The geographical porition of Cape Island is in itself a popular feature, when properly understood: Situated at the extreme southern portion of the State, and occupying a neck of land at it is confluence of the Delaware Bay with the Atlantic Ocean, it becomes entirely surrounded by sait water, hence favored by continual breazes from the sea. The build furthishes a beautiful view of the Ocean, Delaware Bay, and pictureque back country, taking in Cape Henlopen distinctly at a distance of sixteen miles. The beach is acknowledged to surpass any other point upon the Atlantic coast, being of a smooth, compact sand which dedines so genily to the surf that even a child can bathe with security. Added to these attractions is the fact that the effect of the Guil Stream upon this point renders the water comparised in the Bay, and by either route the facility for the surf as the veriloked by personic secking health from ocean bathing. The birt of the Bay and by either route the facility for the surface promise to be of the most satisfactory chiracter.
