The narrative, as made to the man-agers, and as repeated by the correspondent of the *Gazettc*, is to the effect that in the winter of 1860-61, before Major Anderson-had left Fort Moultrie for Sumter, a small boat one night approached the landing before the exate of Moultrie, and was bailed by the sontru-tation store of the garter of Moultrie and was bailed by the sontru-for the spirit of this resolution is most excelone night approached the landing before the gate of Moultrie, and was hailed by the sentry. Te-day the money market suffered from the sales of gold by the Assistant Treasurer yeater. day, which he stated were \$500,000, but the government gold brokers are known to have sold then at least \$1.-000,000 of gold, which it is presumed could not have been for government account, as it conflicts with Mr. Van Dyck's statement. The money pressure however for the day was prohably the same as if govern-ment had sold the larger amount. The dis-crepancy between the amount of gold which Mr. Van Dyck's ports sold each day, and the actual amount of the sale by the Government gold brokers is the subject of general comment in business circles, Joutale of Wall street as well as in it as "tight money" in New York af-fets every borrower throughout the whole country, and the government sales of gold and limited disburements ato) notoriously the sole cause of the present "Light money."
