Serious disapprobation or warmth of feeling is not to be found in Rossini's character; he prefers knocking, with good-natured self-ridicule, the casket of incense out of the hand of his worshipper, and enjoys the latter's embarrassment. FUTURE BUSINESS. The most skeptical have never expressed a doubt that vhen the Union Pacific Railroad is finished the immer business that must flow over it as the only railroad con portation; and as it will have no competitor it can always charge remunerative rates. The Pacific Mail Steamship Company, of New York, is now running a regular line of its splendid steamers between San Francisco and Chin and Japan, which is doubtless the pioneer of other line that will traverse the Pacific occan laden with teasspices and other products of Eastern Asia. Excepting some very heavy or bulky articles of comparatively low values, chortness of time decides the direction of freights, and the Union Pacific Railroad.

It is quite within bounds to say that its traffic will be limited only by the capacity of the line, and that no other road will find a double track so necessary. California and Oregon must not only be supplied with means of transport for their passengers, mall, treasure and other freights, but the inhabitants of Dakotah, Colorado, Utab. Idaho and Montana will communicate with the older States almost entirely by this road. It will be the avenue to all the great mining district, which is only waiting this
