Although nothing but circumstantial ordence has yet been discovered, recent developments tend strongly to connect Andrews with the murder. In a conversation with him at the jall yesterday, an intimate friend (also a relative) informed him that he came to assist him, that he did, got believe him guilty, and would do all that he could to enable him to prove his innocence, when he was a stouished by the following reply: "They may condue me or hang me, but I'll never confess it." A pair of rubber overshoes have been discovered in a closet where Andrews kept his clothes in Newcomb's factory (at which place he was ampleyed), covered with mud, corresponding with the soil of his garden, also with blood and gray hairs. JUNE 4-The Government bond market, as stated in the World of this morning, has been yesterday and again to day in the hands of one of the large dealers whose stock on band was unusually low, and come influential foreign firms, who also wanted a large amount of bonds at as low prices, of course, as they could orgineer. Brokers were employed by them again to day to sell the market down on small amounts with the view of inducting parties to sell round amounts at the reduced quotations. They succeeded in arresting the native inductions. They succeeded in arresting the native inductions. They succeeded in arresting the neither of the corrent demand for investment. The sales were made chiefly by the bears, as the quantity of bonds offering on the market from real holders is wholly inadequate to meet the current demand for investment. The business own as 500,000 representing chiefly purchases of banks and capitalists, who were attracted by the reported decline into investment securities is without, parallel in the history of Wall street and has taken, by surprise and upset all the calculations of the large Government bond dealers who had made what they believed to be ample provision for the extraordinary domand which they expected this summer. Capital is, of course, nowing chiefly into Governments, but a fair proportion is also finding its way into the Border State stocks and first class railway mortgage bonds. This fever to place money in sound dividend vaving securities is one of the most remarkable features in mancial affairs which Wallstreet has seen even in the eventual period embraced within the last six years.
