Since the close of 1866 much enterprise has been displayed at this celebrated sea-shore resort. New and magnificent cottages have been erected: the Hotels have been remodeled; a fine park, with a well made one-mile drive, has been inaugurated; and in all the essentials of a popular summer resort, a spirit of in provement is largely manifested.

The geographical position of Cape Island is in itself a popular feature, when properly understood: Situated at the extreme southern portion of the State, and occupying a neck of land at the confluence of the Delaware Hay with the Atlantic Ocean, it becomes entirely surrounded by salt water, hence favored by continual breezes from the sea.

The bluff furnishes a beautiful view of the Ocean, Delaware Hay, and picturesque back country, taking in Cape Henlopen distinctly at a distance of sixteen miles. The beach is acknowledged to surpuss any other point upon the Atlantic coast, being of a smooth, compact sand which declines so gently to the surf that even a child can bathe with security.

Added to these attractions is the fact that the effect of the Gulf Stream upon this point renders the water comparatively warm—a point not to be overlooked by persons seeking health from ocean bathing.

The distance from Philadelphia to Cape Island is Similes by rail, and about the same distance by steamer decreated by a part of the surple Bay and prestive removed. "London" Gray Hair Color The only Restorer"
