THE UNION PACIFIC

RAILROAD COMPANY

OFFER A LIMITED AMOUNT OF THEIR

FIRST MORTGAGE BONDS

AT PAR,

The Union Pacific Railroad Company are building a railroad from Omaha, on the Misseuri River. Fost, to con nect with the Central Pacific of California, building from Sacramento, East, and these roads, when completed, will be THE ONLY GRAND RAILROAD BETWEEN THE ATLANTIC AND PACIFIC COASTS.

The Union Pacific Company have already

COMPLETED 550 MILES.

and trains are now running over the highest point of the Rocky Mountains that will be traversed by the line. The Company will have a much larger force employed this year than ever before, and it is expected that between

800 and 900 Miles will be in operation during 1868. There seems to be no

casonable doubt that the 1,721 miles between Omaha and Responsible to the finished in 1870.

The means provided for the construction of this Great National Work are ample. The United States grants its National Work are ample. The United States grants Six Per Cent, Bonds at the rate of from \$18,000 to \$48,000 per mile, for which it takes a second tien as security, and receives payment to a large, if not to the full extent of its claim in services. There Bonds are issued as each twenty-mile section is finished, and after it has been examined by United States Commissioners and propounced to be in all respects a first-class road, thoroughly supplied with depots, repair shops, stations, and all the necessary rolling

tock and other equipments. The United States also makes a donation of 12,800 acros of land along the line to the mile, which will be a source of large revenue to the Company.

The Company is also permitted to issue its own First Mortgage Bonds to an amount equal to the issue of the Government and no more. Hon. E. D. Morgan and Hon. Onkes Ames are Trustees for the Bondholders, and de liver the Bonds to the Company only as the work pro gresser, so that they always represent an actual and pro-

authorized capital of the Company is One Hundred Million Dollars, of which over eight and one hal millions have been paid in upon the work already done. Contracts for the construction of 914 miles west from Omaha, comprising much of the most difficult mountain work, have been made with responsible parties at the average rate of sixty-eigh thousand and fifty-eight dollars (868,063) per mile. This price includes all necessary car shops, depots, stations, and all other inci-dental buildings, and also locomotives, passenger, bag-gage and freight cars, and other requisite rolling stock, to amount that shall not be less than \$7.500 per mile. It is not doubted that when the road is completed the through traffic of the only line connecting the Atlantic and Pacific States will be large beyond procedent, and, as there will be no competition, it can always be done at profitable rates, and

THE BARNINGS FROM LOCAL OR WAY BUSINESS ARE NOW THREE TIMES THE INTEREST ON THEIR BONDS.

It will be noticed that the Union Pacific Railroad is, in fact, A GOVERNMENT WORK, built under the super-vision of Covernment officers, and to a large extent with Government money, and that its bonds are issued under Government direction. It is believed that no similar se-curity is so carefully guarded, and certainly no other is based upon a larger or more valuable property.

The Union Pacific Bonds are for \$1,000 each, and have coupons attached. They have thirty years to run, and bear annual interest, payable on the first days of January and July, at the Company's Office, in the city of New York, at the rate of eix per cent, in gold. The Principal is payable in gold at maturity.

At the present rate of Gold these bonds pay an annual ncome on their cost of

NEARLY NINE PER CENT., And it is Believed that they will soon be at a Premium.

The Company have but a very limited supply of their Bonds remaining on hand; but it is expected that the first instalment of the New Bonds, to be issued on that portion of the road to be completed this year, will be ready

in May.

Any subscription accepted to a greater amount than can be filled from Bonds now in the Cempany's possession will be supplied from the new Bonds in the order in will be supplied in the vivilient they are received.

The Company reserve the right to advance the price of

their bonds to a rate above par at any time, and will not fill any orders or receive any subscription on which the money has not been actually paid at the Company's office before the time of such advance.

Parties subscribing will remit the par value of the bonds, and the accrued interest in currency at the rate of six per cent. per annum, from the date on which the last coupon was paid. Subscriptions will be received in New York

Remittances should be made in drafts or other funds Remittances should be made in drafts or other funds par in New York, and the bonds will be sent free of charge by return express. Parties subscribing through local agents will look to them for their safe delivery.

A PAMPHLET AND MAT FOR 1868 has just been published by the Company, giving fuller information than is possible in an advertisement, respecting the Progress of the Work, the Resources of the Country traversed by the Road, the Means for Construction, and the Value of the Bonds, which will be sent free on application to the Company's offices or to any of the advertised Agents.
