Here the aid voted by Congress ends, and, in view of the great natural advantages this territory offers for a grand trunk line to the Pacific, the company in question are at present engaged, through their engineering parties under General W. W. Wright, in seeking THE CENTRAL PACIFIC R.R. THE WESTERN HALF OF THE Great National Trunk Line Across the

for a feasible route. These engineering parties have now been in the field for over three months have reached Fort Craig, on the Rio Grande, and expect to reach the Pacific in February next.

The railway in question extends nearly due west from Fort Riley to Fort Harker, in Kansas, and CONTINENT. Being constructed with the AID AND SUPERVISION OF THE UNITED STATES GOVERNMENT, is destined to be one of the most important lines of communication in the world, as it is the sole link between the Pacific Coast and the Great Interior Basin, over which the immense Overland travel must coast and the thence follows the line of the Smoky Hill river in a northweaterly direction toward Denver to Pond Creek. From this point the Company will proba-bly extend a branch to Denver, Col., but deflectand the Great Interior Basin, over which the immense Overlandstravel must page, and the PRINCUPAL PORTION OF THE MAIN STEM LINE BETWEEN THE TWO OCEANS.

Its line extends from Sacramento, on the tidal waters of the Pacific, eastward across the richest and most populous parts of California, Nevada and Usah, contiguous to all the great Mining Regions of the Far West, and will meet and connect with the roast now building east of the Rocky Mountains. About 100 miles are now build, equipped and in running operation to the summit of the Bierra Nevada. Within a few days 85 miles, now graded, will be added, and the track carried entirely across the mountains to a point in the Great Sait Lake Valley, whence further progress will be easy and rapid. Iron, materials and equipments are ready at hand for 300 miles of road, and 10.000 men are employed in the construction.

The local business upon the completed portion surpasses all previous estimate. The figures for the quarter, ending August 31 are as follows in GOLD: Fort Harker, expect to build their main line through New Mexico and Arizona to the Pacific coast.

"General Wright, with his main party, on reaching the Raton Mountain (a portion of the Rocky Mountain range), passed around its base and found an excellent pass of an easy grade.

From these mountains to the Rio Grande the route surveyed was a most excellent one, offering few obstacles. They also discovered several ex-cellent places for bridging the Rio Grande—spots where the channel is confined to a narrow space by rock banks.

"From the Rio Grande one party will proceed by the Gila route, through Apache Pass, and by way of Tucson. &c., to the Colorado of the West, and thence on to the Pacific; the other by the thirty-fifth parallel, both parties expecting to reach the Pacific at about the same time.

"By this route the well-watered valleys of the Arkansas, Upper Canadian, Rio Grande and Great Colorado of the West will be tapped—the Colorado of the fabrics, which were personally selected from the celebrated manufactories of Paris Lyons, 8t. Gallen, Manchester and Nottingham.
