sorrow that this one awakens. To vindicate, should and protect "Beaven's best spift to man" is a grateful duty, while to even repose, and much more to assail a woman, is painful, and if without a perfect justification, nomanly.

If the American Congress or the American people have failed to meet the pecuniary expectations of Mr. Lincoln's widow, it is because that personage failed, during his life and since his death, to inspire either with respect or confidence. They should not, therefore, be subjected to the reprocel, or rest under the imputation, of ingratitude. Had his Lincoln, while in power, borne herself becomingly the suggestion of a Lincoln Fund, by voluntary contributions, would have been promptly responded to. The national heart was yarm. It gushed out in liberal endowments for Grapt, and Farragut. It would as cheerfully have the contributions of the property of the perfect of the line of the l

relations.
This mortifying revelation will go abroad, and as is natural, the press of Europe will make the most of it, in deprecating the ingratitude of our Government, and the want of liberality in the American people. This consideration alone constrains us to discharge the unpleasant duty of showing that neither the Government nor the people are justly obnexious to these accusations. RELIGIOUS INTELLIGENCE.

OF THE

UNION PACIFIC

RAILROAD.

RUNNING WEST FROM OMAHA ACROSS THE CONTINENT,

are now completed, and it is expected that the remaining 67 miles, to carry the track to the base of the Rocky Moun tains, will be finished early in October. Contracts have already been made for rock-cuttings beyond, to be done during the winter. The work is being pushed forward with equal energy on the California end of the route, un-der the direction of the Central Pacific Company, conmencing at Sacramento, and it is confidently expecte that the two reads will meet in 1870, thus completing the entire grand line connecting the Atlantic and Pacific occans, on which THIRTY-FIVE MILLION DOLLARS in cash have already been expended. From the liberal Government aid, the wealth and energy of the stockhold. ers, and the ready market for the First Mortgage Bonds there is no want of funds for the most vigorous pros of the work, and its early completion is as certain as any uture business event can be.

NET EARNINGS OF THE UNION PACIFIC RAILROAD.

During the quarter ending July 31st of the current year an average of 325 miles of the Union Pacific Railroad was in operation. The Superintendent's report shows the fol

From the relative high charges, the operating expenses of the road are but 33% per cert. of the earnings, and the ratio would be much less if the contractor's business were not done at half rates. Throwing out charges to contractors for transportation of materials and men (\$479,233 41), and deducted from the aggregate of all operating expenses and deducted from the aggregate of all operating expense (\$25,539 92) 3274 per cent. (\$157,561 42) as the proportion chargeable on the work done for contractors, which was less than actual cost, because of the half price charged for it, and we have the net operating expenses on the commercial business for the quarter, \$237,985 50. The account for the commercial business stands as follows:

three months.....\$485,789 04 The amount of Bonds the Company can issue on 325 miles, at \$16,000 per mile, is \$5,200,000. Interest in gold, three months, at 6 per cent., on this sum, is \$78,000; add 40 per cent. premium, to correspond with currency earnings, is \$109,200,—showing that the net earnings for this quarter were more than four times the interest on the First Mort-gage Bonds on this length of road.

First Mortgage Bonds, whose interest is so amply provided for and so thoroughly secured, must be classed

among the safest investments. They pay SIX Per CENT. in GOLD,

and are offered for the present at Ninety Cents on the Bollar and Accrued Interest at Six per Cent. in Currency from July 1st.

Many parties are taking advantage of the present high price of Government steeks to exchange for these Bonds, which are over 15 per cent. chesper, and, at the current rate of premium on gold, pay

Over Nine Per Cent. Interest.
