glow Makes darkness noonday to our trusting sight, And joys of perils into which we go.

God help us when this precious shining mark
The raging storms of deep distrust assail
With icy, poisoned breath, and deadly aim, Till we, with hearts that shrink and cower and quall
In terror, which no measure has, nor name,
Stand trembling, helpless, palsied, in the dark!

NEW POBLICATIONS.

J. B. Lippincott & Co. have just issued an interesting little volume upon a scientific subject of teresting little volume upon a scientifi great practical importance. It consists of a series entertain. As far as the discount market is terests of heaven, earth, the present and the of papers written by Dr. Benjamin Lee, of this concerned, there never was more distinct reacity, on The Angular Curvature of the Spine.

Son to assume that the abundance of money of the destinies of these kingdoms we leave the experienced during the past summer will still issue; but our own honor and conscience recity, on The Angular Curvature of the Spine.
Dr. Lee has devoted himself for several years past, first in association with Dr. Charles F. Taylor, of New York, and since in his practice in this city, to the treatment of spinal disease. From accidents and from disease, affections of the spinal column are very numerous and are constantly treated upon a diagnosis so foreign to the true nature and seat of the disease, that comparatively mature and seat of the disease, that comparatively the spinal sease is met with in allaying the exerucia
experienced during the past summer will still be witnessed on all sides. But, whatever facilities may exist in this way, the merchant and dealer can feel little confidence in any plans he may form while the magnitude of the armies of the Continent, which has been year by year, for so long a time, the ever-increasing scandal of European civilization, is apparently destined to be augmented even in a more than orditing sufferings and the terrible deformities which are consequent upon the wasting away of the vertebræ and the inflammation and disease of the the United States must also operate to cause inter-vertebral cartilages.

The application of mechanical supports to a even making full allowances for these considediseased spine is not, by any means, a new practice. The late Dr. J. K. Mitchell, one of the ablest medical minds in the profession, more than twenty years ago thoroughly tested their than twenty years ago thoroughly tested their efficiency, and Dr. Lee happily adopts, as the motto of his work, Dr. Mitchell's remark, that "Where there is advantage to be derived from machines I use them, without much regard to machines I use them, without much regard to the waste of armies would lead the powers engaged to bid high for capital to the Committee machines I use them, without much regard to lead the powers engaged to bid high for capitheoretical objections." In the practice which tal in every direction, but, owing to the caubion at the same time aroused, it would be article to the Committee, to be reconsidered.

M. Grenier, the reporter of the Committee, to be reconsidered.

Nature a chance to get in and repair the wasted | People are apt to fancy that an abundance of Nature a chance to get in and repair the wasted structure and lay her foundations anew. The money, like that now prevalent, may be attributed to the distrust which leads to daily 31st of December, M. Thiers criticized the Structure and lay her foundations anew. The structure and lay her foundations anew. The successful treatment of Dr. Mitchell and others, twenty years ago, appears to have fallen utterly into dieuse until recently when it has been revived and greatly improved upon by the inventions and appliances of Drs. Taylor, Lee and perhaps a few others.

The money, like that now prevalent, may be attributed to the distrust which leads to daily sales of securities on the one hand, and the timidity of investors on the other. This is altogether an error. If confidence were suddenly to return, and a general rush to purchase securities were to ensue, it would have no effect in diminishing the amount of unembleved capital on the market. The man who The little work now before us ably combats the objections which are always sure to be raised buys £100 consols, or railway stock, or any objections which are always sure to be talsed against all innovations in medical and surgical other home security, pays the amount to the seller, and the only result is that A holds the stock instead of B, and B holds the cash interest to meet the theories of the objectors.
