MITCHELL & FLETCHER,

MITCHELL & FLETCHEE,

The Emperor Napoleon wishes a European congress of nations to again arrange for the peace of Europe. The peace of Europe seems to be like a fine suit of clothes—all the time giving way somewhere, and consequently in continual need of patching. Nap wants to act the character of tailor to the nations. We are thinking just now what a happy condition it would be if the "Feace of Europe" was as well put together as the clothing sold at Charles Stokes & Co.'s, under the Continental. Then it would not need continued repairing.

WILBOR'S COD LIVER OIL AND LIME. - The friends of persons who have been restored from confirmed Consumption by the use of this original preparation, and the grateful parties themselves have, by recommending it and acknowledging its wonderful efficacy, given to the article a vast popularity in New England. The Cod Liver Oil is in this combination robbed of its unpleasant taste, and is rendered doubly effective in being coupled with the Lime, which is itself a restorative principle, supplying nature with just the agent and assistance required to heal and reform the diseased lungs. A. B. Wilbor, No. 166 Court street, Boston, is the proprietor. In Philadelphia by Johnson, Holloway & Cowden, and druggists gene

FINANCIAL.

525 MILES

OF THE

UNION PACIFIC RAILROAD,

Running West from Omaha

ACROSS THE CONTINENT,

ARE NOW COMPLETED.

This brings the line to the eastern base of the Rocky mountains, and it is expected that the track will be laid thirty miles further, to Evans Pass, the highest point on the road, by January. The maximum grade from the foot of the mountains to the summit is but eighty feet to the mile, while that of many eastern roads is over one hundred. Work in the reckentifus on the western the mile, while that of many eastern roads is over one hundred. Work in the rock-cuttings on the western slope will continue through the winter, and there is now no reason to doubt that the entire grand line to the Pacific will be open for business in 1870.

The means provided for the construction of this Great National Work are ample. The United States grants its Six Per Cent. Bonds at the rate of from \$16,000 to \$48,000 per mile for which it takes a second lieu as security, and

per mile, for which it takes a second lien as security, and receives payment to a large if not to the full extent of its claim in services. These Bonds are issued as each twenty-mile ection is finished, and after it has been examined by ted States Commissioners and pronounced to be in all respects a first-class road, thoroughly supplied

to be in all respects a first-class road, thoroughly supplied with depots, repair shope, stations, and all the necessary rolling stock and other equipments.

The United States site makes a donation of 12,800 acres of land to the mile, which will be a source of large revenue to the Company. Much of this land in the Platte Valley is among the most fertile in the world, and other large portions are covered with heavy pine forests and abound in coal of the heat quality. bound in coal of the best quality.

abound in coal of the nest quality.

The Company is also authorized to issue its own First Mortgage Bonds to an amount equal to the issue of the Government and no more. Hon. E. D. Morgan and Hon. Oakes Ames are Trustees for the Bondholders and deliver the Bonds to the Company only as the work proses, so that they always represent an actual and pregresees, so that they always represent an actual and productive value.

The authorized capital of the Company is One Hundred Million Dollars, of which over five millions have been paid in upon the work already done.

EARNINGS OF THE COMPANY.

At present, the profits of the Company are derived only from its local traffic, but this is already much more than sufficient to pay the interest on all the Bonds the Company can issue, if not another mile were built. It is not doubted that when the road is completed the through traffic of the only line connecting the Atlantic and Pacific States will be large beyond precedent, and as there will be no competition, it can always be done at profitable rates.

rates.

It will be noticed that the Union Pacific Railroad is, in fact, a Government Work, built under the supervision of Government officers, and to a large extent with Government money, and that its bonds are issued under Government direction. It is believed that no similar security is so carefully guarded, and certainly no other is based upon a larger or were extended. d upon a larger or more valuable property. As the
