A WAR OF RACES.
The war of races which has been going on
between the lovers of Liberty, North and
South, a war of races. Long before the re-
bellion began was interfered with, there
would be a war of races—a war, that is, of
negroes and whites. After the rebellion
began, the pro-secessionists made a separate
treaty with the Apaches, and dissolved their
former connection with the Cherokees, and
the Cherokees have since made a separate
treaty with the Apaches, and dissolved their
former connection with the Cherokees.

It is worth remembering, as a somewhat
singular circumstance, that this thirty-first
of October, 1867, when Garibaldi is hammer-
ing away at the gates of Rome, and threat-
ening the destruction of the temporal power
of the papacy, is the three hundred and fifth
anniversary of the day upon which Luther
nailed his famous ninety-five Latin theses
upon the door of the Schlosskirche at Witten-
berg, and aimed the first blow to the spiri-
tual power of the papacy. Although these
theses were not intended to overthrow the
papacy, they were intended to show that
the papacy was not infallible, and that it
was not the property of God, but of man.

When the Jaffa colonists, dissatisfied with
the privileges and the opportunities of Amer-
ican citizenship, sailed away from Malta to
return to their native land, they were accom-
panied by a large number of their countrymen
who were desirous of accompanying them.
They were accompanied by a large number of

panying them.

It is almost the last hope of the oppres-
sion, and the vanquished chivalry is obliged
to pretend to object, and for the sake of
lightening the radicals and keeping up the
President's power, they are obliged to do so.
In the meantime, the public would like to
know when the promised war of races is to
begin. The secret is, that the war of races
is to begin when the white race at the South
is ready to begin.
