville closed at 12.

Smith, Handolph & Co., Bankers, 15 South Third street, quote at 11 o'clock, as follows: Gold, 139½; United States 1881 Bonds, 110½@110½; United States 6-20's, 106½@111½; 5-20's, 106½, 109½@109½; 6-20's, 106½, 109½@109½;
