northward and westward the march of gold watches takes its way, and in districts where gold chronometers and full-jeweled levers now nestle in multitudinous vest-pockets. To be more explicit, the returns of the gold watches in the city, made with a view to local taxation for 1868, are now-gathered in. The aggregate is 13,625 time pieces, against 4,489 for 1867. Where this increase of 9,136 comes from is a subject for speculation. We do not propose to explain away this modden increase; but possibly the fact that gold watches are taxable under the United States Revenue laws, and that the returns to the revenue officials are required to be made mder oath, may have had something to do with the fuller returns made to the city Assessors. In many of the Wards the difference between 1867 and 1868 is something marvellous. Many Wards multiplied their hat preceeding return five, ten and even any times, while the First, Third, Eighteenth | HOLIDAY PRESENTS and Twenty-eighth Wards which were utterly gold-watchless a vear ago, now admit the impeachment of having within their destuth entry
