SAFETY RAILROAD SWITCH MAIN TRACK UNBROKEN. I am now prepared to furnish railroads throughout the

United States with my Patent Railroad Switches, by the use of which the MAIN TRACK IS NEVER BLOKEN, and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in wear of the rolling stock, which is by this means provided with a level, smooth, and firm track at switches in place of the usual movable rails and the consequent severe blows caused by the open joints and battered ends, is a matter tion needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to RAILROADS. I refer to the Philadelphia and Reading Railroad Com pany, and to the New York and Haarlem Railroad Co. I am now filling orders for various other Railroad Cor mice, and I will gladly give any information in detail that may be desired
