The plan of clearing, so far as perfected, will be substantially the same as has been successfully adopted in the settlement of gold transactions, by exchange of checks or orders between dealers for each transaction, and by sending a statement of the same, with balances to the Association. The charges in formally agreed upon, are 25 cents for 100 shares stock received or delivered, and 10 cents for half stock. It is supposed to clear a few of the active stocks at first, and as the working capacity of the Clearing House becomes developed, and the dealers are familiarized with the movement, to include in it most of the stocks dealt in. Rules and regulations for dealers are being prepared, and can be ready for distribution at an early day. The Trustees say: We are unanimous in the opinion that, as the clearing system is only a new method of settling transactions, it will be successful in its operation, and will be successful in its operation, and will be successful in its operation...
